

TABLE OF CONTENTS

Chapters	Title	Page No.
	List of Figures	ix-x
	List of Tables	xi-xiv
	List of Abbreviations	xv-xvi
	Symbols Used	xvii-xviii
	Preface	xix-xxiii
Chapter 1	Introduction	1-10
	1.1 General	1
	1.2 Literature survey	1
	1.3 Motivation	6
	1.4 The main objectives of the thesis	7
	1.5 Thesis organization	8
Chapter 2	Optimal Placement of PMUs in Power System Network for Voltage Stability Estimation under Contingencies	11-40
	2.1 Introduction	11
	2.2 Voltage stability based contingency ranking	13
	2.3 Optimal placement of PMUs	16
	2.4 Voltage stability assessment using PMUs	18
	2.5 Case studies	18
	2.5.1 IEEE 14-Bus System	19
	2.5.2 New England 39-Bus System	24
	2.5.3 NRP 246-Bus System	31
	2.6 Conclusions	40
Chapter 3	Voltage Stability Estimation of Real Time Systems Using Phasor Measurements	41-83
	3.1 Introduction	41
	3.2 Proposed approach for voltage stability assessment	42
	3.3 Case Studies	45
	3.3.1 IEEE 14-Bus System	45
	3.3.2. New England 39-Bus System	54
	3.3.3. Indian 246-Bus Northern Region Power Grid	68
	3.4 Conclusions	83

Chapter 4	Online Monitoring of Voltage Stability Margin Using PMU Measurements	84-108
	4.1 Introduction	84
	4.2 Methodology	87
	4.3 Case studies	94
	4.3.1 IEEE 14-Bus System	94
	4.3.2 New England 39-Bus System	99
	4.3.3 NRPG 246-Bus System	103
	4.4 Conclusions	108
Chapter 5	Online Enhancement of Voltage Stability Margin through STATCOM	109-130
	5.1 Introduction	109
	5.2 STATCOM placement strategy	111
	5.3 Methodology for Online enhancement of voltage stability margin through STATCOM	113
	5.4 Case studies	116
	5.4.1 IEEE 14-Bus System	117
	5.4.2 New England 39-Bus System	121
	5.4.3 246-Bus NRPG System	125
	5.5 Conclusions	130
Chapter 6	Conclusions	131-136
	6.1. General	131
	6.2. Summary of important findings	132
	6.3 Scope for future research	135
	References	137-156
	Appendices	157-179
	Appendix A: Data for IEEE 14-bus system	157
	Appendix B: Data for New England 39-bus system	159
	Appendix C: Data for NRPG 246-bus system	163
