

LIST OF TABLES

Table No.	Table Caption	Page No.
Table 1.1	Properties requirements for automotive components.	10
Table 1.2	Mechanical properties of AMCs with different matrices and reinforcement.	11
Table 1.3	Automotive demonstrator components of aluminium-matrix composites.	12
Table 3.1	Calculation for theoretical volume fraction of Al ₃ Zr particles in the composites.	46
Table 3.2	Powder amount required for 0.5 kg Al-Mg alloy.	46
Table 3.3	Chemical compositions of as cast composites.	47
Table 3.4	Theoretical and actual vol.% of Al ₃ Zr in composites.	47
Table 3.5	Density and porosity of Al-Mg alloy and composites.	51
Table 3.6	The values of grain size in Al-Mg alloy and composites.	53
Table 3.7	Summarized data of mechanical properties in Al-Mg alloy and composites.	58
Table 3.8	Coefficient of linear and volumetric thermal expansion for all compositions.	78
Table 4.1	The calculation of theoretical volume fraction (%) of ZrB ₂ particles in the composites.	82
Table 4.2	The required quantity of powders for 500 g Al-Mg alloy in the composites.	82
Table 4.3	Composites and their designation.	83
Table 4.4	Chemical compositions of composites.	83
Table 4.5	Theoretical and actual vol.% of Al ₃ Zr and ZrB ₂ particles in composites.	83
Table 4.6	The values of density and porosity in composites.	86
Table 4.7	Summarized data of mechanical properties of composites.	100
Table 4.8	The different terms and their meaning used in the evaluation of different strengthening mechanisms.	100
Table 4.9	Contribution of different strengthening mechanisms to predicted yield strength in hybrid composites and experimental yield strength.	106
Table 4.10	Coefficient of linear and volumetric thermal expansion for all composites.	118
Table 5.1	Summarized data of mechanical properties of composite for different temperatures.	126
Table 6.1	Comparison of tensile properties with previous work.	138
Table 6.2	Comparison of wear properties with previous work.	139
Table 6.3	Comparison of COF with previous work for brakes and clutches.	139
