

## ***List of Tables***

<b>Table 1.1:</b> <i>The Typical examples of Photocatalytic for TiO<sub>2</sub> with different heterojunctions</i>	18
<b>Table 3.1:</b> <i>Summary of diameter for diffraction ring and corresponding planes from SAED</i>	45
<b>Table 3.2:</b> <i>The photocurrent density of the various type of Ag coated TiO<sub>2</sub> based photoanodes</i>	49
<b>Table 3.3:</b> <i>The flat band potential and surface charge density (N<sub>D</sub>) at 1 kHz for the different devices is summarized</i>	51
<b>Table 3.4:</b> <i>Fitting value of R<sub>1</sub> data for all different samples under dark and light conditions</i>	52
<b>Table 3.5:</b> <i>The rise and fall time from time response data of different photoanodes are summarized</i>	52
<b>Table 4.1:</b> <i>Summary of R<sub>1</sub> and R<sub>2</sub> for all three Cu<sub>2</sub>S-TiO<sub>2</sub> photoanode under dark and light conditions</i>	67
<b>Table 4.2:</b> <i>The summary of E<sub>FD</sub>, N<sub>A</sub> values for all of these photoanodes for n-type semiconductor</i>	72
<b>Table 4.3:</b> <i>Summary of rise time and fall time of all samples</i>	72
<b>Table 5.1:</b> <i>The summary of the flat band potential and surface charge density (N<sub>D</sub>) at 1kHz a for the different devices</i>	89
<b>Table 5.2:</b> <i>Fitting value of R<sub>s</sub> and R<sub>1</sub> for bare TiO<sub>2</sub> and Ag<sub>2</sub>S-TiO<sub>2</sub> for all different photoanodes under dark and light conditions</i>	90
<b>Table 5.3:</b> <i>Summary of rising and falling time of different photoanodes</i>	90
<b>Table 6.1:</b> <i>The rising and falling time of the three different device structures shown in the table</i>	102
