

LIST OF TABLES

| Table No. | Table Description | Page No. |
|------------------|---|-----------------|
| Table 2.1.1 | Effect of EMR-2450MHz on mitochondrial complex activities (I, II, IV and V) in amygdala | 39 |
| Table 2.2.1 | Effect of EMR (900, 1800 and 2450 MHz) on 5-HT, DA, NE level and their metabolites and its ratio in PFC | 69 |
| Table 2.3.1 | Effect of EMR-2450MHz on mitochondrial complex activities (I, II, IV and V) in hippocampus | 95 |
| Table 2.3.2 | Assessment of the mitochondrial oxidative and nitrosative stress markers in EMR-induced animals | 96 |
| Table 3.1 | Effect of EMR on the pharmacokinetics parameter of fluoxetine treated rats | 117 |
| Table 4.1 | (A) Repeated exposure of EMR-2450 MHz decreased gastric blood flow in rats (B) Effect of Omeprazole on gastric blood flow in EMR-2450 MHz exposed rats. | 135 |
| Table 4.2 | (A) Repeated exposure of EMR-2450 MHz causes change the preliminary function (gastric pH, activity of gastric acid secretion and gastric ulcer index) of stomach in experimental rats (B) Effect of Omeprazole on gastric tissue of EMR-2450 MHz exposed rats. | 137,138 |
| Table 4.3 | EMR-2450 MHz modulated stress markers of gastric tissues in rats | 142 |
