

## Acknowledgement

Foremost, I would like to thank my supervisor **Dr. Ashutosh Kumar Dubey**, for his kind support and guidance throughout my Ph.D work. His immense knowledge in the field of materials science and the way of sharing it always pushed me to know more deeply and fundamentally about the field. His thorough evaluation and assessment towards the present research have greatly improved its quality.

I would also like to thank **Dr. Devendra Kumar** and **Dr. Om Prakash**, former Heads and Professors in the Department of Ceramic Engineering, IIT(BHU) for their crucial tips to carry out my research work. With their vast experience and knowledge in the experiments, their critical suggestions were very helpful. I would also like to thank my research evaluation committee members, **Dr. Imteyaz Ahmad** and **Dr. Sanjiv Kumar Mahto** for their valuable advice towards the present work.

I would like to thank my friend, colleague and labmate **Mr. Deepak Khare** for helping me during the experiments also sharing with me some key knowledge on piezoelectric materials.

I would also like to thank my junior **Mr. Shivam Gupta** who helped me in carrying out crucial experiments for development of functionally graded materials. I would also like to thank my other friends and colleagues such as **Shashank** and **Ajay** from Department of Computer science and Engineering for helping me in the computational analysis. I would also like to thank my labmates **Priya** and **Urvashi** for creating a work friendly environment in the lab. I would also like to thank other staff members of the department.

Finally, it was the blessings of my **Parents** and my **family members** and their constant support and encouragement throughout my life that I could able to finish this work.

Lastly, it was by the grace of my Spiritual Guru **Swami Atmananda Tirtha** this work could be accomplished.

**Abhinav Saxena**
