

Acknowledgements

ALMIGHTY! Before all else, I bow from the core of my heart with reverence and gratitude to surrender to you for constantly guiding me through the journey of my life. Ever since my birth, GOD has always been tangibly available to me in the form of my supportive family. I owe my deepest gratitude to my family and I would simply like to dedicate this thesis to my family.

The SUPREME brought me to Kashi, the holy and sacred land of spiritual realization and the seat of learning since times immemorial. The LORD blessed me with such a golden opportunity to pursue higher studies and infused the power in my mind to fulfill the task assigned to me.

I shall remain indebted to my revered supervisor, Prof. Brahmeshwar Mishra Sir, Dept. of Pharmaceutics, for accepting me as his PhD student, for giving me freedom to explore, for his confidence in my work and for providing a homely atmosphere [this particular credit may be shared with Shail mam's (Mrs. B. Mishra) hospitality too – thank you mam!]. Most importantly, I am thankful to Sir for patiently bearing with my ignorance and all of my mistakes (known and unknown) ever since I joined the department (may be, I should say, ever since the day of my interview, back in July 2012!). He is a person known for his extraordinary kindness, openness, support, and friendliness towards his students. The way he is a contented person and the way he allows his students to function at their free-will are truly inspiring. One actually cannot ever imagine a better supervisor and I am just very lucky that Sir chose me to be one of his students. It has been a real privilege for me to get an opportunity to work under him and I feel blessed and deeply honored for being his student.

The work presented in this thesis is the result of continuous love, support, encouragement and inspiration from all my near and dear ones. The super magical blessings and best wishes they shower on me are truly invaluable. I wish to express my sincere gratitude towards many persons but to the following in particular. My family, in the first place, has been a constant source of priceless love. Secondly, its my extended family relations and friends (Indu and Harika, among all, have been a constant source

of moral support and encouragement, thank you gals!), all of whom have been very encouraging and supportive.

The most seemingly independent creature still seems so only because of GOD's blessings, which means nothing but, every creature is and forever remains dependent on GOD. Of course, the very existence and survival of any creature lies at the mercy of the CREATOR! What a particular person is or becomes, as a human being, depends to a great extent on the surroundings and the people among whom the person is placed during one's life time and I am a believer of the myth that GOD does take various forms to caress the creation. So, I would like to acknowledge that the LORD has placed in my life, several beautiful hearted human beings who have been true embodiments of GOD's blessings. Thank you GOD for all your tangible and intangible support in all of your various forms and at all times, the times I realized and also, the times I failed to! Above all, my family, to me, has been a consistent vivid manifestation of the SUPREME. I have no words to express my gratitude to my family. My very sustenance is just the result of the motivation and moral support rendered by my family. Their unconditional love and support held me through the tough times of my life and provided me the energy and motivation to keep working. They are the ones who have been consistently and patiently bearing with all my mistakes and mood swings and yet never hesitated to back my decisions at any stage of my life. I am and forever remain indebted to my family.

I was bestowed by the ALMIGHTY to carry out my education at Banaras Hindu University (BHU), founded by the great soul, Mahamana Pandit Madan Mohan Malviya ji, at the Department of Pharmaceutics, IIT (BHU), which is an epicenter of pharmaceutical knowledge and research.

I express my sincere and heartfelt gratitude to Prof. Sushil. K. Singh, Head of the Department and Dr. B. Mishra, Ex-Head (and my honorable guide), for providing the facilities to carry out this research work. I humbly convey my regards and gratitude to Prof. Sanjay Singh for his constant inspiration. Ms. Ruchi Chawla has been an encouraging and cheering teacher cum a helpful and friendly senior. I sincerely thank the members of Research Program Evaluation Committee (RPEC) for their valuable suggestions in my research work. I am also grateful to all my teachers, Dr. K. Sairam, Dr. (Mrs.) S. Hemalatha, Mr. A. K. Srivastava, Dr. Senthil Raja, Dr. Vikas kumar, Mr. A. N. Sahu, Prof. S. K. Shrivastava, Mr. Ashok Maurya, Mr. S. K. Mishra and Dr. M. S. Muthu, for providing a cordial environment to work in the department.

I am deeply grateful towards the valuable support provided by Prof. O.N. Shrivastav, Department of Physics, Faculty of Science, BHU, for allowing me to utilize his lab facilities, for carrying out SEM, TGA and XRD studies. I would like to thank the Head, Department of Chemistry, Faculty of Science, BHU, and the Head, Department of Chemical Engineering, IIT (BHU), for allowing me to carry out NMR, DSC, TGA and XRD studies. I am also very thankful to some students and instrument in-chargers of the above departments for helping me with the software and analyses, respectively.

A sincere appreciation goes to all my seniors, juniors and batch mates, and especially to my lab mates, for their conscious and subconscious motivation that has led to the successful completion of this work. A few juniors from within and outside the department have been very supportive and cheering. I am very sincerely grateful to all of them who have been helpful, thank you!

My best regards to all my dear hostel friends, Priyanka, Shalini, Punitha mam, Shruthi and Shivaranjani. Thank you for making me feel at home and for all your friendship, emotional support, encouragement and guidance. I can never forget the homely compassion of Priyanka without whom my stay at BHU, may it be at the department or at the hostel, might not have been any smooth and pleasant. In fact, Priyanka has not only been a caring and protective friend but also an inspiring and guiding mentor throughout. Ms. Anupama Mishra has been a very helpful guide, a supportive, inspiring and encouraging hostel friend cum batch mate.

I pay my sincere thanks to Mr. Virender, Mr. Nandlal, Mr. Sanjeev, Mr. Ramjatan Prajapati, Mr. Upadhyay, Ms. Saroj kumari, Mr. Pathak, Mr. Madan, Mr. Rafique, Mr. Jameel, Mr. Kapil, Mr. Arun, Ms. Shyamali Ghosal, Mr. Gopal, Mr. Madhu and other non-teaching staff for their assistance throughout my course.

My sincere thanks go to all authors and laboratories that sent their valuable reprints and chemicals, respectively, for my research work. My deep thanks to all the reviewers who have reviewed my research work during the process of publication.

My heartfelt thanks to all my teachers right from my school until now and all of my well-wishers for their valuable encouragement and best wishes for my personal life and career. I also extend my thanks to all those, who have been directly or indirectly related to my project work.

I shall fail in my duty if I do not convey my sincere regards to Dr. Bala Sir and Mr. Shiva Kumar Sir for their encouragement and support to my decision of pursuing my higher studies from IIT (BHU), back in 2012. Thank you, both! I also owe a deep

sense of gratitude to my very dear friend, Indu for having been a continual moral support to me ever since I met her. She is a surprisingly inspiring old soul and is definitely one of the most beautiful hearted human beings I know. It may be said without a doubt that my life journey would have never drifted to Kashi if not for these three mentors in my life. I thank GOD for introducing these three motivating, inspiring, supporting and encouraging persons to me.

I pray ALMIGHTY to provide 'Moksha' to my experimental animals, whose sacrifices helped in proposing the hypothesis of my research work.

Finally, I bow down at the feet of LORD VISHWANATH, for never ever leaving me alone during the times of trials and sufferings and molding me into what I am today. It is only the blessings of LORD SHIVA due to which I am in a peaceful space at mind and I solicit his patronage for doing detached good deeds throughout my life. I earnestly seek ALMIGHTY's eternal and magnanimous blessings to help me stay surrendered forever to the DIVINE!
