

CONTENTS

List of Figures	i-vi
List of Tables	vii-viii
List of Acronyms and Symbols	ix-x
Preface	xi-xiv
Chapter 1: Introduction and Literature Review	1-40
1.1 Concept and Definition of Corrosion	2
1.2 Economic and Social effects of Corrosion	2-3
1.3 Necessity of the Corrosion Protection	3-5
1.4 Classification of Corrosion	5-10
1.5 Electrochemical aspects of Corrosion	10-12
1.6 Methods of Corrosion Protection	12-14
1.7 Definition and Working Principle of Inhibitors	15-16
1.8 Classification of Inhibitors	16-19
1.9 Green Corrosion Inhibitors	19-20
1.10 Testing of Inhibitors	20-26
1.11 Importance of Mild Steel Protection	26
1.12 Literature Survey on Corrosion Inhibitors	27-36
1.13 Choice of Inhibitors for the study	36-38
1.14 Motivation and Objectives of the work	38-40

Chapter 2: Experimental Details	41-51
2.1 Preparation of the Extracts	40-41
2.2 Preparation of test Coupons	41-42
2.3 Corrosive Solutions	42
2.4 Characterization of Inhibitors	42-45
2.4.1 Uv-Visible Spectroscopy	42-43
2.4.2 FTIR Spectroscopy	44
2.4.3 High Pressure Liquid Chromatography	44-45
2.5 Assessment of Corrosion Inhibition	45-49
2.5.1 Weight Loss measurements	45-48
2.5.2 Electrochemical Tests	48-49
2.6 Surface Morphology Examination	49-51
2.6.1 Scanning Electron Microscopy	49-50
2.6.2 Atomic Force Microscopy	50-51
Chapter 3: Evaluation of <i>Argemone Mexicana</i> Leaves for Corrosion Inhibition	52-77
3.1 Characterization of <i>Argemone Mexicana</i> leaf Extract	52-55
3.2 Weight Loss Measurements	55-64
3.2.1 Adsorption Analysis	57-58
3.2.2 Effect of Immersion Time	59
3.2.3 Effect of Acid Concentration	59-60
3.2.4 Effect of Temperature on Corrosion Parameters	61-64

3.3 Tafel Polarization Curves	64-67
3.4 Electrochemical Impedance Spectroscopy	67-72
3.5 Surface Morphology Study	72-75
3.6 Mechanism of Corrosion Inhibition	75-77
Chapter 4: Evaluation of <i>Chlorophytum Borivilianum</i> Roots for Corrosion Inhibition	78-100
4.1 Characterization of <i>Chlorophytum Borivilianum</i> Root Extract	78-81
4.2 Weight Loss Measurements	81-89
4.2.1 Adsorption Study	82-84
4.2.2 Effect of Immersion Time	84-85
4.2.3 Effect of Acid Concentration on Corrosion Inhibition	85-86
4.2.4 Effect of Temperature on Corrosion Inhibition	86-89
4.3 Tafel Polarization Curves	90-92
4.4 Electrochemical Impedance Spectroscopy	92-96
4.5 Surface Morphology Analysis	96-98
4.6 Mechanism of Corrosion Inhibition	98-100
Chapter 5: Evaluation of for <i>Musa Paradisica</i> Peels for Corrosion Inhibition	101-131
5.1 Characterization of <i>Musa Paradisica</i> Peel Extracts	101-106
5.2 Weight Loss Measurements	106-116
5.2.1 Adsorption Isotherm	109-110
5.2.2 Effect of Immersion Time	110-111

5.2.3 Effect of Acid Concentration on Inhibition Potential of Extracts	111-113
5.2.4 Effect of Temperature on Corrosion Inhibition	113-116
5.3 Tafel Potentiodynamic Polarization Study	116-120
5.4 Electrochemical Impedance Spectroscopy	120-126
5.5 Surface Analysis	126-129
5.6 Mechanism of Corrosion Inhibition	130-131
Chapter 6: Summary	132-135
6.1 Suggestion for Future Works	135
References	136-147
