

ACKNOWLEDGEMENT

It is my privilege to express my heartfelt indebtedness and deep sense of gratitude to my supervisor, Professor B. K. Shrivastva, Department of Mining Engineering, IIT (BHU), Varanasi, for introducing me to the research area, constant guidance (even while out of station), steady support, supervision and insight throughout the research period of our association. His valuable and constructive suggestions have gone a long way towards accomplishing this work.

I express my sincere thanks to my co-supervisor Professor S. K. Sharma, Department of Mining Engineering, IIT (BHU), Varanasi, for constant guidance, valuable suggestions, cooperation, motivation and imparting positive attitude at all the times.

The support, cooperation and encouragement rendered from the departmental end by Head, Professors and my colleagues, academic and non-teaching staff of the Department of Mining Engineering, IIT (BHU), Varanasi, is great fully acknowledged.

The support and immense cooperation rendered by different coalfields in the India especially Northern Coalfield Limited (NCL), Singrauli, M. P., India, specifically Mr. A. D. Mathur (Director T/O) and the administrative group of NCL is recorded with tremendous appreciation for their permission and facilities and to develop the understanding of the research area, without which this study could not have been possible.

I would like to offer sincere thanks to my wife Sangeeta and my daughter Gyanda for their endless support and patience, even in tough and bad conditions during the whole study. Also, I wish to extend my gratitude and respect to my parents, sisters and my relatives for their unbelievable support and positive motivation throughout my research work.

Finally, I would thank Kashi Vishwnath (Lord Shive), the Almighty God for answering my prayers, giving me the strength and showing the right path to succeed at every stage of my research and life.

February, 2016
