

## List of figures

Figure No.	Figure Caption	Page No.
<b>Figure 1.1</b>	Typical cross sections of through and deck type bridges	2
<b>Figure 2.1</b>	Failure causes and modes of failure leading to collapse	11
<b>Figure 2.2</b>	Simply supported composite truss bridge of span 36m	17
<b>Figure 2.3</b>	General view of the Lully Viaduct Composite Bridge	19
<b>Figure 2.4</b>	Longitudinal view and standard cross section	19
<b>Figure 2.5</b>	K-shaped joint geometry with shear studs	20
<b>Figure 2.6</b>	Proposed bridge at Bogibeel with 125m span	20
<b>Figure 2.7</b>	View of the Ulla river viaduct	22
<b>Figure 2.8</b>	Sarutagawa Bridge	23
<b>Figure 2.9</b>	Composite construction with prestressing of upper and lower slabs	23
<b>Figure 2.10</b>	Rigid connectors	27
<b>Figure 2.11</b>	Flexible connectors	28
<b>Figure 2.12</b>	Anchorage shear connectors	28
<b>Figure 2.13</b>	Headed shear connectors	29
<b>Figure 3.1</b>	View of the collapsed I-35W bridge	34
<b>Figure 3.2</b>	Failure of gusset plate at U10	35
<b>Figure 3.3</b>	View of Chauras Bridge after failure	36
<b>Figure 3.4</b>	Arrangement of Chauras Bridge	38
<b>Figure 3.5</b>	Stress diagram under loading at the time of collapse	39
<b>Figure 3.6</b>	Joints U13, U14 and buckled member U13U14	40

<b>Figure 3.7</b>	Member U13U14	41
<b>Figure 3.8</b>	Built up box section	43
<b>Figure 3.9</b>	Half elevation of Garudchatti bridge	45
<b>Figure 3.10</b>	Support reactions in service condition	46
<b>Figure 3.11</b>	Arrangement of anchorage blocks at abutment locations	46
<b>Figure 3.12</b>	Strengthening details	49
<b>Figure 3.13</b>	Member stresses in the bridge	51
<b>Figure 3.14</b>	Discontinuity of diagonal members at M-joints	52
<b>Figure 3.15</b>	Loading arrangement	52
<b>Figure 3.16</b>	Arrangement for measurement of deflection	53
<b>Figure 3.17</b>	Garudchatti bridge over Alaknanda river, India	53
<b>Figure 3.18</b>	Stress-Strain curves of compression or tension member for mild steel of grades E250 and E410	57
<b>Figure 3.19</b>	Intact gusset plates at joints U13 and U14	58
<b>Figure 3.20</b>	Endurance limits for E250 and E410 grade steel	59
<b>Figure 3.21</b>	Arrangement of vehicles for fully loaded deck condition	61
<b>Figure 4.1</b>	Composite deck type steel truss bridge	69
<b>Figure 4.2</b>	Strain diagram	71
<b>Figure 4.3</b>	Cross section of composite joist	75
<b>Figure 4.4</b>	Force equilibrium of composite truss	77
<b>Figure 4.5</b>	Composite truss bridge model for plastic failure	82
<b>Figure 4.6</b>	Force equilibrium at plastic collapse	83
<b>Figure 4.7</b>	Elevation showing half span of 90m truss bridge	85

<b>Figure 4.8</b>	STAAD model for composite truss bridge	86
<b>Figure 4.9</b>	Cross section of 90m span truss bridge	86
<b>Figure 4.10</b>	90m span composite truss bridge details	92
<b>Figure 4.11</b>	Deck slab stress under LL	93
<b>Figure 4.12</b>	90m span composite truss bridge for 1.5x(DL+LL) case	94
<b>Figure 4.13</b>	Composite truss bridge (90m span) model for plastic failure	96
<b>Figure 4.14</b>	Force equilibrium at plastic collapse	97
<b>Figure 5.1</b>	Non-composite and composite beams	102
<b>Figure 5.2</b>	Shear flow in shear connectors	103
<b>Figure 5.3</b>	Densification of shear connectors	104
<b>Figure 5.4</b>	Details of 42.0m span bridge	109
<b>Figure 5.5</b>	STAAD model with plate elements	115
<b>Figure 5.6</b>	Variation of longitudinal shear along the bridge span	118
<b>Figure 5.7</b>	Deck slab stress	118
<b>Figure 6.1</b>	30.0m span Through type truss bridge	125
<b>Figure 6.2</b>	30.0m span Deck type truss bridge	126
<b>Figure 6.3</b>	30.0m span Semi type truss bridge	127
<b>Figure 6.4</b>	30.0m span Under slung truss bridge	128
<b>Figure 6.5</b>	90.0m span Through type truss bridge	129
<b>Figure 6.6</b>	90.0m span Deck type truss bridge	130
<b>Figure 6.7</b>	90.0m span Semi deck type truss bridge	130
<b>Figure 6.8</b>	90.0m span Under slung truss bridge	131
<b>Figure 6.9</b>	Abutment details for 90.0m deck type bridge.	140

<b>Figure 6.10</b>	Valley profile and 30.0m span through type bridge	141
<b>Figure 6.11</b>	Valley profile and 30.0m span semi deck type bridge	142
<b>Figure 6.12</b>	90.0m span semi deck composite truss bridge	145
