

## List of Tables

Table No.	Table Caption	Page No.
<b>Table 3.1</b>	Member forces as per STAAD analysis	39
<b>Table 3.2</b>	Cross sectional area of critical members and member stresses in the bridge	46
<b>Table 3.3</b>	Strengthening details of critical members	47
<b>Table 3.4</b>	Weight of loaded trucks	54
<b>Table 3.5</b>	Summary of deflections	55
<b>Table 4.1</b>	Primary Loads	78
<b>Table 4.2</b>	Design of non-composite bridge under service load and at overload	90
<b>Table 4.3</b>	Design results at limit state of strength	94
<b>Table 4.4</b>	Comparison of deflection	99
<b>Table 4.5</b>	Comparison of steel off take	99
<b>Table 5.1</b>	Design results for shear studs	114
<b>Table 5.2</b>	Longitudinal shear along the bridge span	116
<b>Table 6.1</b>	Lateral and vertical deflections and steel off take for service condition for 30.0m span bridge	133
<b>Table 6.2</b>	Lateral and vertical deflections and steel off take for overload condition	135
<b>Table 6.3</b>	Lateral and vertical deflections and steel off for service condition for 90.0m span bridge	136
<b>Table 6.4</b>	Lateral and vertical deflections and steel off take for	137

	overload condition	
<b>Table 6.5</b>	Properties of structural steel	143
<b>Table 6.6</b>	Deflection comparison of 90.0m span bridge designed using E250 and E410 steel	147
<b>Table 6.7</b>	Maximum vertical deflection, steel off take and cost of structural steel for overload condition of 2.25(DL+LL).	148
