

# List of Schemes

---

---

	<b>Page No.</b>
<b>Scheme 1.1</b> Schematic representation of polymerization of PVC	<b>6</b>
<b>Scheme 1.2</b> Schematic representation of the mechanism involves in chemical modification of PVC	<b>14</b>
<b>Scheme 1.3</b> Schematic representation of possible reaction site in PVC	<b>15</b>
<b>Scheme 1.4</b> Schematic representation of various type of nanofiller with nanoscale dimension	<b>17</b>
<b>Scheme 1.5</b> Schematic representation of different states dispersion of organoclay in polymers	<b>24</b>
<b>Scheme 2.1</b> Schematic representation of chemical modification of PVC	<b>48</b>
<b>Scheme 2.2</b> A photograph shows reaction setup of chemical modification of PVC with different nucleophiles and their film preparation technique. (a) Reaction setup; (b) Functionalized PVC; (c) Film preparation of functionalized PVC	<b>49</b>
<b>Scheme 2.3</b> A photograph of LDH reaction setup in Laboratory; (a) Starting phase of experimental setup of LDH; (b) after continuous stirring for overnight; (c) before the centrifugation of LDH	<b>51</b>
<b>Scheme 2.4</b> Schematic flow chart representation of functionalization of PVC and their different weight percentage polymer composites with LDH	<b>52</b>
