

List of Tabela

		Page No.
Table 1.1	Required properties in polymer for use as implant	3
Table 1.2	Different type of polymers used in medical field	4
Table 1.3	Chemical formal of 2:1 phyllosilicates (layered silicates)	20
Table 2.1	Different types of process can be studied by TGA	61
Table 4.1	Mechanical properties of PVC and different functionalized PVC	101
Table 4.2	Mechanical properties of PVC and its nanocomposite	102
Table 4.3	Mechanical properties of PVC –TS and its different wt% nanocomposites	102
Table 4.4	Mechanical properties of PVC –TU and its different wt% nanocomposites	104
Table 4.5	Mechanical properties of PVC –S and its different wt% nanocomposites	104
Table 5.1	Weight (mg) of clot formation on the surface of PVC and its different composites with LDH	111
Table 5.2	Weight (mg) of clot formation on the surface of PVC-TS and its different composite with LDH	111
Table 5.3	Weight (mg) of clot formation on the surface of PVC-TU and its different composites with LDH	111
Table 5.4	Weight (mg) of clot formation on the surface of PVC-S and its different composite with LDH	111
