List of Tables	XI–XII
Preface	XIII–XVII
CHAPTER 1	
INTRODUCTION AND LITERATURE REVIEW	1–46
1.1 Energy Scenario in India	1
1.2 Materials for Fast Breeder Reactor	4
<i>1.2.1 Fuel Assembly</i>	5
<i>1.2.2 Core Materials</i>	7
1.3 Development of Cr–Mo Steels: Materials for Steam Generator	10
1.3.1 Steam Generator of FBR	10
<i>1.3.2 Development of Cr–Mo Steels</i>	13
<i>1.3.3 Material Properties Required for SG</i>	14
<i>1.3.4 Cr–Mo Steels for SG</i>	15
1.4 Physical Metallurgy of Cr–Mo Steels	19
<i>1.4.1 Effect of Alloying Elements and Microstructure</i>	20
1.5 Low Cycle Fatigue in Service of SG	22
1.6 Dynamic Strain Ageing	23
1.7 Dynamic Strain Ageing in Cr–Mo Steels	26
<i>1.7.1 Dynamic Strain Ageing in Cr–Mo Steels under Monotonic Loading</i>	26
<i>1.7.2 Serrated Plastic Flow Behavior in Modified 9Cr–1Mo Steels</i>	27

1.8	Microstructure Stability	31
1.9	Low Cycle Fatigue Behavior of Ferritic/Martensitic Steels	33
1.9.1	<i>Cyclic Stress Response</i>	33
1.9.2	<i>Cyclic Softening in Modified 9Cr–1Mo Steel Associated with Back Stress</i>	34
1.9.3	<i>Effect of Environment on Fatigue life</i>	35
1.9.3.1	Liquid sodium	35
1.9.3.2	Vacuum	37
1.9.3.3	Liquid Lead–Bismuth	37
1.9.4	<i>Effect of Thermal Ageing on LCF</i>	38
1.9.5	<i>Effect of Processing on LCF</i>	39
1.9.6	<i>Masing and Non–Masing Behavior in Modified 9Cr–1Mo Steels</i>	40
1.9.7	<i>Dynamic Strain Ageing in Modified 9Cr–Mo Steel under Cyclic Loading</i>	40
1.9.8	<i>Creep Fatigue Interaction</i>	42
1.9.9	<i>Finite Element Simulation Studies</i>	43
1.10	<i>Scope of Investigation</i>	45
1.11	Objectives of the Present Study	45

CHAPTER 2

MATERIAL AND METHODS	47–55	
2.1	Introduction	47
2.2	Material	47
2.3	Microstructural Characterization	48
2.4	Mechanical Testing	49
2.4.1	<i>Tensile Tests</i>	49
2.4.2	<i>Low Cycle Fatigue Test</i>	52
2.4.3	<i>Internal Friction Test</i>	54

2.5	Microstructural Characterization of Tensile and LCF Tested Specimens	55
CHAPTER 3		
DYNAMIC STRAIN AGEING, DEFORMATION, AND FRACTURE BEHAVIOR		56–80
3.1	Introduction	56
3.2	Microstructure	56
3.3	Tensile Properties	58
3.3.1	<i>Engineering Stress Strain Curves</i>	58
3.3.2	<i>Variation of Yield Strength and Ultimate Tensile Strength with Temperature</i>	59
3.3.3	<i>Variation of Elongation (%) with Temperature</i>	60
3.3.4	<i>Strain Hardening Exponent</i>	61
3.3.5	<i>Strain Rate Sensitivity</i>	62
3.3.6	<i>Activation Energy</i>	63
3.4	Microhardness	64
3.5	Deformation Behavior	65
3.6	Fracture Behavior	69
3.7	Internal Friction	71
3.8	Discussion	73
3.8.1	Dynamic Strain Ageing	73
3.8.1.1	Tensile Behavior	73
3.8.1.2	Internal Friction	76
3.8.2	<i>Deformation Behavior</i>	78
3.8.3	<i>Fracture Behavior</i>	79
3.9	Conclusions	80

CHAPTER 4

ROSETTE TENSILE FRACTURE 81–104

4.1	Introduction	81
4.2	Effect of Temperature on Rosette Fracture	81
4.3	Effect of Specimen Orientation	86
4.4	Effect of Microstructure	88
4.5	Effect of Strain Rate	91
4.6	Effect of Specimen Size	92
4.7	Discussion	93
4.8	Conclusions	104

CHAPTER 5

LOW CYCLE FATIGUE BEHAVIOR AT RT 105–130

5.1	Introduction	105
5.2	Cyclic Stress Response	105
5.3	Strain-Life Relationship	107
5.4	Strain Energy–Life Relationship	109
5.5	Masing and Non–Masing Behavior	110
5.6	Dislocation Substructure	112
5.7	Fracture Behavior	115
5.8	Discussion	120
	<i>5.8.1 Cyclic Stress Response and Dislocation Substructure</i>	<i>120</i>
	<i>5.8.2 Role of Friction and Back Stress</i>	<i>122</i>
	<i>5.8.3 Analysis of Masing and Non–Masing Behavior</i>	<i>126</i>
	<i>5.8.4 Fracture Behavior</i>	<i>127</i>
5.9	Conclusions	129

CHAPTER 6		
LOW CYCLE FATIGUE BEHAVIOR OF MODIFIED		131–146
9Cr–1Mo STEEL AT 600 °C		
6.1	Introduction	131
6.2	Cyclic Stress Response	131
6.3	Dependence of Fatigue Life on Plastic Strain Amplitude	133
6.4	Masing and Non–Masing Behavior	134
6.5	Deformation Behavior	135
6.6	Fracture Behavior	137
6.7	Discussion	141
6.8	Conclusions	145
CHAPTER 7		147–166
LOW CYCLE FATIGUE BEHAVIOR OF MODIFIED		
9Cr–1Mo STEEL AT 600 °C		
7.1	Introduction	147
7.2	Cyclic Stress Response	147
7.3	Dependence of Fatigue Life on Plastic Strain Amplitude	149
7.4	Deformation Behavior	150
7.5	Fracture Behavior	154
7.6	Discussion	159
7.6	Conclusions	165
CHAPTER 8		
SUMMARY AND FUTURE WORK		167–169
8.1	Introduction	167
8.2	Summary	167
	<i>8.2.1 Tensile Behavior</i>	<i>167</i>
	<i>8.2.2 Low Cycle Fatigue Behavior</i>	<i>168</i>
8.3	Suggestions for Future Work	169
