

LIST OF TABLES

Table 2.1: CT images at $t=0.1$ & $t=0.6$ seconds47

Table 2.2: Working database through all anatomical planes from $t=0.1$ to 0.6 seconds.....48

Table 3.1: All three anatomical viewpoints for all the 10 subjects at time $t=0.1$ & 0.6 seconds..... 62

Table 3.2: Target registration error comparison through all APs for all subjects (*proposed method) 72

Table 4.1: Working database through all anatomical planes from $t=0.1$ to 0.6 seconds.....86

Table 4.2: Average translations (in pixels) for all 10 test subjects through Axial AP 99

Table 4.3: Average translations (in pixels) for all 10 test subjects through Coronal AP 100

Table 4.4: Average translations (in pixels) for all test 10 subjects through Sagittal AP 100

Table 5.1: All three anatomical viewpoints for all the 10 subjects at time $t=0.1$ & 0.6 seconds 114

Table 5.2: SNR, pSNR, m-SSIM, NCC for all subjects under study from all APs; S-T is the source-target pair, R-T is registered-target pair for proposed method 122
