

LIST OF FIGURES

Figure 3.1. Study area.....	34
Figure 3.2. Movement pattern of Ganga along the different Ghats in study area	36
Figure 3.3. Showing all 14 cross-section on River Ganga	38
Figure 3.4. Showing the working methodology of ADCP	42
Figure 3.5. Showing the Autolevel	45
Figure 3.6 a. Screen shot for starting the measurement in software.....	46
Figure 3.6 b. Screen shot for reprocessing the transect	47
Figure 3.6 c. Screen shot for capture the image of required data	47
Figure 3.6 d. Screen shot for saving the data to desired location	47
Figure 3.7. Distance from concave side vs. depth curve at Profile M-1.....	49
Figure 3.8. Distance from concave side vs. depth curve at Profile M-2.....	50
Figure 3.9. Distance from concave side vs. depth curve at Profile M-3.....	50
Figure 3.10. Distance from concave side vs. depth curve at Profile M-4.....	50
Figure 3.11. Distance from concave side vs. depth curve at Profile M-5.....	51
Figure 3.12. Distance from concave side vs. depth curve at Profile M-6.....	51
Figure 3.13. Distance from concave side vs. depth curve at Profile M-7.....	51
Figure 3.14. Distance from concave side vs. depth curve at Profile M-8.....	52

List of Figures

Figure 3.15. Distance from concave side vs. depth curve at Profile M-9.....	52
Figure 3.16. Distance from concave side vs. depth curve at Profile M-10.....	52
Figure 3.17. Distance from concave side vs. depth curve at Profile M-11.....	53
Figure 3.18. Distance from concave side vs. depth curve at Profile M-12.....	53
Figure 3.19. Distance from concave side vs. depth curve at Profile M-13.....	53
Figure 3.20. Distance from concave side vs. depth curve at Profile M-14.....	54
Figure 4.1 a. Showing the processing of the transect	57
Figure 4.1 b. Showing the ASCII output in configuration option	58
Figure 4.1 c. Showing the creating ASCII output	58
Figure 4.1 d. Showing the selection of variables.....	59
Figure 4.1 e. Showing the saving option	59
Figure 4.1 f. Showing the saving location to computer	60
Figure 4.1 g. Showing the reprocess the transect again.....	60
Figure 4.1 h. Showing the text file in Win River-II window.....	61
Figure 4.2. Showing the calibrated cross-sections.....	76
Figure 4.3 a. Width variation with cross-section, b. Depth variation with cross-section c. Velocity variation with cross-section	81
Figure 5.1 a. Arithmetic plot between discharge and gauge height After (Subramanya, 2009).....	86
Figure 5.1 b. Logarithmic plot between discharge and gauge height After (Subramanya, 2009).....	87
Figure 5.2. Graphical method for estimating the Zero discharge constant ‘a’	89
Figure 5.3. Arithmetic plot of Rating curve for River Ganga at M-1 section	94

Figure 5.4. Logarithmic plot of Rating curve for River Ganga at M-1 section ..94

Figure 6.1. Grain size distribution at left bank (Black line), middle (red line) and Right bank (Blue line) of the River Ganga at M-1 cross-section 107

Figure 6.2. Grain size distribution at left bank (Black line), middle (red line) and Right bank (Blue line) of the River Ganga at M-2 cross-section 108

Figure 6.3. Grain size distribution at left bank (Black line), middle (red line) and Right bank (Blue line) of the River Ganga at M-3 cross-section 108

Figure 6.4. Grain size distribution at left bank (Black line), middle (red line) and Right bank (Blue line) of the River Ganga at M-4 cross-section 109

Figure 6.5. Grain size distribution at left bank (Black line), middle (red line) and Right bank (Blue line) of the River Ganga at M-5 cross-section 109

Figure 6.6. Grain size distribution at left bank (Black line), middle (red line) and Right bank (Blue line) of the River Ganga at M-6 cross-section 110

Figure 6.7. Grain size distribution at left bank (Black line), middle (red line) and Right bank (Blue line) of the River Ganga at M-7 cross-section 110

Figure 6.8. Grain size distribution at left bank (Black line), middle (red line) and Right bank (Blue line) of the River Ganga at M-8 cross-section 111

Figure 6.9. Grain size distribution at left bank (Black line), middle (red line) and Right bank (Blue line) of the River Ganga at M-9 cross-section	111
Figure 6.10. Grain size distribution at left bank (Black line), middle (red line) and Right bank (Blue line) of the River Ganga at M-10 cross-section	112
Figure 6.11. Grain size distribution at left bank (Black line), middle (red line) and Right bank (Blue line) of the River Ganga at M-11 cross-section	112
Figure 6.12. Grain size distribution at left bank (Black line), middle (red line) and Right bank (Blue line) of the River Ganga at M-12 cross-section	113
Figure 6.13. Grain size distribution at left bank (Black line), middle (red line) and Right bank (Blue line) of the River Ganga at M-13 cross-section	113
Figure 6.14. Grain size distribution at left bank (Black line), middle (red line) and Right bank (Blue line) of the River Ganga at M-14 cross-section	114
Figure 7.1. Schematic Diagram for Sinuosity Calculation	118
Figure 7.2. Typical Section of River Ganga at M-14	121
Figure 7.3. Typical Section of River Ganga at M-13	122
Figure 7.4. Typical Section of River Ganga at M-12	123
Figure 7.5. Typical Section of River Ganga at M-11	124
Figure 7.6. Typical Section of River Ganga at M-10	125
Figure 7.7. Typical Section of River Ganga at M-9	126

List of Figures

Figure 7.8. Typical Section of River Ganga at M-8 127

Figure 7.9. Typical Section of River Ganga at M-7 128

Figure 7.10. Typical Section of River Ganga at M-6 129

Figure 7.11. Typical Section of River Ganga at M-5 130

Figure 7.12. Typical Section of River Ganga at M-4 132

Figure 7.13. Typical Section of River Ganga at M-3 133

Figure 7.14. Typical Section of River Ganga at M-2 134
