

# CONTENTS

	<b>Pages</b>
<b>List of Figures</b> .....	v
<b>List of Tables</b> .....	ix
<b>Preface</b> .....	x
<b>Chapter 1: Introduction</b> .....	<b>1-18</b>
1.1 Review of Wavelets.....	1
1.2 The Legendre's Wavelets.....	3
1.3 The Legendre's Scaling Functions.....	4
1.4 The Bernstein Polynomials.....	4
1.5 Abel Integral Equations.....	6
1.6 Generalized Abel Equation.....	10
1.7 Review of Operational Matrices.....	13
1.8 Fractional Calculus.....	17
<b>Chapter 2: Fractional Order Operational Matrix Methods for Fractional Singular Integro-Differential Equation</b> .....	<b>19-45</b>
2.1 Introduction .....	19
2.2 Some Basic Preliminaries of Legendre Scaling Function.....	20
2.3 Operational Matrices for Fractional Integration and Differentiation...23	
2.4 Error Analysis.....	27

2.5	Methods of Solution .....	30
2.6	Numerical Results .....	36
2.7	Error Table.....	41
2.8	Applications .....	42
2.8.1	Equation for Magnetic Field Induction in Dielectric Media.....	42
2.8.2	The Fractional Langevin Equation (dynamics in one dimension for a Brownian particle).....	44
2.9	Conclusions .....	45

**Chapter 3: Numerical Methods for Solving System of  
Generalized Abel Integral Equations by Operational  
Matrices.....46-58**

3.1	Introduction.....	46
3.2	Numerical Algorithm.....	48
3.3	Convergence Analysis .....	50
3.4	Numerical Results.....	52
3.5	Conclusions.....	58

**Chapter 4: Mess-Less Numerical Scheme Based on Matrices for  
Integro-Differential Equation .....59-75**

4.1	Introduction.....	59
4.2	Operational Matrices.....	61

4.2.1	Bernstein's Polynomials and Operational Matrices.....	61
4.2.2	Legendre Wavelets Polynomials and Operational Matrices.....	62
4.3	Mess-Less Scheme Derivation.....	64
4.4	Convergence Analysis of Legendre Wavelets and Bernstein Polynomials.....	66
4.5	Numerical Examples .....	70
4.6	Conclusions .....	75

**Chapter 5: Stable Numerical Solutions of Fractional Partial  
Differential Equations Using Legendre Scaling Functions**

<b>Operational Matrix .....</b>	<b>76-101</b>	
5.1	Introduction.....	76
5.2	Preliminaries.....	78
5.3	Operational Matrix.....	81
5.4	Method of Solution.....	82
5.5	Error Analysis.....	83
5.6	Stability Analysis.....	87
5.7	Numerical Results.....	88
5.8	Conclusions.....	101

<b>Chapter 6: An Approximate Method for Solving Nonlinear</b>	
<b>System of Fractional Differential Equations.....</b>	<b>102-118</b>
6.1 Introduction.....	102
6.2 Bernstein Operational Matrix of Fractional Differentiation.....	104
6.3 Outline of the Method.....	108
6.4 Results and Discussions.....	110
6.4.1 Application to Nonlinear System of Fractional Differential Equations	
.....	110
6.4.2 Application to Fractional Stiff System of Nonlinear Differential	
Equations .....	115
6.5 Conclusions.....	118
<b>References.....</b>	<b>119-137</b>
<b>List of Publications</b>	
<b>Curriculum Vitae</b>
