<b>FIGURE</b>	<b>Page No.</b>
<b>Chapter 1 Introduction and Literature Review</b>	<b>1</b>
1.1 (a) Market shares of capacitors, resistors, and inductors (b) a schematic image of embedded passive substrate, the arrow showing position of passive components.	2
1.2 Outlook for applications of the high-k polymer composites.	3
1.3 (a) Charge separation in a parallel plate capacitor (b) dielectric capacitor (c) Effect of electric field on the dielectric	6
1.4 Schematic of (a) electronic polarization, (b) ionic polarization, (c) orientational polarization, (d) space charge polarization.	9
1.5 Venn diagram showing the relationship between ferroelectrics, pyroelectrics and piezoelectrics	10
1.6 The chemical units of VDF, TrFE and CTFE.	13
1.7 $\text{CaCu}_3\text{Ti}_4\text{O}_{12}$ : A strongly distorted, A-site ordered double-perovskite structure	15
1.8 Schemes showing the formation of a percolation-like clusters structure with an increase in the concentration of conducting fillers in the composite. (a) randomly dispersed grain structure; (b) uniformly dispersed grain structure; (c) aggregated grain structure; (d) percolation-like clusters structure.	25
1.9 Ten connectivity patterns for two-phase composites	28
1.10 Composite with 0-3 configuration pattern.	29

<b>Chapter 3</b>	<b>Experimental work</b>	41
3.1	Twin-screw extruder (Hakke Mini Lab)	42
3.2	Rigaku Desktop Miniflex II X-Ray diffractometer	43
3.3	INSPECT S 50 FP 2017/12 Scanning Electron Microscope	44
3.4	TGA/DTA Analyser, Perkin-Elmer, USA	45
3.5	(a) Tensile test specimen (b) Instron 3369 tensile machine	46
3.6	Novocontrol (Alpha-A High Performance Analyzer ZG4)	46
<b>Chapter 4</b>	<b>Dielectric and Mechanical Properties of CaCu<sub>3</sub>Ti<sub>4</sub>O<sub>12</sub> / PVDF Composites</b>	47
4.1	X-ray diffraction patterns for CCTO, pure PVDF, PVDF-10CCTO, PVDF-20CCTO and PVDF-50CCTO composites.	48
4.2	Scanning electron micrographs of PVDF, PVDF-10CCTO, PVDF-20CCTO and PVDF-50CCTO composites	49
4.3	TGA of pure PVDF, PVDF-10CCTO, PVDF-20CCTO and PVDF-50CCTO composites.	50
4.4	(a) Stress-strain curves for the pure PVDF, PVDF-10ZrC, PVDF-20ZrC and PVDF-50ZrC composites, (b) Young's modulus of PVDF and the composites and (c) Elongation at the breaking point of PVDF and composites.	51-52
4.5	Frequency dependence of dielectric permittivity and $\tan \delta$ of CCTO (a), PVDF (b and c), PVDF and all the composites at 40 <sup>0</sup> C (d and e), PVDF-10CCTO (f and g), PVDF-20CCTO (h and i) and PVDF-50CCTO (j and k).	54-59
4.6	M' vs log f plots of PVDF and composites at 40 <sup>0</sup> C (a), M'' vs log f plots of PVDF (b), PVDF and	61-63

	PVDF-CCTO composites at 40 <sup>0</sup> C (c), PVDF-10CCTO (d), PVDF-20CCTO (e) and PVDF-50CCTO (f).	
4.7	Log $\tau$ vs 1000/T curves for CCTO, PVDF, PVDF-10CCTO, PVDF-20CCTO and PVDF-50CCTO.	65
4.8	Variation of effective dielectric constant ( $\epsilon_{\text{eff}}$ ) measured at 100 Hz and 40 <sup>0</sup> C for PVDF-CCTO composites based on various models.	68
4.9	Dielectric loss in the frequency domain and spectrum was deconvoluted from H-N fits for PVDF-50CCTO composites at different temperatures.	70
<b>Chapter 5</b>	<b>Dielectric and Mechanical properties of La doped CaCu<sub>3</sub>Ti<sub>4</sub>O<sub>12</sub>/ PVDF Composites</b>	72
5.1	X-ray diffraction patterns for LaCCTO, pure PVDF, PVDF-10LaC, PVDF-20LaC and PVDF-50LaC composites.	73
5.2	Scanning electron micrographs of PVDF, PVDF-10LaC, PVDF-20LaC and PVDF-50LaC composites.	74
5.3	TGA of pure PVDF, PVDF-10LaC, PVDF-20LaC and PVDF-50LaC composites.	75
5.4	(a) Stress-strain curves for pure PVDF, PVDF-10LaC, PVDF-20LaC and PVDF-50LaC composites, (b) Young's modulus of PVDF and the composites and (c) Elongation at breaking point	76-77
5.5	Frequency dependence of dielectric permittivity and tan $\delta$ of CCTO and LaCCTO (a and b), PVDF (c and d), PVDF and all the composites at 40 <sup>0</sup> C (e and f), PVDF-10LaC (g and h), PVDF-20LaC (i and j) and PVDF-50LaC (k and l).	79-84
5.6	M' vs log f plots of PVDF and composites at 40 <sup>0</sup> C (a), M'' vs log f plots of PVDF (b), PVDF and	87-89

	PVDF-LaC composites at 40 <sup>0</sup> C (c), PVDF-10LaC (d), PVDF-20LaC (e) and PVDF-50LaC (f).	
5.7	Log $\tau$ vs 1000/T curves for LaCCTO, PVDF, PVDF-10LaC, PVDF-20LaC and PVDF-50LaC.	90
5.8	Variation of effective dielectric constant ( $\epsilon_{\text{eff}}$ ) measured at 100 Hz and 40 <sup>0</sup> C for PVDF-LaC composites based on various models.	93
5.9	Dielectric loss in the frequency domain and spectrum was deconvoluted from H-N fits for PVDF-50LaC composites at different temperatures.	95
<b>Chapter 6</b>	<b>Dielectric and Mechanical properties of Nb doped <math>\text{CaCu}_3\text{Ti}_4\text{O}_{12}</math> / Poly(vinylidene fluoride) composites</b>	97
6.1	X-ray diffraction patterns for NbCCTO, pure PVDF, PVDF-10NbC, PVDF-20NbC and PVDF-50NbC composites.	98
6.2	Scanning electron micrographs of PVDF, PVDF-10NbC, PVDF- 20NbC and PVDF-50NbC composites.	99
6.3	TGA of pure PVDF, PVDF-10NbC, PVDF-20NbC and PVDF-50NbC composites.	100
6.4	(a) Stress-strain curves for pure PVDF, PVDF-10NbC, PVDF- 20NbC and PVDF-50NbC composites, (b) Young's modulus of PVDF and composites and (c) Elongation at breaking point of PVDF and composites.	101-102
6.5	Frequency dependence of dielectric permittivity and $\tan \delta$ of NbCCTO (a and b), PVDF (c and d), PVDF and all the composites at 40 <sup>0</sup> C (e and f), PVDF-10NbC (g and h), PVDF-20NbC (i	104-109

	and j) and PVDF-50NbC (k and l).	
6.6	M' vs log f plots of PVDF and composites at 40 <sup>0</sup> C (a), M'' vs log f plots of PVDF (b), PVDF and PVDF-NbC composites at 40 <sup>0</sup> C (c), PVDF-10NbC (d), PVDF-20NbC (e) and PVDF-50NbC (f).	111-114
6.7	Log $\tau$ vs 1000/T curves for NbCCTO, PVDF, PVDF-10NbC, PVDF-20NbC and PVDF-50NbC.	116
6.8	Variation of effective dielectric constant ( $\epsilon_{\text{eff}}$ ) measured at 100 Hz and 40 <sup>0</sup> C for PVDF-NbC composites based on various models.	118
6.9	Dielectric loss in the frequency domain and spectrum was deconvoluted from H-N fits for PVDF-50NbC.	120
<b>Chapter 7</b>	<b>Dielectric and Mechanical properties of Sn doped CaCu<sub>3</sub>Ti<sub>4</sub>O<sub>12</sub>/ PVDF Composites</b>	122
7.1	X-ray diffraction patterns for SnCCTO, pure PVDF, PVDF-10SnC, PVDF-20SnC and PVDF-50SnC composites	123
7.2	Scanning electron micrographs of PVDF, PVDF-10SnC, PVDF-20SnC and PVDF-50SnC composites.	124
7.3	TGA of pure PVDF, PVDF-10SnC, PVDF-20SnC and PVDF-50SnC composites.	125
7.4	(a) Stress-strain curves for pure PVDF, PVDF-10SnC, PVDF-20SnC and PVDF-50SnC composites, (b) Young's modulus of PVDF and composites and (c) Elongation at breaking point of PVDF and composites.	126-127

7.5	Frequency dependence of dielectric permittivity and $\tan \delta$ of SnCCTO (a and b), PVDF (c and d), PVDF and all the composites at 40 <sup>0</sup> C (e and f), PVDF-10SnC (g and h), PVDF-20SnC (i and j) and PVDF-50SnC (k and l).	129-135
7.6	M' vs log f plots of PVDF and composites at 40 <sup>0</sup> C (a), M'' vs log f plots of PVDF (b), PVDF and PVDF-SnC composites at 40 <sup>0</sup> C (c), PVDF-10SnC (d), PVDF-20SnC (e) and PVDF-50SnC (f).	137-140
7.7	Log $\tau$ vs 1000/T curves for SnCCTO, PVDF, PVDF-10SnC, PVDF-20SnC and PVDF-50SnC.	141
7.8	Variation of effective dielectric constant ( $\epsilon_{\text{eff}}$ ) measured at 100 Hz and 40 <sup>0</sup> C for PVDF-SnC composites based on various models.	144
7.9	Dielectric loss in the frequency domain and spectrum was deconvoluted from H-N fits for PVDF-50SnC.	146
<b>Chapter 8</b>	<b>Dielectric and Mechanical properties of Zr doped CaCu<sub>3</sub>Ti<sub>4</sub>O<sub>12</sub>/ PVDF Composites</b>	148
8.1	X-ray diffraction patterns for CCTZO, pure PVDF, PVDF-10ZrC, PVDF-20ZrC and PVDF-50ZrC composites	149
8.2	Scanning electron micrographs of PVDF, PVDF-10ZrC, PVDF -20ZrC and PVDF-50ZrC composites.	150
8.3	TGA of pure PVDF, PVDF-10ZrC, PVDF-20ZrC and PVDF-50ZrC composites.	151
8.4	(a) Stress-strain curves for pure PVDF, PVDF-10ZrC, PVDF-20ZrC and PVDF-50ZrC composites, (b) Young's modulus of PVDF and composites and (c) Elongation at breaking point	152-153

	of PVDF and composites.	
8.5	Frequency dependence of dielectric permittivity and $\tan \delta$ of CCTZO (a and b), PVDF (c and d), PVDF and all the composites at 40 <sup>0</sup> C (e and f), PVDF-10ZrC (g and h), PVDF-20ZrC (i and j) and PVDF-50ZrC (k and l).	155-156
8.6	M' vs log f plots of PVDF and composites at 40 <sup>0</sup> C (a), M'' vs log f plots of PVDF (b), PVDF and PVDF-ZrC composites at 40 <sup>0</sup> C (c), PVDF-10ZrC (d), PVDF-20ZrC (e) and PVDF-50ZrC (f).	162-164
8.7	Log $\tau$ vs 1000/T curves for CCTZO, PVDF, PVDF-10ZrC, PVDF-20ZrC and PVDF-50ZrC.	167
8.8	Variation of effective dielectric permittivity ( $\epsilon_{\text{eff}}$ ) measured at 100 Hz and 40 <sup>0</sup> C for PVDF-ZrC composites based on various models.	169
8.9	Dielectric loss in the frequency domain and spectrum was deconvoluted from H-N fits for PVDF-50ZrC.	171
