

LIST OF TABLES

	TABLE	Page No.
Chapter 1	An Introduction and Literature Review	1
1.1	Applications of capacitors in industry	3
1.2	Dielectric constant of several polymers and inorganic materials	14
1.3	Dielectric parameters for some polymers at various frequencies	30
Chapter 3	Experimental Methods	41
3.1	List of raw materials used in the synthesis of these systems is given below.	43
Chapter 4	Dielectric and Mechanical properties of CCTO/ PVDF Composites	47
4.1	Activation energy from M'' vs $\log f$ plots.	66
4.2	Fitting parameters for α_c relaxation as a function of temperature obtained from H-N fits.	69
Chapter 5	Dielectric and Mechanical properties of La doped CCTO/ PVDF Composites	72
5.1	Activation energy from M'' vs $\log f$ plots.	91
5.2	Fitting parameters for α_c relaxation as a function of temperature obtained from H-N fits.	95
Chapter 6	Dielectric and Mechanical properties of Nb doped CCTO/ PVDF Composites	97
6.1	Activation energy from M'' vs $\log f$ plots.	116
6.2	Fitting parameters for α_c relaxation as a function of temperature	120

	obtained from H-N fits.	
Chapter 7	Dielectric and Mechanical properties of Sn doped CCTO/ PVDF Composites	122
7.1	Activation energy from M'' vs $\log f$ plots.	141
7.2	Fitting parameters for α_c relaxation as a function of temperature obtained from H-N fits.	145
Chapter 8	Dielectric and Mechanical properties of Zr doped CCTO/ PVDF Composites	148
8.1	Activation energy from M'' vs $\log f$ plots.	166
8.2	Fitting parameters for α_c relaxation as a function of temperature obtained from H-N fits.	171
Chapter 9	Conclusion and Scope for Further Research Work	173
9.1	Values of various parameters for different composites containing 50 wt% of the filler.	178
