

LIST OF TABLES

- Table 1.5.1** : *Recent synthetic developments in the field of isatin chemistry*
- Table 2.2.1** : *Effect of catalyst amount (mol %) on yield of the product 4a*
- Table 2.2.2** : *Effect of molar ratio of substrates on the yield of the product 4a*
- Table 2.2.3** : *Effect of temperature on the yield of the product 4a*
- Table 2.2.4** : *Effect of solvents on the yield of the product 4a*
- Table 2.2.5** : *Effect of different catalysts on the yield of the product 4a*
- Table 2.2.5** : *Synthesis of substituted imidazoles (4a-s)*
- Table 3.2.1** : *Effect of catalyst amount (mol %) on yield of the product 4a*
- Table 3.2.2** : *Effect of type of ZrO₂ on the yield of the product 4a*
- Table 3.2.3** : *Effect of different catalysts on the yield of the product 4a*
- Table 3.2.4** : *Effect of rotation frequency of ball mill on the yield of the product 4a*
- Table 3.2.5** : *Effect of number of milling balls on the yield of the product 4a*
- Table 3.2.6** : *Synthesis of substituted spirooxindoles (4a-r)*
- Table 4.2.1** : *Results of comparative study for synthesized compounds 2a-f under both conventional method and microwave irradiation*
- Table 4.2.2** : *The influence of different ratio of solvent system on the yield of the product 2a*
- Table 4.2.3** : *Effect of catalyst amount on the yield of product 2a*
- Table 4.2.4** : *Effect of the recycled bentonite clay on the yield of the product 2a*
- Table 4.2.5** : *Condensation reaction of isatin derivatives with 1, 2-diaminobenzene*
