<b>Preface</b>	<b>xix</b>
<b>Chapter 1: Introduction: A bibliographic review</b>	<b>24-70</b>
1.1 Overview of Next Generation	25
1.2 Need of sustainable energy sources	26
1.3. Thin Film Technology	30
1.4 Why Thin Films?	35
1.5 Application of Thin Films	38
1.5.1 Optoelectronic and Device applications	39
1.5.2 Photodiodes	40
1.5.3 Solar cells	40
1.5.4 Light Emitting Diodes (LED's)	41
1.5.5 Laser Diodes	41
1.5.6 Optical Fibers	41
1.6 II-VI compound semiconductors	42
1.7 Cadmium and Molybdenum based thin film semiconductors	43
1.8 Thin Film Solar cell: Need, current status and scope	46
1.9 Light absorbing material	50
1.10 Window layer in solar cell	51
1.11 Buffer layer in solar cell	52
1.12 Back contact	53
1.13 Review of literature and importance of the study	54
1.14 Objectives/Scope of present work	64
1.15 Outline of Thesis	66
<b>Chapter 2: Thin film growth and Characterization Techniques</b>	<b>71-124</b>
2.1 Thin film growth techniques	73
2.1.1 Vacuum Evaporation	76
2.1.2 Pulse laser deposition	77
2.1.3 Chemical Vapor deposition	77

## Contents

---

2.1.4 Thermal Evaporation	78
2.1.5 E-beam Evaporation	79
2.1.6 Sputtering	80
2.2 Experimental characterization tools	86
2.2.1 X-Ray diffractometer (XRD)	87
2.2.2 Microscopic Techniques	93
2.2.2.1 Electron Microscopy Scanning (SEM)	94
2.2.2.2 Interpretation of SEM Images	100
2.2.2.3 Atomic Force Microscopy (AFM)	102
2.2.3 Energy Dispersive X-Ray Spectroscopy	110
2.2.4 Electrical Conductivity Measurement	112
2.2.4.1 Four Point Probe	112
2.2.5 Optical Properties Measurement	114
2.2.5.1 UV-VIS spectroscopy	114
2.2.5.2 Fourier Transform infrared spectroscopy	116
2.2.5.3 Raman spectroscopy	118
2.2.5.4 Optical bandgap determination	120
2.3 Theoretical band structure calculations	123

### **Chapter 3: Synthesis and Physical Characterization of Magnetron Sputtered**

#### **Graphene-CdS bilayer 125-142**

3.1 Introduction	127
3.2 Methods and Characterization details	129
3.3 Results and discussions	131
3.3.1 Morphological studies by FESEM	131
3.3.2 X-Ray diffraction Analysis	132
3.3.3 UV-Vis analysis	133
3.3.4 Raman Spectral Analysis	135
3.3.5 FTIR Analysis	136
3.3.6 Electrical Analysis	138
3.3.7 Mechanism and Theorem Section	140
3.4 Conclusion	141

### **Chapter 4: Investigating Optical, Structural and Morphological Properties of**

#### **Polycrystalline CdTe Thin-film Deposited by RF Magnetron Sputtering 143-163**

4.1 Introduction	145
4.2 Experimental details	146
4.3 Results and Discussion	148

## Contents

4.3.1 XRD Analysis	148
4.3.2 Morphological and thickness Analysis (FESEM and AFM)	150
4.3.3 UV-Vis spectroscopy analysis	152
4.3.4 Structural and Electronic properties	154
4.3.5 Optical properties	159
4.4 Conclusion	162
<b>Chapter 5: Investigation on the effect of Process Parameter on physical properties of RF sputtered Mo-Ni thin films as a back contact thin-film solar cell</b>	
<b>164-179</b>	
5.1 Introduction	165
5.2 Materials And Methods	166
5.3 Results and Discussion	168
5.3.1 Influence of RF power	168
5.3.1.1 Structural Studies	168
5.3.1.2 Surface Morphological Analysis	170
5.3.1.3 Electrical Analysis	173
5.3.1.4 Optical properties	173
5.3.2 Influence of deposition time	174
5.3.2.1 Structural Analysis	174
5.3.2.2 Surface Morphological Analysis	175
5.3.2.3 Electrical Properties	177
5.3.34 Optical Properties	178
5.4 Conclusion	179
<b>Chapter 6: Investigations on tailoring physical properties of RF magnetron sputtered Cadmium Sulphide (CdS) thin films</b>	
<b>180-197</b>	
6.1 Introduction	181
6.2 Materials and Methods	186
6.3 Results and Discussion	188
6.3.1 Structural Analysis	188
6.3.2 Surface Morphological	191
6.3.3 Optical Analysis	193
6.4 Conclusion	196
<b>Chapter 7: Observation Structural and Morphological Control of Magnetron Sputtered Molybdenum Oxide thin Films</b>	
<b>198-210</b>	
7.1 Introduction	199
7.2 Methods and Characterization	201
7.3 Results and Discussion	202
7.3.1 Structural Studies	202

## Contents

---

7.3.2 Morphological Analysis	204
7.3.3 Electrical Analysis	207
7.4 Conclusion	209
<b>Chapter 8: Summary and future perspectives</b>	<b>212-215</b>
8.1 Summary	213
8.2 Future perspectives	215
<b>References</b>	<b>217-241</b>
<b>List of Publications</b>	<b>242</b>
<b>Schools / Meetings / Workshops / Conference Attended</b>	<b>243-244</b>

<b>Figure 3.1.</b> Graphene dispersion stages on the substrate.	129
<b>Figure 3.2.</b> Address layer of cadmium sulfide sample grown on graphene.	130
<b>Figure 3.3</b> FESEM images of (a <sub>2</sub> ,a <sub>1</sub> ) Graphene/Si, (b <sub>2</sub> ,b <sub>1</sub> ) Graphene/CdS/Si	132
<b>Figure 3.4</b> XRD results of pristine graphene, CdS/Graphene nanocomposite, and pure CdS NPs.	134
<b>Figure 3.5 (a)</b> UV-VIS spectra <b>(b)</b> UV-Vis reflectance spectra graphene/Si, CdS/Si, CdS/graphene/Si hybrid	134
<b>Figure 3.6.</b> Raman spectra of (a) graphene and (b) CdS/Graphene hybrid material.	136
<b>Figure 3.7</b> FTIR spectra of graphene/Si and CdS/Graphene/Si	137
<b>Figure 3.8</b> Current-voltage (I-V) characteristics of CdS/Si, graphene/Si and CdS/graphene/Si.	139
<b>Figure 3.9.</b> Schematic diagram of the charge separation and transfer in the Graphene–cadmium sulfide (Gr–CdS) system under visible light.	140
<b>Figure 4.1.</b> Schematic diagram of indigenously designed locally fabricated RF magnetron sputtering system	146
<b>Figure 4.2:</b> XRD spectra of the CdTe films before and after annealing (top shows different N <sub>2</sub> concentrations of 1, 2, and 3% and bottom show different RF powers of 50, 100, and 150 W).	149

## List of Figures

---

- Figure 4.3:** AFM images of as-deposited and annealed CdTe thin films (top shows different N<sub>2</sub> concentrations of 1, 2, and 3% and bottom show different RF powers of 50, 100, and 150 W). 151
- Figure 4.4:** FESEM images of CdTe films after annealing (top shows different N<sub>2</sub> concentrations of 1, 2, and 3% and bottom show different RF powers of 50, 100, and 150 W). 152
- Figure 4.5:** a.) UV-Vis optical absorption spectra (left) b.) optical band gap relation plotted between  $(ahv)^2$  versus  $h\nu$  (right) for CdTe films after annealing (top shows different N<sub>2</sub> concentrations of 1, 2, and 3% and bottom show different RF powers of 50, 100 and 150 W). 153
- Figure 4.6:** The Energy vs Volume curve of the CdTe using GGA approximation. 155
- Figure 4.7:** (a) The total DOS of CdTe for GGA and MBJ approximations. (b) and (c) represents PDOS of the CdTe orbitals based GGA for Cd and Te respectively. 157
- Figure 4.8:** (a) The CdTe Band structure for Fermi area levels. (b-e) the level of the (a) part with the 1<sup>st</sup> and 2<sup>nd</sup> derivation diagrams. 159
- Figure 4.9:** (a) , (b) The Real & Imaginary parts of dielectric functions (c) Absorption curve, (d) Optical conductivity and (e) Eloss diagram of CdTe versus photon energy. 162
- Figure 5.1:** Schematic of RF magnetron sputtering 167
- Figure 5.2:** XRD spectra for the samples deposited at various RF powers of a) 100 W, b) 150 W and c) 200 W. 170
- Figure 5.3:** AFM images (3D and 2D) of Mo-Ni thin films deposited at various RF powers of 100, 150, and 200 W. 171
- Figure 5.4:** FESEM images of Mo-Ni thin films deposited at different RF power: a) 100 W, b) 150 W and c) 200 W. 172

## List of Figures

---

- Figure 5.5:** Reflectance spectra of Mo-Ni thin films deposited at different RF power. 174
- Figure 5.6:** XRD pattern for Mo-Ni thin films deposited at various deposition times: a) 15min, b) 30min and c) 45min. 175
- Figure 5.7:** AFM images of Mo-Ni thin films deposited at different deposition times and constant RF power. 176
- Figure 5.8:** FESEM images of Mo-Ni films deposited at various deposition times: a) 15 min, b) 30 min and c) 45 min. 177
- Figure 5.9:** Reflectance of the Mo-Ni thin films deposited at different deposition times: a) 15min, b) 30min and c) 45min. 178
- Figure 6.1:** XRD pattern of sputtered CdS thin films deposited at different N<sub>2</sub> concentrations in Ar/N<sub>2</sub> mixture. 190
- Figure 6.2:** FESEM images of sputtered CdS thin films at different N<sub>2</sub> concentrations in Ar/N<sub>2</sub> mixture. 192
- Figure 6.3:** AFM images of CdS thin films sputtered at different N<sub>2</sub> concentrations in Ar/ N<sub>2</sub> mixture. 193
- Figure 6.4:** Transmission spectra for CdS thin films deposited by sputtering at different N<sub>2</sub> concentrations in Ar/ N<sub>2</sub> mixture. 195
- Figure 6.5:** Plot of  $(\alpha h\nu)^2$  vs. photon energy ( $h\nu$ ) for CdS thin films deposited in pure Ar and with the variation of N<sub>2</sub> concentration in Ar/ N<sub>2</sub> mixture. 196
- Figure 7.1:** Schematics of (a) RF magnetron sputtering, (b) furnace and experimental conditions. 202
- Figure 7.2:** XRD spectra of as-deposited Mo and Annealed MoO<sub>x</sub> Films at 300, 400 and 500 °C 204

## List of Figures

---

- Figure 7.3:** FESEM images of (a) as-deposited Mo, (b) annealed at 300°C, (c) annealed at 400°C and (d) annealed at 500 °C MoO<sub>x</sub> films (inset 3μm scale) 205
- Figure 7.4:** 2D and 3D AFM images of (a) as-deposited Mo, (b) annealed at 300°C, (c) annealed at 400°C and (d) annealed at 500 °C MoO<sub>x</sub> films 207
- Figure 7.5:** Raman spectra of (a) MoO<sub>2</sub> and (b) MoO<sub>3</sub> film 209

## List of Tables

---

<b>Table 1.1</b> a brief introduction of thin-film synthesis techniques.	35
<b>Table 1.2</b> The development of thin-film technology.	37
<b>Table 1.3</b> Applications of Thin-Film in wide range of area.	39
<b>Table 2.1:</b> Thin-film growth processes classified by physical and chemical techniques.	75
<b>Table 3.1.</b> The table of experiment conditions and parameters.	130
<b>Table 3.2:</b> Variation of sheet Resistivity of CdS/Si, Graphene/Si, and CdS/Graphene/Si thin films.	139
<b>Table 4.1:</b> RMS, average roughness, and bandgap values for as-deposited annealed CdTe thin films with different N <sub>2</sub> concentrations of 1, 2, and 3% and RF powers of (50, 100, and 150 W).	154
<b>Table 4.2:</b> The group velocity ( $V_g$ (m/s)), the effective electron mass to free electron mass ( $m^*/m_0$ ) which presented in Fig.8 (b-e) and Energy band gap of CdTe thin film ( $E_g$ (eV)).	156
<b>Table 5.1:</b> Summary of the XRD measurements and the result for thickness, roughness, and electrical resistivity test for various RF powers	170
<b>Table 5.2</b> For various deposition times, a summary of the XRD data and the results for thickness, roughness, and electrical resistivity tests.	177
<b>Table 6.1:</b> Summary of structural parameters of sputtered CdS thin film deposited at various N <sub>2</sub> concentrations in Ar/N <sub>2</sub> mixture.	190
<b>Table 7.1:</b> Roughness and electrical resistivity measurement for as-deposited, annealed at 300, 400 and 500°C samples.	208
