Preface	xxiii
Chapter 1	
1 Introduction	1-23
1.1 Introduction	1
1.2 Broadband Antennas	3
1.3 Classification of Broadband Antennas	6
1.3.1 Broadband Antennas under Non-Planar or Conventional Category	10
1.3.1.1 Frequency Independent Antenna	10
1.3.1.1.1 Trapezoidal Toothed Log-periodic Antenna	11
1.3.1.1.2 Dielectric Loading for Bandwidth Enhancement/ Size Miniaturization	13
1.3.2 Broadband Antennas under Planar Category	14
1.3.2.1 Monopole Antenna with Partial Ground Plane	14
1.3.2.2 Quasi-Self-Complementary Antenna	16
1.3.2.3 Curved Boundary and Multiple Segments for Bandwidth Enhancement/ Size Miniaturization	18
1.4 Motivation and Challenges for Design and Development of Compact Broadband Antennas	19
1.5 Objective and Scope of the Present Thesis	21
Chapter 2	
2 Literature Review	24-42
2.1 Introduction	24
2.2 Literature Survey on Broadband Antennas	24
2.3 Trapezoidal Toothed Log-periodic Antenna	28
2.4 Planar Monopole Antenna	32
2.5 Quasi-Self-Complementary Antenna	39
2.6 Summary	41
Chapter 3	42.70
3 Trapezoidal Toothed Log-periodic Antenna	43-70
3.1 Introduction	43
3.2 Unloaded Metal TTLPA fed through Tapered MS-to-CPS Transition	45
3.2.1 Design of Tapered MS-to-CPS Transition	45
3.2.2 Design of Unloaded Metal TTLPA	47
3.2.3 Simulation and Measurement of Unloaded Metal TTLPA fed through MS-to-CPS Transition	49
3.2.3.1 Simulation Study	49
3.2.3.2 Experimental Study	49

		3.2.4 Results and Discussion	51
		3.2.4.1 Reflection Coefficient- and Input Impedance-Frequency Characteristics	51
		3.2.4.2 Simulated Surface Current Distributions	52
		3.2.4.3 Radiation Patterns	54
		3.2.4.4 Peak Realized Gain- and Total Efficiency-Frequency	55
	3.3	Characteristics Dielectric-Loaded Metal TTLPA	56
		3.3.1 Design of Dielectric-Loaded Metal TTLPA	56
		3.3.2 Simulation and Measurement of Dielectric-Loaded Metal TTLPA	59
		3.3.2.1 Simulation Study	59
		3.3.2.2 Parametric Study	60
		3.3.2.3 Experimental Study	62
		3.3.3 Results and Discussion	63
		3.3.3.1 Reflection Coefficient-Frequency Characteristics	63
		3.3.3.2 Simulated Surface Current Distributions	64
		3.3.3.3 Radiation Patterns without and with Dielectric Loading	65
		3.3.3.4 Realized Gain-Frequency Characteristics without and with Dielectric Loading	66
		3.3.3.5 Total Efficiency-Frequency Characteristics without and with Dielectric Loading	68
	3.4	Summary	69

4	Flo	wer-shaped Planar Monopole Antenna	71-96
4		wer-shaped Planar Monopole Antenna Introduction	71-96 71
4	4.1	Introduction	
4	4.1 4.2		71
4	4.1 4.2	Introduction Design of Flower-shaped Patch	71 73
4	4.1 4.2	Introduction Design of Flower-shaped Patch CPW-fed Flower-shaped Planar Monopole Antenna (PMA)	71 73 74
4	4.1 4.2	Introduction Design of Flower-shaped Patch CPW-fed Flower-shaped Planar Monopole Antenna (PMA) 4.3.1 Design of CPW-fed Flower-shaped PMA	71 73 74 74
4	4.1 4.2	Introduction Design of Flower-shaped Patch CPW-fed Flower-shaped Planar Monopole Antenna (PMA) 4.3.1 Design of CPW-fed Flower-shaped PMA 4.3.2 Simulation and Measurement of CPW-fed Flower-shaped PMA	71 73 74 74 75
4	4.1 4.2	Introduction Design of Flower-shaped Patch CPW-fed Flower-shaped Planar Monopole Antenna (PMA) 4.3.1 Design of CPW-fed Flower-shaped PMA 4.3.2 Simulation and Measurement of CPW-fed Flower-shaped PMA 4.3.2.1 Simulation Study	71 73 74 74 75 75
4	4.1 4.2	Introduction Design of Flower-shaped Patch CPW-fed Flower-shaped Planar Monopole Antenna (PMA) 4.3.1 Design of CPW-fed Flower-shaped PMA 4.3.2 Simulation and Measurement of CPW-fed Flower-shaped PMA 4.3.2.1 Simulation Study 4.3.2.2 Experimental Study	71 73 74 74 75 75 77
4	4.1 4.2	Introduction Design of Flower-shaped Patch CPW-fed Flower-shaped Planar Monopole Antenna (PMA) 4.3.1 Design of CPW-fed Flower-shaped PMA 4.3.2 Simulation and Measurement of CPW-fed Flower-shaped PMA 4.3.2.1 Simulation Study 4.3.2.2 Experimental Study 4.3.3 Results and Discussion 4.3.3.1 Input VSWR-Frequency Characteristics 4.3.3.2 Comparison of Simulated Input VSWR-Frequency Characteristics of Circular Patch and the proposed Flower- shaped Patch Antennas	71 73 74 75 75 75 77 78
4	4.1 4.2	Introduction Design of Flower-shaped Patch CPW-fed Flower-shaped Planar Monopole Antenna (PMA) 4.3.1 Design of CPW-fed Flower-shaped PMA 4.3.2 Simulation and Measurement of CPW-fed Flower-shaped PMA 4.3.2.1 Simulation Study 4.3.2.2 Experimental Study 4.3.3 Results and Discussion 4.3.3.1 Input VSWR-Frequency Characteristics 4.3.3.2 Comparison of Simulated Input VSWR-Frequency Characteristics of Circular Patch and the proposed Flower-	71 73 74 74 75 75 75 77 78 78
4	4.1 4.2	Introduction Design of Flower-shaped Patch CPW-fed Flower-shaped Planar Monopole Antenna (PMA) 4.3.1 Design of CPW-fed Flower-shaped PMA 4.3.2 Simulation and Measurement of CPW-fed Flower-shaped PMA 4.3.2.1 Simulation Study 4.3.2.2 Experimental Study 4.3.3 Results and Discussion 4.3.3.1 Input VSWR-Frequency Characteristics 4.3.3.2 Comparison of Simulated Input VSWR-Frequency Characteristics of Circular Patch and the proposed Flower- shaped Patch Antennas	71 73 74 74 75 75 75 77 78 78 78 79
4	4.1 4.2	 Introduction Design of Flower-shaped Patch CPW-fed Flower-shaped Planar Monopole Antenna (PMA) 4.3.1 Design of CPW-fed Flower-shaped PMA 4.3.2 Simulation and Measurement of CPW-fed Flower-shaped PMA 4.3.2.1 Simulation Study 4.3.2.2 Experimental Study 4.3.3 Results and Discussion 4.3.3.1 Input VSWR-Frequency Characteristics 4.3.3.2 Comparison of Simulated Input VSWR-Frequency Characteristics of Circular Patch and the proposed Flower-shaped Patch Antennas 4.3.3.3 Simulated Surface Current Distributions 	71 73 74 74 75 75 75 77 78 78 78 79
4	4.1 4.2	 Introduction Design of Flower-shaped Patch CPW-fed Flower-shaped Planar Monopole Antenna (PMA) 4.3.1 Design of CPW-fed Flower-shaped PMA 4.3.2 Simulation and Measurement of CPW-fed Flower-shaped PMA 4.3.2.1 Simulation Study 4.3.2.2 Experimental Study 4.3.3 Results and Discussion 4.3.3.1 Input VSWR-Frequency Characteristics 4.3.3.2 Comparison of Simulated Input VSWR-Frequency Characteristics of Circular Patch and the proposed Flower-shaped Patch Antennas 4.3.3.3 Simulated Surface Current Distributions 4.3.3.4 Radiation Patterns 	71 73 74 74 75 75 75 77 78 78 78 79 80 81
4	4.1 4.2 4.3	Introduction Design of Flower-shaped Patch CPW-fed Flower-shaped Planar Monopole Antenna (PMA) 4.3.1 Design of CPW-fed Flower-shaped PMA 4.3.2 Simulation and Measurement of CPW-fed Flower-shaped PMA 4.3.2.1 Simulation Study 4.3.2.2 Experimental Study 4.3.3 Results and Discussion 4.3.3.1 Input VSWR-Frequency Characteristics 4.3.3.2 Comparison of Simulated Input VSWR-Frequency Characteristics of Circular Patch and the proposed Flower- shaped Patch Antennas 4.3.3.3 Simulated Surface Current Distributions 4.3.3.4 Radiation Patterns 4.3.3.5 Realized Gain- and Total Efficiency-Frequency Characteristics	71 73 74 74 75 75 75 77 78 78 78 79 80 81 82
4	4.1 4.2 4.3	 Introduction Design of Flower-shaped Patch CPW-fed Flower-shaped Planar Monopole Antenna (PMA) 4.3.1 Design of CPW-fed Flower-shaped PMA 4.3.2 Simulation and Measurement of CPW-fed Flower-shaped PMA 4.3.2.1 Simulation Study 4.3.2.2 Experimental Study 4.3.3 Results and Discussion 4.3.3.1 Input VSWR-Frequency Characteristics 4.3.3.2 Comparison of Simulated Input VSWR-Frequency Characteristics of Circular Patch and the proposed Flower-shaped Patch Antennas 4.3.3.3 Simulated Surface Current Distributions 4.3.3.4 Radiation Patterns 4.3.3.5 Realized Gain- and Total Efficiency-Frequency Characteristics 4.3.3.6 Time Domain Analysis 	71 73 74 75 75 75 77 78 78 78 79 80 81 82 83
4	4.1 4.2 4.3	Introduction Design of Flower-shaped Patch CPW-fed Flower-shaped Planar Monopole Antenna (PMA) 4.3.1 Design of CPW-fed Flower-shaped PMA 4.3.2 Simulation and Measurement of CPW-fed Flower-shaped PMA 4.3.2.1 Simulation Study 4.3.2.2 Experimental Study 4.3.3 Results and Discussion 4.3.3.1 Input VSWR-Frequency Characteristics 4.3.3.2 Comparison of Simulated Input VSWR-Frequency Characteristics of Circular Patch and the proposed Flower- shaped Patch Antennas 4.3.3.3 Simulated Surface Current Distributions 4.3.3.4 Radiation Patterns 4.3.3.5 Realized Gain- and Total Efficiency-Frequency Characteristics 4.3.3.6 Time Domain Analysis Microstrip Line-fed Flower-shaped Planar Monopole Antenna	71 73 74 75 75 75 77 78 78 78 79 80 81 82 83
4	4.1 4.2 4.3	Introduction Design of Flower-shaped Patch CPW-fed Flower-shaped Planar Monopole Antenna (PMA) 4.3.1 Design of CPW-fed Flower-shaped PMA 4.3.2 Simulation and Measurement of CPW-fed Flower-shaped PMA 4.3.2.1 Simulation Study 4.3.2.2 Experimental Study 4.3.3 Results and Discussion 4.3.3.1 Input VSWR-Frequency Characteristics 4.3.3.2 Comparison of Simulated Input VSWR-Frequency Characteristics of Circular Patch and the proposed Flower- shaped Patch Antennas 4.3.3.3 Simulated Surface Current Distributions 4.3.3.4 Radiation Patterns 4.3.3.5 Realized Gain- and Total Efficiency-Frequency Characteristics 4.3.3.6 Time Domain Analysis Microstrip Line-fed Flower-shaped Planar Monopole Antenna (PMA)	71 73 74 74 75 75 75 77 78 78 79 80 81 82 83 85
4	4.1 4.2 4.3	 Introduction Design of Flower-shaped Patch CPW-fed Flower-shaped Planar Monopole Antenna (PMA) 4.3.1 Design of CPW-fed Flower-shaped PMA 4.3.2 Simulation and Measurement of CPW-fed Flower-shaped PMA 4.3.2.1 Simulation Study 4.3.2.2 Experimental Study 4.3.3 Results and Discussion 4.3.3.1 Input VSWR-Frequency Characteristics 4.3.3.2 Comparison of Simulated Input VSWR-Frequency Characteristics of Circular Patch and the proposed Flower-shaped Patch Antennas 4.3.3.3 Simulated Surface Current Distributions 4.3.3.4 Radiation Patterns 4.3.3.5 Realized Gain- and Total Efficiency-Frequency Characteristics 4.3.3.6 Time Domain Analysis Microstrip Line-fed Flower-shaped Planar Monopole Antenna (PMA) 4.4.1 Design of Microstrip Line (MS)-fed Flower-shaped PMA 	71 73 74 74 75 75 75 77 78 78 78 79 80 81 82 83 85 85
4	4.1 4.2 4.3	 Introduction Design of Flower-shaped Patch CPW-fed Flower-shaped Planar Monopole Antenna (PMA) 4.3.1 Design of CPW-fed Flower-shaped PMA 4.3.2 Simulation and Measurement of CPW-fed Flower-shaped PMA 4.3.2.1 Simulation Study 4.3.2.2 Experimental Study 4.3.3 Results and Discussion 4.3.3.1 Input VSWR-Frequency Characteristics 4.3.3.2 Comparison of Simulated Input VSWR-Frequency Characteristics of Circular Patch and the proposed Flower-shaped Patch Antennas 4.3.3.3 Simulated Surface Current Distributions 4.3.3.4 Radiation Patterns 4.3.3.5 Realized Gain- and Total Efficiency-Frequency Characteristics 4.3.3.6 Time Domain Analysis Microstrip Line-fed Flower-shaped Planar Monopole Antenna (PMA) 4.4.1 Design of Microstrip Line (MS)-fed Flower-shaped PMA 4.4.2 Simulation and Measurement of MS-fed Flower-shaped PMA 	71 73 74 74 75 75 75 77 78 78 78 79 80 81 82 83 85 85 85

	4.4.3.1	Effects of Shape of Feed Line and Ground Plane on Input	87
		VSWR-Frequency Characteristics of the MS-fed Flower-	
		shaped Patch Antenna	
	4.4.3.2	Input VSWR-Frequency Characteristics	89
	4.4.3.3	Simulated Surface Current Distributions	90
	4.4.3.4	Radiation Patterns	91
	4.4.3.5	Realized Gain- and Total Efficiency-Frequency Characteristics	92
	4.4.3.6	Time Domain Analysis	93
4.5	Summary		95

Chapter 5

	lapi		
5	Cas	stor Leaf-shaped Quasi-Self-Complementary Antenna and its	97-118
	MI	MO Configuration	
	5.1	Introduction	97
	5.2	Design and Configurations of Castor Leaf-shaped QSCA	99
	5.3	Design of Two-Element MIMO Antenna	102
	5.4	Simulation and Measurement of Castor Leaf-shaped MIMO Antennas	105
		5.4.1 Simulation Study	105
		5.4.2 Parametric Study	105
		5.4.3 Experimental Study	108
	5.5	Results and Discussion	110
		5.5.1 S-parameters-Frequency Characteristics	110
		5.5.2 Simulated Surface Current Distributions	111
		5.5.3 Radiation Patterns	113
		5.5.4 Realized Gain-and Total Efficiency-Frequency Characteristics	115
		5.5.5 Envelop Correlation Coefficient	117
	5.6	Summary	118

Chapter 6

6	Sha	119-138		
	6.1	Introduction	119	
	6.2	Design and Configuration of Shared Radiator MIMO Antenna	121	
	6.3	Simulation and Experimental Studies	123	
		6.3.1 Simulation Study	123	
		6.3.2 Experimental Study	124	
	6.4	Results and Discussion	126	
		6.4.1 S-parameters-Frequency Characteristics	126	
		6.4.2 Different Antenna Configurations	126	
		6.4.3 Proposed Antenna Configuration	129	
		6.4.4 Simulated Surface Current Distributions	130	
		6.4.5 Radiation Patterns	132	
		6.4.6 Realized Gain-/Total Efficiency-Frequency Characteristics	134	
		6.4.7 Envelop Correlation Coefficient-Frequency Characteristics	135	
		6.4.8 Performance Comparison of Proposed Antenna	136	
	6.5	Summary	137
