List of Figures	xv
List of Symbols and Abbreviations	xvii
Preface	xix
1 Introduction	1
1.1 The Fourier Transform	4
1.2 Schwartz space and Tempered Distributions	7
1.3 Wavelet Transform	9
1.4 Hankel Transform	11
1.5 Bessel Wavelet Transform	13
1.6 Zemanian Spaces and Their Duals	14
1.7 Some Useful Results	15
2 Continuous Wavelet Transform of Schwartz Tempered Distributions in $S'(\mathbb{R}^n)$	19
2.1 Introduction	19
2.2 Wavelet transform of tempered distributions in $S'(\mathbb{R}^n)$ and its inversion	20
2.3 Conclusions	28
3 Continuous Bessel Wavelet Transform of Distributions	31
3.1 Introduction	31
3.2 The continuous Bessel wavelet transform of distributions	32
3.3 The Bessel wavelet transform on L^p - Sobolev space	42
3.4 Conclusions	45
4 Characterizations of the Bessel wavelet transform in Besov and Triebel-Lizorkin type spaces	47
4.1 Introduction	47
4.2 Properties of the Besov space and Triebel-Lizorkin type space	48

4.3	Boundedness of the Bessel wavelet transform in Triebel-Lizorkin and Besov type spaces	57
4.4	Conclusions	69
5	Characterizations of the Inversion Formula of the Continuous Bessel Wavelet Transform of Distributions in $H'_\mu(\mathbb{R}^+)$	71
5.1	Introduction	71
5.2	Properties of the Bessel wavelet and Bessel wavelet transform of distributions	73
5.3	Properties of the continuous Bessel wavelet transform in $L^2(\mathbb{R}^+)$ and structure formula in $H'_\mu(\mathbb{R}^+)$	80
5.4	Inversion formula of the continuous Bessel wavelet transform of the distributions	91
5.5	Calderón reproducing formula and the applications of the continuous Bessel wavelet transform of distributions	98
5.6	Conclusions	105
6	The Continuous Bessel Wavelet Transform of Distributions in β'_μ-Space	107
6.1	Introduction	107
6.2	The continuous Bessel wavelet transform and its properties .	109
6.3	Inversion formula of the continuous Bessel wavelet transform of the distributions	117
6.4	Conclusions	144
	Bibliography	147

List of Figures

5.1	$u(x, t)$ at $\mu=0$.	105
5.2	$u(x, t)$ at $\mu=1$.	105
