| Certificate by the supervisor..... | v |
| Copyright Transfer Certificate..... | vii |
| Acknowledgement..... | ix |
| Contents..... | xiii |
| List of Figure and Table..... | xvi |
| Preface..... | xx |
| Chapter 1: Introduction..... | 25-56 |
| 1.1 Magnetic property..... | 27 |
| 1.1.1 Paramagnetic material..... | 29 |
| 1.1.2 Ferromagnetic material..... | 29 |
| 1.1.3 Anti-ferromagnetic and ferrimagnetic material..... | 30 |
| 1.2 Frustration..... | 31 |
| 1.2.1 Magnetic/spin frustration..... | 31 |
| 1.3 Dielectric property..... | 33 |
| 1.3.1 Ferroelectric material..... | 34 |
| 1.4 Multiferroic material..... | 35 |
| 1.5 Electrical resistivity..... | 36 |
| 1.5.1 Arrhenius model..... | 37 |
| 1.5.2 Variable range hopping (VRH) model..... | 37 |
| 1.6 Double perovskite material..... | 38 |
| 1.6.1 A brief literature survey on R_2CoMnO_6 double perovskites..... | 42 |
| 1.7 Pyrochlore material..... | 45 |
| 1.7.1 A brief literature survey on $R_2Ti_2O_7$ pyrochlores..... | 47 |
| 1.8 Some important physical phenomena related to our research..... | 49 |
| 1.8.1 Griffiths phase..... | 49 |
| 1.8.2 Metamagnetic transition..... | 50 |
| 1.8.3 Exchange bias..... | 51 |
| 1.8.4 Spin-glass..... | 52 |
| 1.8.5 Magnetocaloric effect..... | 53 |
| 1.9 Motivations of the thesis..... | 55 |

| | |
|---|---------------|
| Chapter 2: Experimental Section..... | 57-76 |
| 2.1 Sample preparation..... | 59 |
| 2.1.1 Solid state reaction method | 59 |
| 2.2 Sample characterization | 62 |
| 2.2.1 X-ray diffraction technique | 62 |
| 2.2.2 Magnetization measurement and MPMS..... | 65 |
| 2.2.3 X-ray Photoemission spectroscopy..... | 67 |
| 2.2.4 Raman spectroscopy..... | 69 |
| 2.2.5 UV-Vis (Ultraviolet-Visible) spectroscopy..... | 72 |
| 2.2.6 Transport property measurement..... | 74 |
| 2.2.7 Dielectric spectroscopy..... | 74 |
| Chapter 3: Extraordinary magnetic properties of double perovskite $\text{Eu}_2\text{CoMnO}_6$ | |
| wide band gap Semiconductor..... | 77-98 |
| 3.1 Introduction..... | 79 |
| 3.2 Experimental..... | 81 |
| 3.3 Results and discussions..... | 81 |
| 3.3.1 X-ray diffraction study..... | 81 |
| 3.3.2 X-ray photoemission spectroscopy study..... | 83 |
| 3.3.3 UPS and UV-visible spectroscopy study..... | 85 |
| 3.3.4 Magnetic study..... | 87 |
| 3.3.5 Raman study..... | 95 |
| 3.4 Conclusion | 96 |
| Chapter 4: Novel Electrical and Magnetic Properties of Double Perovskites | |
| $\text{Eu}_{2-x}\text{Tb}_x\text{CoMnO}_6$ ($x = 0.0$ and 1.0)..... | 99-120 |
| 4.1 Introduction..... | 101 |
| 4.2 Experimental..... | 102 |
| 4.3 Results and discussions..... | 103 |
| 4.3.1 Structural analysis | 103 |
| 4.3.2 Transport property..... | 106 |
| 4.3.3 Dielectric property..... | 109 |
| 4.3.4 Magnetic study..... | 111 |
| 4.4 Conclusion | 119 |

Chapter 5: Multifunctional behaviour in Double Perovskite

| | |
|-----------------------------------|----------------|
| EuPrCoMnO₆..... | 121-144 |
| 5.1 Introduction..... | 123 |
| 5.2 Experimental..... | 125 |
| 5.3 Results and discussions..... | 126 |
| 5.3.1 Structural analysis..... | 126 |
| 5.3.2 Magnetic study..... | 128 |
| 5.3.3 Transport properties..... | 136 |
| 5.3.4 Dielectric study..... | 139 |
| 5.3.5 Impedance spectroscopy..... | 140 |
| 5.4 Conclusion | 143 |

Chapter 6: Relaxor-Super-Paraelectric Behaviour and Crystal Field

| | |
|---|----------------|
| Driven Spin-Phonon Coupling in Pyrochlore Eu₂Ti₂O₇..... | 145-160 |
| 6.1 Introduction..... | 147 |
| 6.2 Experimental..... | 148 |
| 6.3 Results and discussions..... | 149 |
| 6.3.1 Structural analysis..... | 149 |
| 6.3.2 Raman study..... | 151 |
| 6.3.3 Dielectric study..... | 155 |
| 6.4 Conclusion | 160 |

Chapter 7: Summary and Future scope.....161-166

| | |
|-----------------------|-----|
| 7.1 Summary..... | 162 |
| 7.2 Future scope..... | 165 |
