

# Table of contents

<b>List of figures</b>	<b>xxxi</b>
<b>List of tables</b>	<b>xlvii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 The Sun: An Overview . . . . .	1
1.2 Solar Interior . . . . .	5
1.3 Solar Atmosphere . . . . .	8
1.4 The Solar Magnetic Field: A Source of Solar Transients . . . . .	14
1.4.1 Solar Cycle . . . . .	17
1.4.2 Localized Magnetic Features on the Sun . . . . .	19
1.4.3 Relation of Magnetic Field with Dynamic and Transient Phenomena	20
1.5 Transient Phenomena in the Solar Atmosphere . . . . .	21
1.5.1 Solar Flares . . . . .	22
1.5.2 Solar Filaments and Prominences . . . . .	24
1.5.3 Coronal Jets: An Observational Understanding . . . . .	26
1.5.4 Coronal Jets: The Perspective of the Numerical Models . . . . .	32
1.5.5 Coronal Mass Ejection . . . . .	37
1.6 Motivation and Brief Outline of the Thesis . . . . .	39

<b>2</b>	<b>Observations and Data Analysis Techniques: Space and Ground-based Instruments</b>	<b>43</b>
2.1	Introduction . . . . .	44
2.2	Solar Dynamics Observatory (SDO) . . . . .	46
2.2.1	Atmospheric Imaging Assembly (AIA) . . . . .	46
2.2.2	Helioseismic and Magnetic Imager (HMI) . . . . .	48
2.2.3	Extreme Ultraviolet Variability Experiment (EVE) . . . . .	50
2.3	Solar and Heliospheric Observatory (SOHO) . . . . .	52
2.3.1	Large Angle Spectroscopic Coronagraph (LASCO) . . . . .	52
2.4	Solar Terrestrial Relations Observatory (STEREO) . . . . .	54
2.4.1	Sun-Earth-Connection Coronal and Heliospheric Investigation (SECCHI) . . . . .	54
2.5	GOES Data . . . . .	55
2.6	GONG $H\alpha$ Data . . . . .	57
2.7	Hinode/X-ray Telescope (XRT) Data . . . . .	57
2.8	Data Analysis Techniques . . . . .	58
2.8.1	Calibration and Processing of the Image Data . . . . .	58
2.8.2	Magnetogram data and Its Analysis . . . . .	59
2.8.3	Potential Field Source Surface (PFSS) Extrapolation . . . . .	60
2.8.4	Fourier Local Correlation Tracking (FLCT) Technique . . . . .	65
2.8.5	Tie-Pointing Reconstruction Technique . . . . .	68
2.9	Conclusions . . . . .	70
<b>3</b>	<b>Quiet Sun Coronal Jets and Twin CMEs</b>	<b>71</b>
3.1	Introduction . . . . .	72
3.2	Observational Data and Its Analyses . . . . .	76

3.2.1	Observations from <i>Solar Dynamics Observatory (SDO)/ Atmospheric Imaging Assembly (AIA)</i> . . . . .	76
3.2.2	Observations from <i>Solar Dynamics Observatory (SDO)/ Helioseismic Magnetic Imager (HMI)</i> . . . . .	76
3.2.3	Observations from <i>Global Oscillation Network Group (GONG)</i> .	77
3.2.4	Observations from <i>Solar and Heliospheric Observatory (SOHO)/ Large Angle and Spectrometric Coronagraph (LASCO)</i> . . . . .	77
3.2.5	Observations from <i>Solar Terrestrial Relation Observatory (STEREO)/ Sun Earth Connection Coronal and Heliospheric Investigation (SECCHI)</i> . . . . .	78
3.3	Observational Results . . . . .	78
3.3.1	Source Location of the Blowout Jet Evolved due to Quiet-Sun Filament Eruption . . . . .	78
3.3.2	Time-intensity Profile at the Base of the Blowout Jet in Different SDO/AIA Filters . . . . .	82
3.3.3	Evolution of the Blowout Jet due to the Eruption of Segments of a Filament as seen in Different SDO/AIA Filters and GONG H $\alpha$ . .	84
3.3.4	Formation of the Plasma Blobs in the Northern Spire of the Blowout Jet . . . . .	86
3.3.5	Kinematics of the Northern Part of the Blowout Jet . . . . .	90
3.3.6	Eruption of the Southern Part of the Filament and Associated Blowout Jet . . . . .	92
3.3.7	Jet-like and Bubble-like Twin CMEs . . . . .	94
3.3.8	Kinematics of the Jet-like and Bubble-like CME . . . . .	96
3.4	Discussion & Conclusions . . . . .	98
<b>4</b>	<b>Origin of CME Productive and Non-productive Coronal Jets</b>	<b>105</b>

4.1	Introduction . . . . .	106
4.2	Observational Data and Analyses . . . . .	110
4.3	Observational Results . . . . .	114
4.3.1	Source Region of the Recurring Jets . . . . .	114
4.3.2	EUV Brightening and Enhanced GOES Flux During Onset of Jet4 . . . . .	115
4.3.3	Evolution of Magnetic Field at The Base of Recurring Jets . . . . .	117
4.3.4	Non-CME Producing Jets (Jet1, Jet2, Jet3) . . . . .	121
4.3.5	CME Producing Jet (Jet4) . . . . .	128
4.4	Discussion and Conclusions . . . . .	133
<b>5</b>	<b>Study of Two-Stage Coronal Jet Associated with a C1.4 Class Solar Flare</b>	<b>137</b>
5.1	Introduction . . . . .	138
5.2	Observational Data and Its Analyses . . . . .	140
5.3	Observational Results . . . . .	144
5.3.1	Analysis of Time-intensity Profile at the Footpoint of Evolved Jet . . . . .	144
5.3.2	Jet Behaviour in Different SDO/AIA Filters . . . . .	147
5.3.3	Evolution of Cool Surge as seen in $H\alpha$ Observations . . . . .	149
5.3.4	Kinematics of Jet and Associated Solar Surge . . . . .	151
5.3.5	Investigation of Magnetic Field Properties at the Base of Jet using SDO/HMI . . . . .	153
5.3.6	PFSS Extrapolation . . . . .	154
5.4	Interpretation . . . . .	155
5.5	Discussion and Conclusions . . . . .	156
<b>6</b>	<b>Conclusions and Future Plans</b>	<b>159</b>
6.1	Main Conclusions . . . . .	159
6.2	Future Plans . . . . .	161
