

## CONTENTS

### Chapter 1: Introduction

1.1 Controlled drug delivery.....	1
1.2 Cancer and Chemotherapy.....	4
1.2.1 Strategies behind chemotherapy treatments.....	5
1.2.1.1 Passive and active targeting .....	5
1.2.2 Gene therapy for cancer treatment .....	6
1.3 Delivery vehicles: .....	7
1.3.1 Liposomes .....	7
1.3.2 Dendrimers.....	10
1.3.3 Polymeric nanoparticles .....	12
1.3.4 Micelles.....	14
1.3.5 Mesoporous silica nanoparticles .....	16
1.3.6 Layered Double Hydroxides (LDH) .....	17
1.4 Scope of the present work .....	22
1.5 Objective of the present thesis work.....	23

### Chapter 2: Experimental Section

2.1 Synthesis.....	25
2.1.1 Materials.....	25
2.1.2 Synthesis of Mg-Al based layered double hydroxides.....	25
2.1.3 Preparation of anticancer drug intercalated Mg-Al LDHs.....	26
2.1.4 Synthesis of Zn-Fe based layered double hydroxides.....	27
2.1.5 Intercalation of the drug into Zn-Fe LDHs interlayer gallery.....	27
2.1.6 Preparation of drug embedded polymer nanoconjugate .....	28
2.1.7 Synthesis of Li-Al layered double hydroxides.....	29
2.1.8 Intercalation of DNA into the interlayer gallery of LDH .....	29
2.1.9 Determination of intercalated drug .....	30
2.2 Characterization techniques.....	30
2.2.1 X-ray Diffraction (XRD) .....	31
2.2.2 UV- Vis Spectroscopy .....	31
2.2.3 Fourier Transformation Infrared Analysis (FTIR).....	31

2.2.4 Dynamic light scattering (DLS).....	31
2.2.5 X-ray photoelectron spectroscopy (XPS) .....	32
2.2.6 Transmission electron microscopy (TEM) .....	32
2.2.7 Field emission Scanning Electron Microscopy (FESEM).....	32
2.2.8 Atomic Force Microscopy (AFM).....	33
2.2.9 Contact angle measurement .....	33
2.2.10 Thermogravimetric analysis (TGA) .....	33
2.2.11 Differential Scanning Calorimetry (DSC) .....	34
2.2.12 Drug assay and release study .....	34
2.2.13 <i>In vitro</i> cell line studies.....	36
2.2.13.1 Cell Culture and maintenance .....	36
2.2.13.2 Cell viability.....	36
2.2.13.3 Cell adhesion.....	37
2.2.13.4 Fluorescence imaging .....	37
2.2.13.5 Cellular uptake study .....	38
2.2.14 Animal studies .....	39
2.2.14.1 Animals .....	39
2.2.14.2 <i>In vivo</i> antitumor efficacy .....	39
2.2.14.3 Pharmacokinetic study .....	40
2.2.14.4 Analysis of biochemical parameters .....	41
2.2.14.5 Histopathological evaluation.....	41
2.3 Statistical analysis .....	42

Chapter 3: Synthesis and Characterization of Mg-Al based LDHs and tailoring of drug release rate for effective Cancer treatment

3.1 Introduction: .....	42
3.2 Results and Discussion.....	44
3.2.1 Synthesis of various Mg-Al based LDHs and intercalation of drug.....	44
3.2.2 Structural and morphological changes due to drug intercalation .....	47
3.2.3 <i>In vitro</i> controlled release: tailoring of release rate using different anions .....	51
3.2.3 Interactions between drug and LDH.....	55
3.2.4 Thermal properties: Interactions and stability .....	57
3.2.3 Biocompatibility and <i>in vitro</i> anti-tumor efficacy: .....	60
3.2.4 <i>In vivo</i> anti-tumor efficacy and histopathological evidences .....	63

3.2.5 Pharmacokinetics characteristics of RH intercalated LDHs .....	66
3.2.6 Biochemical parameters: Effect of released drug .....	68
3.3 Conclusion: .....	69

Chapter 4: Layered double hydroxides-polymer nanoconjugate for the enhancement of cellular uptake and controlled delivery of hydrophobic anticancer drug

4.1 Introduction .....	71
4.2 Results and Discussion .....	72
4.2.1 Synthesis of various Zn-Fe based layered double hydroxide nanoparticles .....	72
4.2.2 Intercalation of drug within LDH interlayer and its embedment in polymer .....	75
4.2.3 <i>In vitro</i> controlled release of drug.....	78
4.2.4 Nature of interaction between the guest and host molecules: understanding of controlled release .....	82
4.2.5 <i>In vitro</i> cytotoxicity.....	88
4.2.6 Cell adhesion.....	91
4.2.7 Cellular uptake studies of rhodamine B labeled nanohybrids.....	92
4.2.8 <i>In vivo</i> drug release study.....	95
4.2.9 Liver and kidney toxicity test: monitoring the effects of controlled drug release	96
4.2.10 Histopathological findings .....	98
4.3 Conclusion .....	99

Chapter 5: Controlled gene delivery using layered double hydroxides for cancer treatment

5.1 Introduction .....	101
5.2 Results and Discussion .....	102
5.2.1 Synthesis of Li-Al LDH nanoparticles.....	102
5.2.2 Effect of DNA intercalation on structure and physicochemical properties .....	103
5.2.3 Protection of DNA .....	105
5.2.4 <i>In vitro</i> controlled release of DNA .....	107
5.2.5 <i>In vitro</i> cytotoxicity.....	110
5.2.6 Internalization of LDH into mammalian cell.....	112
5.2.7 pGFP transfection efficacy of LDH .....	113
5.2.8 Apoptosis in mammalian cancer cells mediated by GFP-p53: .....	114
5.3 Conclusion.....	115

Chapter 6: Conclusion and Future Direction

6.1 Conclusion.....	117
6.2 Future Direction: .....	120
References .....	121-138
