

## List of Tables

Table No.	Caption	Page No.
<b>Table 1.1:</b>	Limitations of conventional drug delivery and their therapeutic improvement by using controlled drug delivery systems	<b>9</b>
<b>Table 1.2:</b>	Summary of the commonly reported LDHs	<b>19</b>
<b>Table 3.1:</b>	Particle size, distribution (PDI) and Zeta potential for pristine LDHs and drug intercalated LDHs. Values are presented as mean $\pm$ SE ( $n = 3$ )	<b>49</b>
<b>Table 3.2:</b>	Rate Constants and Linear Correlation Coefficients ( $r^2$ ) Obtained by Fitting the RH Release Data from LN-R, LC-R and LP-R.	<b>54</b>
<b>Table 3.3:</b>	Degradation temperature of various systems measured from the 5% wt. loss temperature	<b>60</b>
<b>Table 3.4:</b>	Pharmacokinetic parameters of RH after administration of free RH and RH intercalated LDHs to male SD rats with dose equivalent to 30 mg of RH / kg of body weight	<b>67</b>
<b>Table 3.5:</b>	Changes of biochemical parameters in the serum of mice induced by pristine LDH, free drug and drug intercalated LDHs	<b>68</b>
<b>Table 4.1:</b>	Rate constants, linear correlation coefficients ( $r^2$ ) and diffusion release exponent ( $n$ ) obtained by fitting the RH release data from ZN-R, ZC-R, ZP-R, PCL-RH and PN-R.	<b>81</b>
<b>Table 5.1:</b>	Rate constants, linear correlation coefficients ( $r^2$ ) and diffusion release exponent ( $n$ ) obtained by fitting the DNA release data from LA-DNA.	<b>108</b>
