List of Symbols	xxvii
Preface	xxix
1 Introduction	1
1.1 Background	1
1.1.1 Retinal Disease	4
1.2 Problem Discription and motivation of the work	5
1.3 Thesis Objectives	6
1.4 Organization of the Thesis	7
2 Theoretical Background	9
2.1 Introduction	9

2.2	Classification of retinal blood vessels segmentation approaches: A review	10
2.2.1	Intensity based pattern recognition approach	10
2.2.1.1	Supervised Approach	10
2.2.1.2	Unsupervised Approach	11
2.2.2	Mathematical morphology based Approach	11
2.2.3	Model-based approach	12
2.2.3.1	Deformable model	12
2.2.3.2	Vessel intensity profile model	13
2.2.4	Vessel tracking based approach	13
2.2.5	Parallel hardware based approach	14
2.2.6	Multi-scale based approach	14
2.2.7	Matched filter based approach	14
2.3	Medical image registration: A review	17
2.3.1	Retinal image registration	20
2.3.2	Feature based retinal image registration	25
2.4	Performance measures	27
2.4.1	Performance measures for segmentation	27
2.4.2	Performance measures for registration	29
2.4.2.1	Sum of squares differences	30
2.4.2.2	Correlation Coefficient	31
2.4.2.3	Variance of Intensity Ratio	31
2.4.2.4	Partitioned Intensity Uniformity	32
2.4.2.5	Information Theory based Similarity Measures	32
2.5	Database used for retinal blood vessels Segmentation	36
2.5.1	DRIVE Database	36
2.5.2	STARE Database	36
2.6	Discussion	38
2.7	Conclusion	41

3	Second derivative of Gaussian based matched filter approach for retinal blood vessels segmentation	43
3.1	Introduction	43
3.2	Background	44
3.3	Methods and model	46
3.3.1	Vessels Extraction and Local Thresholding	50
3.3.2	Length filtering and removing outer artifacts	53
3.4	Results and discussions	53
3.5	Conclusions	61
4	Retinal blood vessels segmentation by using Gumbel probability distribution function based matched filter	63
4.1	Introduction	63
4.2	Background	64
4.3	Methods and model	69
4.3.1	Pre-processing	70
4.3.2	Proposed Gumbel pdf based Matched filter	72
4.3.3	Entropy based optimal thresholding	79
4.3.4	Length filtering and removing outliers artifact	79
4.4	Results and discussions	80
4.5	Conclusion	86
5	Fast and Efficient Segmented Retinal Image Registration to Identify the Changes in Vascular Structure	89
5.1	Introduction	89
5.2	Methods and model	92
5.2.1	Pre-processing	92
5.2.2	Gumbel PDF based MF for Segmentation	93
5.2.3	BRISK Feature base Registration	97
5.2.3.1	Feature Points Detection	97

5.2.3.2	Feature Points descriptor	99
5.2.3.2.1	Pattern Sampling	100
5.2.3.2.2	Rotation Estimation and Construction of De- scriptor	101
5.2.3.3	Feature Matching and Transformation Model Estimation	101
5.3	Results and Performance Analysis	105
5.4	Conclusion	108
6	Conclusions and scope for future work	109
6.1	Conclusions	109
6.2	Scope for future work	112
	References	113
