

## LIST OF TABLES

	<b>Page No.</b>
<b>1.1</b> The most common Air pollutants, their major sources and abundance	<b>2</b>
<b>1.2</b> Typical lists of VOCs	<b>3</b>
<b>1.3</b> Main technical characteristics of biological treatment methods	<b>7</b>
<b>1.4</b> Biodegradability of different gases	<b>9</b>
<b>3.1</b> The chemical and physical properties of target VOCs of present study	<b>30</b>
<b>4.1</b> Initial characteristics of PVA/Compost /KNO <sub>3</sub> composite beads	<b>37</b>
<b>4.2</b> Experimental scheme for continuous benzene, toluene and xylene Biodegradation	<b>39</b>
<b>4.3</b> Experimental scheme for continuous BTX biodegradation	<b>43</b>
<b>5.1</b> Initial characteristics of PVA/Wood charcoal/KNO <sub>3</sub> composite beads	<b>50</b>
<b>5.2</b> Experimental scheme for continuous MEK, Toluene and xylene biodegradation	<b>52</b>
<b>5.3</b> Experimental scheme for continuous MTX biodegradation	<b>55</b>
<b>6.1</b> Physicochemical characteristics of (PVA/Compost/KNO <sub>3</sub> ) composite bead	<b>61</b>
<b>6.2</b> Operating conditions of each phase in the bio filter experiments for Styrene	<b>62</b>
<b>7.1</b> Physico-chemical characteristics of PVA/Charcoal + Compost /KNO <sub>3</sub> composite beads	<b>68</b>
<b>7.2</b> Operating conditions of each phase in the bio filter experiments for Styrene	<b>69</b>
<b>8.1</b> VOCs tested against various modified media and their respective performances	<b>74</b>
