|  |       |
|--|-------|
| <b>Chapter 1: Introduction</b>                 | 1-12  |
| 1.1 Crystal Structure of ZnO                   | 2     |
| 1.2 Physical Properties and Applications       | 5     |
| 1.2.1 Piezoelectric Properties                 | 5     |
| 1.2.2 Electrical Properties                    | 7     |
| 1.2.3 Optical Properties                       | 9     |
| 1.2.4 Magnetic Properties                      | 10    |
| 1.2.5 Sensing Properties                       | 10    |
| 1.2.6 Other Applications                       | 11    |
| <b>Chapter 2: Literature Review</b>            | 13-40 |
| 2.1 Synthesis of ZnO                           | 13    |
| 2.1.1 Hydrothermal Technique                   | 14    |
| 2.1.2 Co-precipitation Technique               | 16    |
| 2.1.3 Sol-gel Technique                        | 17    |
| 2.1.4 Combustion Technique                     | 18    |
| 2.2 Native Defects in ZnO                      | 18    |
| 2.2.1 Green Light Emission in ZnO              | 20    |
| 2.2.2 n-Type Conduction in ZnO                 | 23    |
| 2.2.3 Ferromagnetism in ZnO                    | 24    |
| 2.3 Doping and/or Codoping in ZnO              | 26    |
| 2.3.1 Optical Properties of Doped/Codoped ZnO  | 28    |
| 2.3.2 Magnetic Properties of Doped/Codoped ZnO | 31    |
| 2.4 Ceramic Composites                         | 35    |
| 2.4.1 ZnO Based Ceramic Composites             | 36    |
| 2.4.2 ZnO Based Spinel Composite               | 37    |
| 2.5 Objectives of the Present Work             | 40    |
| <b>Chapter 3: Experimental</b>                 | 41-60 |
| 3.1 Synthesis of ZnO nanoparticles             | 41    |
| 3.1.1 Co-precipitation Technique               | 41    |

|   |  |        |
|---|--|--------|
| 3.1.2   | Sol-gel Technique  | 43     |
| 3.1.3   | Combustion Technique   | 45     |
| 3.2   | Synthesis of Mg/Co Doped or Mg and Co Codoped ZnO                | 47     |
| 3.3   | Synthesis of ZnO(%)-SrAl <sub>2</sub> O <sub>4</sub> Composites  | 49     |
| 3.4   | Characterisation Techniques                                      | 51     |
| 3.4.1   | X-ray Diffraction ( <i>XRD</i> )                                 | 51     |
| 3.4.2   | Raman Spectroscopy   | 52     |
| 3.4.3   | Fourier Transform Infrared Spectroscopy ( <i>FTIR</i> )          | 52     |
| 3.4.4   | Transmission Electron Microscopy ( <i>TEM</i> )                  | 53     |
| 3.4.5   | Scanning Electron Microscopy ( <i>SEM</i> )                      | 54     |
| 3.4.6   | Energy Dispersive Spectroscopy ( <i>EDS/EDX</i> )                | 54     |
| 3.4.7   | Thermogravimetry-Differential Thermal Analysis ( <i>TG-DTA</i> ) | 55     |
| 3.4.8   | X-ray Photoelectron Spectroscopy ( <i>XPS</i> )                  | 55     |
| 3.4.9   | UV-visible Spectroscopy  | 56     |
| 3.4.10  | Photoluminescence ( <i>PL</i> )                                  | 57     |
| 3.4.11  | Positron Annihilation Spectroscopy ( <i>PAS</i> )                | 58     |
| 3.4.12  | Thermoluminescence Spectroscopy ( <i>TL</i> )                    | 59     |
| 3.4.13  | SQUID Magnetometer   | 60     |
| <b>Chapter 4: Intrinsic Defects in ZnO: Synthesised by Various Techniques</b> |  | 61-101 |
| 4.1   | Co-precipitation   | 61     |
| 4.1.1   | Microstructural Studies by XRD & SEM                             | 61     |
| 4.1.2   | Detection of Vibrational Modes Using Raman Spectroscopy          | 68     |
| 4.1.3   | Optical Properties Using PL Spectroscopy                         | 72     |
| 4.1.4   | Detection of Cationic Defects by PAS                             | 75     |
| 4.2   | Sol-gel  | 78     |
| 4.2.1   | Microstructural Studies by XRD & SEM                             | 78     |
| 4.2.2   | Detection of Vibrational Modes Using                             |        |

|  |  |                    |
|--|--|--------------------|
|  | Raman Spectroscopy   | 81                 |
|  | 4.2.3 Optical Properties Using PL Spectroscopy                   | 84                 |
|  | 4.2.4 Detection of Cationic Defects by PAS                       | 86                 |
| <b>4.3</b>   | <b>Combustion</b>  | <b>88</b>          |
|  | 4.3.1 Thermal Analysis   | 88                 |
|  | 4.3.2 Microstructural Studies by XRD & SEM                       | 89                 |
|  | 4.3.3 Detection of Vibrational Modes Using<br>Raman Spectroscopy | 92                 |
|  | 4.3.4 Optical Properties Using PL Spectroscopy                   | 95                 |
|  | 4.3.5 Detection of Cationic Defects by PAS                       | 97                 |
| <b>4.4</b>   | <b>Conclusions</b>   | <b>100</b>         |
| <br><b>Chapter 5: Effect of Doping and Codoping on Microstructure<br/>and Physical Property of ZnO</b>   |  | <br><b>102-128</b> |
| <b>5.1</b>   | <b>Mg Doped ZnO</b>  | <b>102</b>         |
|  | 5.1.1 Microstructure   | 102                |
|  | 5.1.2 Optical Properties   | 106                |
|  | 5.1.3 Detection of Vibrational Modes                             | 107                |
|  | 5.1.4 Detection of Cationic Defects                              | 110                |
|  | 5.1.5 Chemical Bonding   | 111                |
| <b>5.2</b>   | <b>Co/Mg Doped and Co, Mg Codoped ZnO</b>                        | <b>114</b>         |
|  | 5.2.1 Microstructure   | 114                |
|  | 5.2.2 Optical Properties   | 116                |
|  | 5.2.3 Detection of Vibrational Modes                             | 118                |
|  | 5.2.4 Magnetic Properties  | 123                |
|  | 5.2.5 Detection of Cationic Defects                              | 125                |
| <b>5.3</b>   | <b>Conclusions</b>   | <b>127</b>         |
| <br><b>Chapter 6: Hexagonal to Monoclinic Structural Transformation and<br/>Anomalous Luminescent Properties in ZnO and SrAl<sub>2</sub>O<sub>4</sub><br/>composites</b> |  | <br><b>129-153</b> |
| <b>6.1</b>   | <b>Thermal Analysis</b>  | <b>129</b>         |
| <b>6.2</b>   | <b>Microstructural Studies</b>                                   | <b>130</b>         |
