	List of Figures	Page
		No.
Fig. 1.1	Stability.	12
Fig. 1.2	Asymptotic stability.	12
Fig. 2.1	Projections of phase portraits of Qi attractor: (a) in x-y-z space (b) in x-y plane (c) in y-z plane (d) in x-z plane for $\alpha = 0.93$ and $(p,q,r)=(35,8/3,80)$.	45
Fig. 2.2	Projections of phase portraits of Genesio-Tesi attractor: (a) in x-y-z space (b) in x-y plane (c) in y-z plane (d) in x-z plane for $\alpha = 0.96$ at $(a,b,c,m) = (6,2.92,1.2,1)$.	46
Fig. 2.3	State trajectories of drive system (2.3) and response system (2.4) between state vectors and evolution of error vectors for the fractional-order α =0.92.	49-50
Fig. 2.4	State trajectories of systems (2.9) and (2.10) between state vectors and evolution of error vectors for the fractional-order α = 0.96.	52-53
Fig. 2.5	Plots of state trajectories of systems (2.9) and (2.4) between state vectors and evolution of error vectors for the fractional-order α =0.96.	55-56
Fig. 3.1.1	The chaotic attractors of the generalized SIR model (3.1.4): (a) for fractional order α = 0.99; (b) for α = 0.975.	65
Fig. 3.1.2	The state trajectories of systems (3.1.11) and (3.1.12) between state vectors and evolution of error vectors for the fractional-	69-70

order $\alpha = 0.99$.

- Fig. 3.1.3 The state trajectories of systems (3.1.11) and (3.1.12) between 70-71 state vectors and evolution of error vectors for the fractional-order α =0.975
- Fig. 3.2.1 The trajectories of susceptible, infected and pathogen 81-82 concentration with respect to time *t* for $\mu = 2, \beta_W = 0.6217, \beta_I = 0.6217, \text{ and } \alpha = 0.8, 0.9, 1.$
- Fig. 3.2.2 The trajectories of susceptible, infected and pathogen 83-84 concentration with respect to time *t* for $\mu = 1, \beta_W = 0.6217, \beta_I = 0.6217, \gamma = 0.1340, \xi = 0.333, T = 0.7$ and $\alpha = 0.8, 0.9, 1$.
- Fig. 4.1 Phase portraits of Advanced Lorenz system in *x-y-z* space. 93
- Fig. 4.2 Phase portraits of Multiple delay Rössler system in *x-y-z* 94 space
- Fig. 4.3 Phase portrait of time-delayed feedback Chua's oscillator in 95-96 *x-y-z* space for different sets of parameters: (a) $\varepsilon = 0.07$ and $\sigma = 0.4$, (b) $\varepsilon = 0.2$ and $\sigma = 2$, (c) $\varepsilon = 0.5$ and $\sigma = 3$ and (d) $\varepsilon = 1$ and $\sigma = 1$.
- Fig. 4.4 State trajectories of drive system (4.9) and response system 98-99 (4.10) between state vectors and evolution of error vectors.
- Fig. 4.5 The estimated parameter vectors of time-delayed advanced 100 Lorenz systems.

- Fig. 4.6State trajectories of drive system (4.11) and response system102-(4.12) between state vectors and evolution of error vectors.103
- Fig. 4.7 State trajectories of estimated parameter vectors drive system 104 (4.11) and response system (4.12).
- Fig. 4.8State trajectories of drive system (4.13) and response system107-(4.14) between state vectors and evolution of error vectors.108
- Fig. 4.9 State trajectories of estimated parameter vectors of drive 108 system (4.13) and response system (4.14).
- Fig. 5.1 Phase portraits of Rössler system in $x_1(t) x_2(t) x_3(t)$ space. 114
- Fig. 5.2 (a) State trajectories of errors system and (b) The estimated 118 parameters obtained by using the proposed method for the initial conditions of drive and response systems as (0.5, 1, 1.5) and (2.5, 2, 2.5) respectively.
- Fig. 5.3 (a) State trajectories of errors system and (b) The estimated 119 parameters obtained by using the method described by Sudheer and Sabir (2011) for the initial conditions of drive and response systems as (0.5, 1, 1.5) and (2.5, 2, 2.5) respectively.
- Fig. 5.4 (a) State trajectories of errors system and (b) The estimated 120 parameters obtained by using the proposed method for the initial conditions of drive and response systems as (1, 1, 1) and (1.5, 1.5, 1.5) respectively.
- Fig. 5.5 (a) State trajectories of errors system and (b) The estimated 121

parameters obtained by using the method described by Sudheer and Sabir (2011) for the initial conditions of drive and response systems as (1, 1, 1) and (1.5, 1.5, 1.5) respectively.

- Fig. 5.6 (a) State trajectories of errors system and (b) The estimated 122 parameters obtained by using the proposed method for scaling functions $\lambda_1(t) = 1 + \cos(0.05t)$, $\lambda_2(t) = 2 \sin(t)$ and $\lambda_3(t) = 3 + \cos(t + 10)$ and the initial conditions of drive and response systems as (2.5, 2, 2.5) and (0.5, 1, 1.5) respectively.
- Fig. 5.7 (a) State trajectories of errors system and (b) The estimated 123 parameters obtained by using the method described by Sudheer and Sabir (2011) for scaling functions $\lambda_1(t) = 1 + \cos(0.05t), \ \lambda_2(t) = 2 \sin(t) \ \text{and} \ \lambda_3(t) = 3 + \cos(t+10)$ and the initial conditions of drive and response systems as (2.5, 2, 2.5) and (0.5, 1, 1.5) respectively.
- Fig. 6.1 Phase portraits of the fractional-order T-system for 130 commensurate fractional orders (a) $(\alpha_1, \alpha_2, \alpha_3) =$ (0.95, 0.95, 0.95) (b) $(\alpha_1, \alpha_2, \alpha_3) = (0.92, 0.92, 0.92)$ in x-y-z space.
- Fig. 6.2 Phase portraits of the fractional-order T-system system with 132 incommensurate fractional orders at (a) $(\alpha_1, \alpha_2, \alpha_3) = (1, 1, 0.90)$ (b) $(\alpha_1, \alpha_2, \alpha_3) = (0.93, 0.99, .91)$ (c) $(\alpha_1, \alpha_2, \alpha_3) = (0.93, 0.95, 0.96)$ and (d) asymptotic stable at $(\alpha_1, \alpha_2, \alpha_3) = (1, 1, 0.70).$

Fig. 6.3	State trajectories of the controlled chaotic system (6.3).	134
Fig. 6.4	The error states of the FPS between the systems (6.4) and (6.5) for $\alpha = 0.96$ and $\beta = 0.97$.	136
Fig. 6.5	Root mean square error (RMSE) for $\alpha = 0.96$ and $\beta = 0.97$.	136
Fig. 6.6	The error states of the FPS between the systems (6.4) and (6.5) for $\alpha = 1$ and $\beta = 1$.	137
Fig. 6.7	Root mean square error (RMSE) for $\alpha = 1$ and $\beta = 1$.	137
Fig. 6.8	The error states of the FPS between the systems (6.4) and (6.9) for $\alpha = 0.96$ and $\beta = 0.995$.	139
Fig. 6.9	Root mean square error (RMSE) for $\alpha = 0.96$ and $\beta = 0.995$.	139
Fig. 6.10	The error states of the FPS between the systems (6.4) and (6.9) for $\alpha = 1$ and $\beta = 1$.	140
Fig. 6.11	Root mean square error (RMSE) for $\alpha = 1$ and $\beta = 1$.	140
Fig. 7.1	Phase portrait of Qi system for $\alpha = 0.915$.	146
Fig. 7.2	Phase portrait of Genesio-Tesi system for $\alpha = 0.93$.	147
Fig. 7.3	Phase portrait of uncertain Genesio-Tesi system for $\alpha = 0.95$.	150
Fig. 7.4	Phase portrait of uncertain chaotic Qi system for $\alpha = 0.93$.	151
Fig. 7.5	Phase synchronization for fractional order $\alpha = 0.95$.	153
Fig. 7.6	The evolution of the error functions of uncertain chaotic systems.	154

 $\sim v \sim$

Fig. 7.7	The evolution of the error functions of chaotic systems.	154
Fig. 7.8	Anti-phase synchronization for fractional order $\alpha = 0.95$.	156
Fig. 7.9	The evolution of the error functions of uncertain chaotic systems.	157
Fig. 7.10	The evolution of the error functions of chaotic systems.	157
