## CONTENTS

Certificate .....	II
Declaration by the Candidate .....	III
Copyright Transfer Certificate .....	IV
Dedication.....	V
Acknowledgments .....	VI
Contents .....	VII
List of Figures .....	VIII
List of Tables .....	IX
List of Symbols and Abbreviations .....	X
Preface.....	XI

## Chapter 1: INTRODUCTION

1.1 Medicinal plants ( <i>Adhatoda Beddomei</i> ) .....	01
1.2 <i>Adhatoda beddomei</i> - Scientific classification .....	02
1.3 <i>Adhatoda beddomei</i> : Chemical constituent's .....	03
1.4 Medicinal uses .....	03
1.5 Endophytes .....	04
1.6 Secondary bioactive metabolites .....	05
1.7 Why to focus research on endophytic bacteria in <i>Adhatoda beddomei</i> .....	06
1.8 Aims and objectives of the studies .....	07
1.9 Various research work was carried out with the given objectives .....	07

## Chapter 2: LITERATURE REVIEW

2.1 <b>Endophytes</b> .....	10
2.1.1. Types of Endophytes.....	14
2.1.2. Attachment of bacterial endophytes to the surface of the host plant .....	16
2.1.3. Entry of Bacterial Endophytes into the Host Plant.....	17
2.1.4. Colonization Cycle of Bacterial Endophytes in the Host Plant ...	18
2.2 <b>Benefit of Endophytes</b> .....	26
2.2.1. Nitrogen Fixation .....	27
2.2.2. Endophytes improve Bioremediation .....	28
2.2.3. Hydrogen Cyanide Production .....	29
2.2.4. Different Antibiotics Production .....	30
2.2.5. Production of some Volatile Antibiotics by Endophytes .....	37
2.2.6. Control of Plant Stress (Increment of Drought Resistance) .....	41

2.2.7. Industrial enzymes production by endophytes .....	42
2.2.8. Enzymes Quantification .....	48
2.2.9. Products from Endophytes bacteria as Antioxidants .....	51
2.2.10. Products from Endophytes bacteria as Anticancer Compounds.	51
2.2.11. Products from Endophytes bacteria as Antimicrobial Compounds .....	57
2.2.12. Endophytes as biofertilizers .....	59
<b>2.3 Secondary bioactive metabolites .....</b>	<b>60</b>
2.3.1. Primary and Secondary metabolism .....	64
2.3.2. Sources of secondary metabolites .....	64
2.3.3. Secondary metabolites work as a Hydrolytic enzyme and quorum Sensing inhibitors .....	68
2.3.4. Different Antithrombotic Activity of secondary bioactive metabolites.....	69
2.3.5. Different Antiviral activity of secondary bioactive metabolites...	70
2.3.6. Antitubercular activities of secondary bioactive metabolites .....	71
2.3.7. Different cytotoxicity activity of secondary bioactive metabolites.	72
2.3.8. Different Bioactivities of Microbial Secondary Metabolites .....	73
2.3.9. Some other secondary metabolites (Alkaloid group) .....	79
2.3.10. Phytohormones and defense enzymes .....	82
2.3.11. Inspired modulation by endophytic bacteria to produce secondary Metabolites .....	83
2.3.12. Bioactive compounds produced by microbes are more convenient than plants .....	84
2.3.13. Role of endophytes in Agriculture .....	85

## Chapter 3: MATERIALS AND METHODS

3.1 Sampled sites and plants .....	86
<b>3.2 Isolation of Entophytes Bacteria .....</b>	<b>86</b>
3.2.1. Surface sterilization .....	86
3.2.2. Sterility check .....	89
3.2.3. Endophytic bacteria isolation, purification and preservation .....	89
3.2.4. Steps to avoid contamination .....	90
3.2.5. Morphological Identification of Endophyte Bacteria .....	91
<b>3.3 Cultivation and Crude Metabolite Extraction at Small Scale .....</b>	<b>92</b>
3.3.1 Antimicrobial Activity of Bioactive metabolites against Different Microorganisms .....	94
3.3.2 Determination of minimum inhibitory concentration (MIC) Assay.	95
3.3.3 Large scale Fermentation and metabolite production .....	96
3.3.4 Extraction of Microbial Metabolites .....	96
<b>3.4 Optimization conditions of Bioactive Microbial metabolites Production...</b>	<b>98</b>
3.4.1 Effects of different carbon sources on antimicrobial Metabolites Production .....	98
3.4.2 Effects of different Glucose concentration on antimicrobial Metabolites Production .....	99

3.4.3 Effects of different nitrogen source on antimicrobial metabolites	
Production .....	100
3.4.4 Effect of different NaNO <sub>3</sub> concentration on biomass and bioactive	
Metabolite production .....	100
3.4.5 Effect of different p <sup>H</sup> on the production of bioactive metabolites ...	101
3.4.6 Effect of different incubation temperature (°C) on the production	
of bioactive metabolites and cells biomass formation.....	101
3.4.7 Effect of Incubation Period on Biomass and Bioactive	
Metabolite Production .....	102
3.4.8 Optimization of culture conditions by response surface	
Methodology (RSM) .....	102
<b>3.5 Fractionation of crude Extract .....</b>	<b>105</b>
3.5.1 Thin-layer chromatography (TLC) .....	108
<b>3.6 Spectroscopic Measurements .....</b>	<b>110</b>
3.6.1 Infrared Spectroscopy (IR) .....	111
3.6.2 Nuclear Magnetic Resonance (NMR) .....	111
3.6.2.1 <sup>1</sup> H NMR .....	112
3.6.2.2 <sup>13</sup> C NMR .....	112
3.6.3 Mass Spectrometry .....	112
3.6.4 Analytical high-pressure liquid chromatography .....	113
3.6.5 UV-absorption spectrum .....	115

## Chapter 4: RESULTS

4.0 Isolation of Endophytic bacteria .....	116
4.1 Minimum Inhibitory Concentration (MIC) .....	126
4.2 Morphological Identification of Isolate EFB-03 .....	127
<b>4.3 Media optimization .....</b>	<b>129</b>
4.3.1 Effect of different carbon sources for the production of Bioactive metabolites .....	129
4.3.2 Effect of different Glucose concentration on the production of bioactive metabolites .....	131
4.3.3 Effect of different Nitrogen sources for the production of bioactive metabolites .....	132
4.3.4 Effect of different NaNO <sub>3</sub> concentration on the production of bioactive metabolites and cell biomass formation .....	133
4.3.5 Effect of different pH for the production of bioactive Metabolites and cell biomass formation .....	134
4.3.6 Effect of different incubation temperature (°C) on the production of bioactive metabolites and cell biomass formation .....	136
4.3.7 Effect of different incubation periods on the production of bioactive metabolites and cell biomass formation: .....	137
<b>4.4 Response surface methodology .....</b>	<b>139</b>
<b>4.5 Column Chromatography .....</b>	<b>147</b>
<b>4.6 Purification of crude extract by TLC .....</b>	<b>148</b>
<b>4.7 Structural characterization of bioactive metabolites .....</b>	<b>149</b>
4.7.1 <sup>1</sup> H and <sup>13</sup> C of Compound 01 .....	149
4.7.2 Mass Spectrum analysis of compound 01 .....	152

4.7.3 Fourier transform infrared (FT-IR) spectroscopy of compound 01 .....	153
4.7.4 $\lambda$ max analysis through UV spectrophotometer of compound 01 .....	154
4.7.5 HPLC spectrum analysis of fraction 01 .....	155
4.7.6 Elucidation of the structure of the isolated fraction 01 .....	156
<b>4.8.1 <math>^1\text{H}</math> and <math>^{13}\text{C}</math> of Compound 02 .....</b>	<b>157</b>
4.8.2 Mass Spectrum analysis of compound 02 .....	159
4.8.3 Fourier transform infrared (FT-IR) spectroscopy of fraction 02 .....	160
4.8.4 $\lambda$ max analysis through UV spectrophotometer of compound 02 .....	162
4.8.5 HPLC spectrum analysis of compound 02 .....	163
4.8.6 Elucidation of the structure of the isolated compound 02 .....	164
<b>4.9.1 Compound 03 .....</b>	<b>165</b>
4.9.2 Mass Spectrum analysis of compound 03 .....	168
4.9.3 Fourier transform infrared (FT-IR) spectroscopy of compound 03.....	169
4.9.4 $\lambda$ max analysis through UV spectrophotometer of compound 03 .....	170
4.9.5 HPLC spectrum analysis of compound 03 .....	171
4.9.6 Elucidation of the structure of the isolated compound 03 .....	172
 <b>Chapter 5: CONCLUSIONS .....</b>	 <b>173</b>
 <b>REFERENCES .....</b>	 <b>177</b>
 <b>LIST OF PAPER PUBLISHED .....</b>	 <b>227</b>

## LIST OF FIGURES

Figure	Captions	Page No
Figure 2.1	Total % of medicine given by the United States Food and Drug Administration	12
Figure 2.2	Types of endophytes and their root colonization process	14
Figure 2.3	Schematic diagram of the different plant–bacterial endophyte interactions that have been studied and their applications	18
Figure 2.4	Hypothesized colonization cycle of different bacterial endophytes in the host plant.	20
Figure 2.5	Nitrogen-fixing bacteria transform atmospheric nitrogen into fixed nitrogen.	27
Figure 2.6	Diagrammatic image of the isolation, fermentation and quantification of enzymes.	50
Figure 2.7	Some structures obtained from endophytic microorganisms.	54
Figure 2.8	Different bioactive metabolites produced in different years.	57

<b>Figure 2.9</b>	Percentage of Natural products (N) i.e. therapeutic agents or drug entities approved by the USFDA from the past 34 years (January 1981– December 2014).	62
<b>Figure 2.10</b>	Schematic diagram representing unification of secondary and primary metabolism.	63
<b>Figure 2.11</b>	Structures of alkaloids vinblastine (a), quinine (b) and reserpine (c)	77
<b>Figure 2.12</b>	Structures of flavonoids quercetin (a) and kaempferol (b).	78
<b>Figure 2.13</b>	Structures of terpenoids (a) prenil and $\alpha$ -bisabolol (b).	79
<b>Figure 3.1</b>	Schematic diagram of surface sterilization process of root sample.	88
<b>Figure 3.2</b>	schematic diagram of isolation of endophytes bacteria form plant root and production of bioactive metabolites from endophytic bacteria.	93
<b>Figure 3.3</b>	Flow chart of Extraction of Bioactive Metabolites	97
<b>Figure 3.4</b>	Different stages of column chromatography during fractionation of crude metabolite.	107
<b>Figure 3.5</b>	TLC of Ten fractionated compounds.	110
<b>Figure 4.1</b>	Anti- property of bioactive metabolites of endophyte bacteria (EFB-02) against different bacteria.	118

<b>Figure 4.2</b>	Anti-property of bioactive metabolites of endophytes bacteria (EFB-03) against different bacteria with control.	119
<b>Figure 4.3</b>	Anti-property of bioactive metabolites of endophytes bacteria (EFB-06) against different bacteria.	120
<b>Figure 4.4</b>	Anti-property of bioactive metabolites of endophytes bacteria (EFB-03) against different fungus.	121
<b>Figure 4.5</b>	Bioactive metabolites of 2 strains (EFB-03 and EFB-06) were tested against 24 human pathogenic bacteria's (In each plate, we took 04 pathogenic bacteria).	125
<b>Figure 4.6</b>	Image of endophytes bacteria (EFB-03) taken by scanning electron microscope (SEM).	128
<b>Figure 4.7</b>	Effect of different Carbon sources on for the production of bioactive metabolites.	129
<b>Figure 4.8</b>	Production of bioactive metabolites and formation of cell biomass at various glucose concentrations.	131
<b>Figure 4.9</b>	Effect of different nitrogen sources on antimicrobial metabolites production.	132
<b>Figure 4.10</b>	Effect of various concentration of $\text{NaNO}_3$ on production of antimicrobial metabolite.	134
<b>Figure 4.11</b>	Effect of initial pH on antimicrobial bioactive metabolites production	135
<b>Figure 4.12</b>	Effect of different incubation temperature on production of antimicrobial metabolite.	137
<b>Figure 4.13</b>	Effect of different incubation period on antimicrobial metabolites production	138

<b>Figure 4.14</b>	Response surface plots (3-dimensional view) showing interactive effects of selective variables on cell biomass formation.	140
<b>Figure 4.15</b>	Contour plots of cell biomass formation of Endophyte bacterial isolate.	144
<b>Figure 4.16</b>	<sup>1</sup> H NMR spectrum of the compound 01 from isolated endophyte bacteria.	150
<b>Figure 4.17</b>	<sup>13</sup> C NMR spectrum of the isolated compound 01 from endophytes bacteria.	151
<b>Figure 4.18</b>	Mass spectroscopy analysis of compound 01.	152
<b>Figure 4.19</b>	FTIR spectrum of the isolated compound 01.	154
<b>Figure 4.20</b>	λ max analysis of compound 01 from isolated endophyte bacteria.	155
<b>Figure 4.21</b>	HPLC analysis of the compound 01.	156
<b>Figure 4.22</b>	expected structure and IUPSC name of compound 01: (E)-N1-((E)-18-amino-3-hydroxy-9-methyl-18-oxo-1-(((2R, 3R, 4S, 5S, 6R)-3, 4,5-trihydroxy-6-(hydroxymethyl) tetrahydro-2H-pyran-2-yl) oxy) octadec-4-en-2-yl)-2-Hydroxyhexadec-3enediamide	157
<b>Figure 4.23</b>	<sup>1</sup> H NMR spectrum of the isolated compound 02.	158
<b>Figure 4.24</b>	<sup>13</sup> C NMR spectrum of the isolated compound 02.	159
<b>Figure 4.25</b>	Mass spectroscopy analysis of compound 02.	160

## LIST OF TABLES

Table	Heading	Page no
Table 2.1	The colonization outline and growth-promoting characteristics of bacterial endophytes in different plant species are presented	26
Table 2.2	List of novel antibiotics produced by endophytic bacteria and their reported activities.	36
Table 2.3	List of some Volatile Antibiotics produce by Endophyte microbes.	41
Table 2.4	List of Enzyme produced by different endophytes microbes.	48
Table 2.5	Approximate number of known natural metabolites.	66
Table 2.6	List of some important secondary metabolites produced by microbes.	76
Table 2.7	Metabolites of endophytic microbes having antifungal activity Terpenoids and steroids Groups.	81
Table 3.1	Experimental range of factors studied using RSM in terms of coded and actual factors.	104

<b>Table 3.2</b>	Summary of the specifications of the main parts for the semi-preparative HPLC.	114
<b>Table 4.1</b>	Zone of inhibition (mm) of bioactive metabolites (aqueous crude extracts) of 07 endophytic bacteria against different bacteria.	117
<b>Table 4.2</b>	Zone of inhibition (mm) of bioactive metabolites (aqueous crude extracts) of 07 endophytic bacteria in against different fungus.	121
<b>Table 4.3</b>	Antibacterial activity of Bioactive metabolites against different human pathogenic bacteria.	124
<b>Table 4.4</b>	The minimum inhibitory concentration (MIC) of the crude metabolites against different bacteria and fungus produced by isolate EFB-03.	127
<b>Table 4.5</b>	Analysis of variance (ANOVA) for response surface quadratic model obtained from experimental designs.	142
<b>Table 4.6</b>	Experimental design and results of optimization of nutrient medium for the formation of cell biomass of Endophytes bacteria (EFB-03) by the central composite design.	147
<b>Table 4.7</b>	IR absorption frequencies of functional groups in compound 01.	153

<b>Table 4.8</b>	IR absorption frequencies of functional groups in compound 02.	162
<b>Table 4.9</b>	IR absorption frequencies of functional groups in compound 03.	170

## LIST OF SYMBOLS AND ABBREVIATIONS

Symbols and Abbreviations	Name
MEA	Malt extract agar
CZ	Czapek dox agar
MS	Mass Spectrometry
%	Percentage
DMSO	Di-methyl Sulphoxide
NAM	Nutrient Agar media
$^{\circ}\text{C}$	Degree Celsius
$\mu\text{g}$	Microgram
$\mu\text{L}$	Microliter
$\mu\text{M}$	Micromolar
CFS	Cell free supernatant
CFU	colony forming units
CLSI	Clinical and Laboratory Standards Institute
cm	Centimeter

Cons.	Concentration
NMR	Nuclear Magnetic Resonance
IUPSC	International Union of Pure and Applied Chemistry (IUPAC)
Mg	milligram
Min	Minutes
mL	Milliliter
mm	Millimeter
MRS	De man Rogosa Sharpe medium
nm	Nanometer
OD	Optical density
OD600	Absorbance at 600 nm
psig	Pounds per square inch gage
AWP	Supplemented Whey Permeate
sp.	Species
RPM	Revolutions per minute
RDA	Recommended Dietary Allowance
UV	Ultra violet

v/v	volume/volume
w/v	Weight/volume
YPG	Yeast Peptone Glucose medium
