

LIST OF TABLES

	Page No.
Table 1.1 - Potential automotive applications of Metal-Matrix Composites	25
Table 1.2 - Selected reinforcements used in automotive components of AMCs	28
Table 1.3 - Ambient temperature tensile properties of selected cast AMCs	29
Table 1.4 - Comparison of cost of stir casting, squeeze casting and powder metallurgy technique	34
Table 2.1 - Chemical composition of AA5052 alloy	45
Table 2.2 - Amount of inorganic salts used to synthesize different composites	47
Table 2.3 - Actual vol. % ZrB ₂ in composites	50
Table 3.1 - Average grain size, density and porosity of the base alloy and composites	63
Table 3.2 - Mechanical properties of base alloy and composites	70
Table 3.3 - Significance and values of symbols used in calculating strengthening mechanisms	76
Table 3.4 - Experimental yield strength and contribution of different strengthening mechanisms to yield strength of AA5052/ZrB ₂ composites	81
Table 6.1 - Comparison of tensile properties with previous studies on AMCs	128
Table 6.2 - Comparison of wear properties with previous studies	129
Table 6.3 - Comparison of COF with previous studies	129
