

LIST OF TABLES

	TABLE	Page No.
Chapter 2	Literature Review: Processing, Structural, Mechanical and Electrochemical Behavior of Metal Matrix Composites	16
2.1	Compression properties of: Cu– 20% coated SiC, Cu–20% SiC, Cu– 20% coated Al ₂ O ₃ , and Cu –20% Al ₂ O ₃ composites	31
2.2	Mechanical properties of composites reinforced with SiC of different sizes	37
Chapter 4	Synthesis and Characterization Methods	50
4.1	Compositions of Fe-Al ₂ O ₃ metal matrix nanocomposite specimen	51
4.2	Compositions of Fe- Al ₂ O ₃ -CoO metal matrix nanocomposite specimen	51
4.3	Compositions of Fe-Al ₂ O ₃ -CeO ₂ metal matrix nanocomposite specimen	52
4.4	Compositions of Fe- Al ₂ O ₃ -ZrO ₂ hybrid metal matrix nanocomposite specimen	52
4.5	Rockwell Hardness Scales	61
Chapter 5	Sintering and Hardness Behavior of Fe-Al₂O₃ Metal Matrix Nanocomposites	85
5.1	Nomenclature of Specimens	86
Chapter 6	Wear and Deformation Characteristics of Fe-Al₂O₃ Metal Matrix Nanocomposites	116
6.1	Wear rate at different loads for Fe-5% Al ₂ O ₃ specimens	117
6.2	Wear rate of different specimens at different loads for Fe-10% Al ₂ O ₃ specimens	132
6.3	Friction Force of different specimens at different loads for Fe-10% Al ₂ O ₃ specimens	135
6.4	Theoretical and Experimental densities of the deformed specimens	177
Chapter 7	Studies on Structural and Mechanical Characterization of CoO and CeO₂ Doped Fe-Al₂O₃ Metal Matrix Nanocomposites	179
7.1	Green, Sintered Density and Hardness of CoO doped specimens	185
7.2	Green Density, Sintered Density and Hardness of CeO ₂ doped specimens	203

Chapter 8	Studies on Structural and Mechanical Characterization of Fe- Al₂O₃-ZrO₂ Hybrid Metal Matrix Nanocomposites	211
8.1	Nomenclature of the 2.5Zr2.5AFe Hybrid Metal Matrix Nanocomposites	212
8.2	Nomenclature of the 3.5Zr1.5AFe Hybrid Metal Matrix Nanocomposites	212
8.3	Wear rate values of different 2.5Zr2.5AFe specimens at different loads	231
8.4	Wear rate values of different 3.5Zr1.5AFe specimens at different loads	253
Chapter 9	Corrosion Behavior of Fe-Al₂O₃ Metal Matrix Nanocomposites	261
9.1	E _{corr} , corrosion rate, I _{corr} and anti-corrosive efficiency (μ _p) values for the various 5% Al ₂ O ₃ reinforced specimens	264
9.2	E _{corr} , corrosion rate, I _{corr} and anti-corrosive efficiency (μ _p) values for the various 10% Al ₂ O ₃ reinforced specimens	274
9.3	E _{corr} , corrosion rate, I _{corr} and anti-corrosion efficiency (μ _p) values for the CoO doped specimens	286
9.4	Elemental profile of various constituents of pure iron specimen after corrosion	290
9.5	Elemental Profile of various constituents of 10AFe0.5Co1100(1) specimen after corrosion	292
9.6	Elemental Profile of full frame 10AFe1.0Co1100(1) specimen after corrosion	296
9.7	Elemental Profile of various constituents of 10AFe1.0Co1100(1) specimen after corrosion	297
9.8	Elemental profile of full frame pure iron specimen with 0.5% CoO specimen after corrosion	300
9.9	E _{corr} , corrosion rate, I _{corr} and anti-corrosion efficiency (μ _p) values for the CeO ₂ doped specimens	302
