Acknowledgements			i-ii
Abstract			iii-v
List of Figures			vi-viii
List of Tables			ix
List Of Symbols And Abbreviations			x-xv
1 Introduction			**1-25**
1.1	**Motivation**		1
1.2	**Contribution of The Thesis**		3
1.3	**Organization Of The Thesis**		5
1.4	**Literature Survey**		7
	1.4.1	Buck Regulator	7
	1.4.2	Integer Order PID Controller	8
	1.4.3	Fractional Order Control	11
2 Basic Ideas of Fractional Calculus			**26-39**
2.1	**Integer Order Calculus**		28
2.2	**Riemann-Liouville Definition of Fractional calculus**		31
	2.2.1	Fractional Order Integral	31

2.2.2 Fractional Order Derivative 32
2.3 Caputo Definition Of Fractional Calculus 34
2.4 Grünwald–Letnikov Definition Of Fractional Calculus 35
2.5 Riemann-Liouville Fractional Definition For Complex Order Calculus 36
2.6 Laplace Transform Of Fractional Calculus 37
2.6.1 Laplace Transform Of Riemann-Liouville Definition 37
2.6.2 Laplace Transform Of Caputo Definition 38
2.6.3 Laplace Transform Of Grünwald–Letnikov Definition 38
2.7 Conclusion 39

3 Design and Analysis of Existing Fractional Order Controllers 40-59
3.1 First Generation CRONE Controller 43
3.1.1 Illustrative Example 44
3.2 Second Generation CRONE Controller 46
3.2.1 Illustrative Example 48
3.3 Third Generation CRONE Controller 50
3.3.1 Illustrative Example 52
3.4 Fractional Order Lead-Lag Controller 54
3.4.1 Illustrative Example 56
3.5 Conclusion 58

4 Improved Analytical Design of Fractional Order PI Controller for Non-Monotonic Phase Systems 60-75
4.1 Object Of Study 62
4.2 Proposed Method 64
4.3 Designing Of The FOPI And IOPID Controller 67
4.4 Results 70
4.5 Conclusion 75

5 Design of Fractional Order PD Controller for Non-Monotonic Phase System **76-92**

5.1 System Modeling 79

5.2 Basic Ideas of Fractional order PD Controller and its Design Specifications 81

5.3 Proposed Technique 83

5.3.1 Compensation Methodology 83

5.3.2 Fractional Order Proportional Derivative Controller 85

5.4 Illustrative Example 88

5.5 Conclusion 92

6 Frequency Domain Based Fractional Order Proportional Integral Derivative controller For Process Control Systems **93-117**

6.1 The design problem formulation of Fractional Order Proportional Integral Derivative Controller 97

6.2 Design Of Fractional Order Proportional Integral Derivative Controller 99

6.2.1 Non-Linear Minimization Problem 100

6.3 Illustrative Example-I 101

6.3.1 Results 103

6.3.1.1 Step Response Of Closed Loop System 103

6.3.1.2 Open Loop Frequency Response 104

6.3.1.3 Sensitivity Function 105

6.3.1.4 Complementary Sensitivity Function 106

6.4 Illustrative Example-II 109

6.4.1 Results 111

6.4.1.1 Step Response Of Closed Loop System 111

6.4.1.2 Open Loop Frequency Response 112

6.4.1.3 Sensitivity Function 113

6.4.1.4 Complementary Sensitivity Function 114

6.5 Conclusion 116

7 Design of Fractional Order Phase Shaper **118-132**

7.1 Modeling of Fractional Order Phase Shaper 121

7.1.1 Assumptions To Be Made In Design Process 121

7.1.2 Non-Linear Minimization Problem 124

7.2 Illustrative Example-I 125

7.3 Illustrative Example-II 128

7.4 Conclusion 131

8 Conclusions and Future Perspectives **133-137**

8.1 Conclusions 134

8.2 Future Scope of Work 137

References **138**

Appendix **153**
