
CONTENTS

	Page No.
List of Figures.....	vii
List of Tables.....	xiii
Preface.....	xv
Chapter 1: An Overview of Semi-Solid Processing	1-23
1.1 Introduction.....	1
1.2 Semi-solid Processing Techniques.....	2
1.2.1 Rheocasting.....	3
1.2.2 The cooling slope Process (CSP).....	7
1.2.3 Semi -Solid Rheocasting (SSR™ Casting).....	9
1.2.4 Strain Induced Melt Activation (SIMA) Process	10
1.2.5 Spray casting (Osprey process).....	12
1.2.6 Thixocasting process.....	14
1.2.7 Thixomoulding.....	15
1.3 Microstructures of Semi-solid Processed Alloys.....	15
1.3.1 Dendrite Fragmentation Mechanism.....	15
1.3.2 Micro/Macro Structure Analysis.....	16
1.4 Wear Characteristics of Semi-Solid processed Alloys.....	19

1.4.1 Adhesive Wear.....	19
1.4.2 Abrasive Wear.....	20
1.4.3 Corrosive Wear.....	22
1.4.4 Surface Fatigue wear	23
1.4.5 Cavitation.....	23

Chapter 2: Solidification of Liquid Distributed in its Matrix	25-51
2.1 Introduction.....	25
2.2 Experimental Details.....	26
2.2.1 Preparation of Al-10Cu alloy.....	26
2.2.2 Thermal cycling of as cast alloy.....	27
2.2.3 Microstructural examination.....	28
2.2.4 Wear testing.....	28
2.3 Results and discussion.....	29
2.3.1 Undercooling behaviour.....	29
2.3.2 Microstructural features.....	30
2.3.3 Wear characteristics of alloy.....	37
2.4 Conclusions.....	51

Chapter 3: Rheocasting of Al-10Cu Alloy and its tribological characteristics and surface topography	53-87
----------------------------------------------------------------------------------------------------------------	--------------

3.1 Introduction.....	53
-----------------------	----

3.2 Experimental Details.....	55
3.2.1 Preparation of alloy and wear samples.....	55
3.2.2 Rheocasting Procedure.....	55
3.2.3 Metallography and Mechanical Testing.....	56
3.2.4 Wear testing.....	56
3.3 Results and discussion.....	57
3.3.1 Microstructural Features.....	57
3.3.2 Mechanical Testing.....	64
3.3.3 Wear Characteristics	66
3.3.3.1 Effect of Process Variables	66
3.3.3.2 Load and sliding velocity	69
3.3.3.3 Morphology of worn-out surfaces.....	72
3.4 Conclusions.....	87

**Chapter 4: Microstructure and Tribological Characteristics of SIMA
Processed Alloy**

4.1 Introduction.....	89
4.2 Experimental Details.....	92
4.2.1 Preparation of metal mould casting	92
4.2.2 Solidification temperature range.....	93
4.2.3 Preparation of Stirred Metal Mould Casting	94
4.2.4 SIMA processing technique	94

4.2.5 Metallography procedures.....	95
4.2.6 Mechanical Testing	96
4.2.7 Wear testing procedures	97
4.3 Results and Discussion.....	98
4.3.1 Microstructural Features.....	98
4.3.2 Mechanical properties.....	113
4.3.3 Wear characteristics of alloy.....	116
4.3.4 Morphology of wornout surfaces.....	121
4.4 Conclusions.....	132

Chapter 5: Tribological Characteristics of Centrifugal Cast Alloy 135-174

5.1 Introduction.....	135
5.2 Experimental details.....	137
5.2.1 Centrifugal casting process variables.....	137
5.2.2 Metallography.....	138
5.2.3 Mechanical Testing.....	139
5.2.4 Wear study.....	139
5.3 Results and Discussion.....	140
5.3.1 Microstructural features	141
5.3.2 Mechanical properties.....	158
5.3.3 Wear characteristics.....	164
5.4 Conclusions.....	174

Overall Conclusions.....	175
Scope of the Future Work.....	176
References.....	177
