<b>List of Figures</b>	<b>Page No.</b> xvi
<b>List of Tables</b>	xxx
<b>List of Abbreviations</b>	xxxii
<b>Preface</b>	xxxv
<b>CHAPTER I General Introduction</b>	<b>1</b>
<b>1.1. Conventional Methods for the Synthesis of Gold Nanoparticles</b>	<b>2</b>
1.1.1. Turkevisch method	3
1.1.2. Brust method	4
1.1.3. Martin method	4
1.1.4. Amine as capping ligand	4
<b>1.2. Types of Gold Nanoparticles</b>	<b>6</b>
1.2.1. Gold nanospheres	6
1.2.2. Gold nanorods	7
1.2.3. Gold nanoshells	7
1.2.4. Gold nanocages	7
<b>1.3. Properties of Gold Nanoparticles</b>	<b>8</b>
1.3.1. Redox activity	8
1.3.2. Surface Plasmon Resonance (SPR)	8

1.3.3. Fluorescence quenching	9
<b>1.4. Application of Gold Nanoparticles</b>	<b>9</b>
1.4.1. Colorimetric sensing	9
1.4.1.1. Detection of alkali and alkaline earth metals	10
1.4.1.2. Detection of heavy metal ions	10
1.4.1.3. Detection of anions	10
1.4.1.4. Detection of small organic molecules	11
1.4.2. Fluorescence-based sensing	11
1.4.3. Electrical and electrochemical sensing	12
1.4.4. Therapeutics	13
1.4.5. Catalyst in organic reactions	13
1.4.5.1. Hydrogenation reaction	14
1.4.5.2. Nitro reduction	14
<b>1.5. Bimetallic Nanoparticles</b>	<b>15</b>
<b>1.6. Trimetallic Nanoparticles</b>	<b>16</b>
<b>1.7. Peroxidase Like Activity: Application in H<sub>2</sub>O<sub>2</sub>, Glucose and Glutathione Detection</b>	<b>17</b>
<b>1.8. <i>Para</i> Nitro Phenol Reduction</b>	<b>19</b>
<b>1.9. Challenges in the Synthesis of AuNPs and its Multimetallic Analogue</b>	<b>20</b>
<b>1.10. Origin of the Present Research Programme</b>	<b>21</b>
<b>1.11. Objectives of the Present Investigation</b>	<b>22</b>

<b>1.12. Work Plan for the Present Investigation</b>	<b>23</b>
<b>CHAPTER II Functionalized Alkoxysilane Mediated Synthesis of gold Nanoparticles dispersible in aqueous and non-aqueous medium</b>	<b>25</b>
<b>2.1. Introduction</b>	<b>25</b>
<b>2.2. Experimental</b>	<b>27</b>
2.2.1. Materials and instrumentation	27
2.2.2. Preparation of 3-APTMS stabilized AuNPs	28
2.2.3. Peroxidase-like catalytic activity of AuNPs	28
<b>2.3. Results</b>	<b>29</b>
2.3.1. Interaction between 3-APTMS and 3-GPTMS	29
2.3.2. Structural Characterization	30
2.3.3. Dispersibility of AuNPs sol in aqueous and organic medium	33
2.3.4. Peroxidase mimetic behavior of AuNPs	36
<b>2.4. Discussion</b>	<b>40</b>
2.4.1. Chemistry of 3-APTMS and 3-GPTMS interaction	40
2.4.2. Proposed mechanism for interaction between 3-APTMS and 3-GPTMS during AuNPs synthesis	41
2.4.3. Dispersibility of AuNPs as a function of alkoxysilanes molar ratio	42
<b>2.5. Conclusion</b>	<b>43</b>

<b>CHAPTER III 3-APTMS and tetrahydrofuranhydroperoxide mediated</b>	<b>45</b>
<b>    synthesis of AuNPs : Application in glutathione sensing</b>	
<b>3.1. Introduction</b>	<b>45</b>
<b>3.2. Experimental</b>	<b>48</b>
3.2.1. Materials and instrumentation	48
3.2.2. Synthesis of functional AuNPs	48
3.2.2.1 3-APTMS and THF-HPO mediated AuNPs	48
synthesis	
3.2.2.2. 3-APTMS and GBL mediated AuNPs synthesis	49
3.2.3. Peroxidase-Like catalytic activity of AuNPs made	49
using 3-APTMS and THF-HPO	
3.2.4. Glutathione detection by measuring wastage of H <sub>2</sub> O <sub>2</sub>	50
3.2.5. Kinetic parameter analysis	51
<b>3.3. Results</b>	<b>51</b>
3.3.1. 3-APTMS and THF-HPO mediated AuNPs	51
3.3.2. Chemistry of 3-APTMS and THF-HPO mediated	57
AuNPs	
3.3.3. 3-APTMS and GBL mediated AuNPs: formation and	57
consumption	
3.3.4. Effect of 3-APTMS concentration on catalytic property	58
of AuNPs	
<b>3.4. Discussion</b>	<b>63</b>

3.4.1. Effect of 3-APTMS and THF-HPO on the AuNPs size	63
3.4.2. GBL mediated mechanism for the synthesis of AuNPs	64
3.4.3 Role of nanogeometry and functionality in chemical sensing	66
<b>3.5. Conclusion</b>	<b>67</b>
<b>CHAPTER IV Cyclohexanone role during the synthesis of 3-APTMS mediated AuNPs and its comparison with other mild reducing agents</b>	<b>71</b>
<b>4.1. Introduction</b>	<b>71</b>
<b>4.2. Experimental</b>	<b>73</b>
4.2.1. Materials and methods	73
4.2.2. 3-APTMS and cyclohexanone mediated synthesis of AuNPs and its nanocomposites	74
4.2.3. Electrochemical measurements	75
4.2.4. Peroxidase-like catalytic activity	75
<b>4.3. Results</b>	<b>76</b>
4.3.1. Requirements of organic reducing agents during 3-APTMS mediated synthesis of AuNPs	76
4.3.2. Cyclohexanone and 3-APTMS mediated synthesis of AuNPs	78
4.3.3. Dispersibility of AuNPs made using 3-APTMS and acetone	82

4.3.4. Catalytic ability of AuNPs	84
4.3.5. Electrocatalytic ability of AuNPs and their nanocomposite	91
<b>4.4. Discussion</b>	<b>94</b>
4.4.1. Cyclohexanone and 3-APTMS role during AuNPs synthesis	94
4.4.2. Proposed mechanism for interaction between 3- APTMS and cyclohexanone during AuNPs synthesis	96
4.4.3. Effect of organic reducing agents on the dispersibility of AuNPs	97
4.4.4. Effect of organic reducing agents on the catalytic ability of AuNPs	98
4.4.5. Electrocatalysis of PB-AuNPs nanocomposite	100
4.4.6. Effect of organic reducing agents on the stability of AuNPs	100
<b>4.5. Conclusion</b>	<b>101</b>
<b>CHAPTER V 3-APTMS and organic carbonyl moiety role during the synthesis of AuNPs specific to pH- and salt- tolerance</b>	<b>103</b>
<b>5.1. Introduction</b>	<b>103</b>
<b>5.2. Experimental</b>	<b>105</b>
5.2.1. Materials and Instrumentation	105
5.2.2. Preparation of 3-APTMS stabilized nanoparticles	105

5.2.3. Electrochemical measurements	106
<b>5.3. Results</b>	<b>106</b>
5.3.1. Organic reducing agents and 3-APTMS mediated synthesis of AuNPs	106
5.3.2. The salt and pH sensitivity of AuNPs	109
5.3.3. Electrochemical behaviour of potassium ferricyanide	113
<b>5.4. Discussion</b>	<b>115</b>
5.4.1. Structural analysis of AuNPs	115
5.4.2. Chemistry behind 3-APTMS and organic reducing agent mediated synthesis of AuNPs	117
5.4.3. Mechanism operating in Salt- and pH- tolerances of AuNPs	119
5.4.4. Redox behavior of potassium ferricyanide in the presence of AuNPs	120
<b>5.5. Conclusion</b>	<b>120</b>
<b>CHAPTER VI 3-APTMS mediated rapid synthesis of Ag@AuPd trimetallic nanoparticles</b>	<b>123</b>
<b>6.1. Introduction</b>	<b>123</b>
<b>6.2. Experimental</b>	<b>126</b>
6.2.1. Materials and Instrumentation	126
6.2.2. Synthesis of PdNPs, (PdAu)NPs and Ag@AuPd)NPs	127
6.2.3. Conversion to heterogeneous catalyst	127

6.2.4. p-Nitrophenol reduction and kinetic rate constant calculation	127
<b>6.3. Results</b>	<b>128</b>
6.3.1. 3-APTMS and formaldehyde mediated Synthesis of mono, bi and trimetallic NPs	128
6.3.2. Structural Characterization	132
6.3.3. Homogenous catalysis	135
6.3.4. Heterogeneous catalysis	138
<b>6.4. Discussion</b>	<b>139</b>
6.4.1. Structural analysis	139
6.4.2. Bimetallic : (AuPd) Vs (Au@Pd)	142
6.4.3. Chemical characterization	143
6.4.4. Synergistic effect	144
6.4.5. Catalysis	144
6.4.6. Conversion of colloidal suspension to solid matrix	145
<b>6.5. Conclusion</b>	<b>147</b>
<b>CHAPTER VII 3-APTMS mediated solvent induced synthesis of gold nanoparticles</b>	<b>149</b>
<b>7.1. Introduction</b>	<b>149</b>
<b>7.2. Experimental</b>	<b>152</b>
7.2.1. Materials and Instrumentation	152
7.2.2. Synthesis of AuNPs	152

7.2.3. Sequential synthesis of AuNPs	153
7.2.4. Peroxidase mimetic ability	153
7.2.5. Para nitrophenol reduction	153
7.2.6. Electrochemical measurements	154
<b>7.3. Results</b>	<b>154</b>
7.3.1. Effect of Solvent during AuNPs synthesis	154
7.3.2. Structural Characterization	155
7.3.3. Electrochemical Behaviour of Siloxane-Au polymer modified electrode	161
7.3.4. PNP reduction using (Au-siloxane <sub>hetero</sub> ) <sub>seq</sub> hybrid as catalyst	163
7.3.5. Effect of porosity on catalytic behaviour	165
<b>7.4. Discussion</b>	<b>165</b>
7.4.1. Choice of 3-APTMS and acetone for solvent induced AuNPs synthesis	165
7.4.2. Structural analysis of different types of nanomaterials	166
7.4.3. Effect of porosity on Electrochemical behavior	169
7.4.4. Reduction of PNP using (Au-siloxane <sub>hetero</sub> ) <sub>seq</sub>	169
<b>7.5. Conclusion</b>	<b>170</b>
<b>Summary and Future Projection</b>	<b>171</b>
<b>References</b>	<b>172</b>
