

## **Table of Contents**

<b>Contents</b>	<b>Page No.</b>
<b>Chapter 1: Introduction.....</b>	<b>1-10</b>
<b>Chapter 2: Literature of Review.....</b>	<b>11-41</b>
2.1 Heavy metal pollution: Source and toxicity.....	12
2.2 Removal of heavy metal ions.....	16
2.2.1 Biosorption.....	17
2.2.2 Bioaccumulation: Removal of heavy metal using living cells.....	28
2.2.2.1 Bacterial species: Role in bioremediation of heavy metal ions.....	28
2.2.2.3 Microbial reduction of Cr (VI).....	33
2.2.2.3 Mycoremediation: Fungal mediated removal of heavy metal ions.....	35
2.2.2.4 Heavy metal detoxification mechanism in living cells: Metal binding protein and antioxidant system.....	38
2.2.3 Modelling approaches for heavy metal biosorption.....	39
2.2.3.1 Adsorption kinetic study.....	39
2.2.3.2 Adsorption isotherm study.....	39
2.2.3.3 Thermodynamics study.....	40
2.2.3.4 Artificial Neural Network (ANN).....	40
2.2.3.5 Adsorption dynamics and diffusivity coefficients.....	41
2.3 Thesis Objectives.....	42

<b>Chapter 3: Materials and methods.....</b>	<b>43-69</b>
3.1 Collection of biological waste.....	44
3.2 Preparation of stock solutions.....	44
3.2.1 Chemicals and reagents.....	44
3.2.2 Preparation of biosorbent.....	44
3.2.2.1 RH and FeRH.....	44
3.2.2.2 Synthesis of CMNPs.....	45
3.2.2.3 Preparation of ChCLP.....	45
3.3 Characterization of synthesized biosorbents.....	46
3.4 Dimensionless numbers and Artificial neural network (ANN).....	47
3.4.1 Derivation of dimensionless number.....	47
3.4.2 ANN.....	49
3.5 Adsorption study.....	49
3.5.1 Adsorption of Cr (VI) using RH and FeRH.....	49
3.5.2 Adsorption of Cr (VI), Cd (II) and Pb (II) using CMNPs.....	49
3.5.3 Adsorption of Cr (VI), Cd (II), and Pb (II) using ChCLP.....	50
3.5.4 Determination of percentage removal and adsorption capacity.....	50
3.6.0 Isotherms, Kinetics, Thermodynamics and Mechanistic study.....	51
3.6.1 Isotherm models.....	51
3.6.2 Thermodynamic.....	54

3.6.3 Kinetics.....	54
3.6.4 Mechanistic study.....	55
3.7.0 Desorption of heavy metal ions: regeneration of biosorbent.....	57
3.8.0 Continuous column study.....	58
3.8.1 Parameters and design of packed bed column.....	58
3.9.0 Isolation of new bacterial strain from the site contaminated with coal mine effluents: characterization and heavy metal removal.....	59
3.9.1 Collection and physicochemical characterization of wastewater.....	59
3.9.2 Isolation of heavy metal tolerant bacteria.....	60
3.9.3 Genomic DNA isolation.....	60
3.9.4 16S rRNA gene sequencing and molecular identification.....	61
3.9.5 Effect of various parameters on the microbial growth.....	61
3.9.6 Analysis of antioxidants activity in heavy metal exposed bacterial isolate.....	62
3.9.7 Analysis of heavy metal removal.....	62
3.9.8 SEM and EDX analysis of bacterial isolate.....	62
3.10.0 Bioremediation of toxic metal ions from coal washery effluent (CWE) by <i>Pleurotus florida</i> .....	63
3.10.1 Collection and characterization of CWE.....	63
3.10.2 Collection and preparation of the substrate for mushroom cultivation.....	63
3.10.3 Experimental design for bioremediation of CWE.....	63
3.10.3.1 Spawn preparation.....	64
3.10.3.2 Bioremediation of CWE.....	64
3.10.4 Analysis of metallothionein concentration in <i>P. florida</i> fruit body grown in CWE containing substrate.....	65

3.10.5 Analysis of antioxidant enzymatic system in <i>P. florida</i> grown in CWE containing substrate.....	66
3.10.6 Growth modelling of <i>P. florida</i> in CWE.....	66
3.10.7 FTIR and SEM analysis of <i>P. florida</i> fruit body.....	67
3.10.8 Sample preparation for heavy metal analysis.....	68
3.10.9 Statistical data analysis.....	68
<b>Results and Discussion.....</b>	<b>70</b>
<b>Chapter 4: Development of a cost-effective, recyclable and viable metal ion doped adsorbent for simultaneous adsorption and reduction of toxic Cr (VI) ions.....</b>	<b>71-102</b>
4.1 Introduction.....	72
4.2 Characterization of FeRH and RH.....	73
4.2.1 SEM analysis.....	73
4.2.2 EDX analysis.....	74
4.2.3 FTIR.....	75
4.2.4 Proximate and ultimate analysis.....	76
4.2.5 pHpzc.....	77
4.2.6 BET surface area.....	78
4.3.0 Dimensionless numbers.....	79
4.4.0 ANN.....	80
4.5.0 Conformity of oxidation state.....	82
4.6.0 Proposed mechanism: surface protonation, adsorption and reduction.....	84
4.7.0 Adsorption study.....	84
4.7.1 Effect of process parameters.....	84
4.7.1.1 pH.....	84
4.7.1.2 Initial metal ion concentration.....	85

4.7.1.3 RH and FeRH dosage.....	86
4.7.1.4 Contact time.....	86
4.7.1.5 Temperature.....	87
4.7.1.6 Agitation speed.....	87
4.7.2.0 Isotherm study.....	87
4.7.3.0 Thermodynamics.....	92
4.7.4.0 Adsorption kinetics.....	94
4.7.5 Mechanistic study.....	95
4.8.0 Assessment of adsorption capacities.....	96
4.9.0 Recovery of FeRH.....	99
4.10.0 Techno-economic analysis.....	101
4.11.0 Conclusion.....	101
<b>Chapter 5: Synthesis of chitosan coated manganese dioxide nanoparticles (CMNPs) and its application in the removal of Cr (VI), Cd (II) and Pb (II) from wastewater.....</b>	<b>103-158</b>
5.1 Introduction.....	104
5.2.0 Characterization of CMNPs.....	105
5.2.1 FTIR analysis.....	105
5.2.2 HR-TEM.....	107
5.2.3 HR-SEM.....	108
5.2.4 EDX Analysis and Elemental mapping.....	109
5.2.5 CMNPs size measurement using dynamic light scattering (DLS).....	111
5.2.6 Zero point charge ( $pH_{zpc}$ ).....	112
5.2.7 Specific surface area.....	114
5.2.8 XPS analysis and determination of oxidation state of chromium.....	115
5.3.0 Biosorption study.....	117

5.3.1 Optimization of process parameters.....	117
5.3.2 Isotherm.....	122
5.3.3 Kinetics.....	132
5.3.4 Thermodynamics .....	137
5.3.5 Dimensionless number and diffusivity coefficients.....	142
5.4.0 ANN Modeling.....	143
5.5.0 Comparison of heavy metal removal capacity.....	152
5.6.0 Complete removal of heavy metal ions in series batch reactor system.....	154
5.7.0 Desorption of heavy metal ions and regeneration of CMNPs.....	154
5.8.0 Techno-economic analysis.....	157
5.9.0 Conclusion.....	157
<b>Chapter 6: Removal of Cd (II), Cr (VI) and Pb (II) by using chitosan coated <i>Citrus limetta</i> peels biomass in synthetic wastewater.....</b>	<b>159-207</b>
6.1 Introduction.....	160
6.2.0 Characterization of the ChCLP.....	162
6.2.1 Surface morphological of chitosan coated <i>Citrus limetta</i> peels biomass.....	162
6.2.2 Energy dispersive X- ray analysis and elemental mapping.....	163
6.2.3 Fourier transformation infra-red analysis.....	166
6.2.4 Determination of pH range through point zero charge.....	167
6.2.5 Atomic Force Microscopy.....	168
6.2.6 XPS.....	170
6.3.0 Adsorption study.....	172
6.3.1 Experimental parameter optimization.....	172
6.3.2 Isotherm.....	177

6.3.3 Thermodynamics.....	185
6.3.4 Adsorption kinetic.....	188
6.3.5 Adsorption Dynamics and diffusivity coefficients.....	192
6.3.6 ANN Modeling.....	193
6.4.0 Complete removal of heavy metal ions in series batch reactor system.....	202
6.5.0 Regeneration of chitosan coated ChCLP.....	203
6.6.0 Techno-economic analysis.....	205
6.7.0 Conclusion.....	206
<b>Chapter 7: Microbial Removal of Cr (VI), Pb (II) and Cd (II) by a New Bacterial Strain Isolated from the Site Contaminated with Coal Mine Effluents.....</b>	<b>208-243</b>
7.1 Introduction.....	209
7.2.0 Physico-chemical characterization of wastewater (Source of water collection.....	210
7.3.0 Characterization of bacterial isolate.....	212
7.3.1 16S rRNA gene sequencing.....	212
7.3.2 SEM and EDX analysis.....	214
7.3.3 XPS analysis.....	218
7.3.4 FTIR.....	220
7.4.0 Effect of pH and temperature.....	222
7.5.0 Bacterial growth in presence of heavy metal ions and in control.....	223
7.6.0 Heavy metal bioremediation mechanism.....	226
7.6.1 Expression of antioxidants.....	226
7.6.2 Heavy metal uptake dynamics.....	228
7.7.0 Heavy metal removal efficiency of <i>Microbacterium paraoxydans</i> strain VSVM IIT(BHU).....	229
7.8.0 ANN Modeling.....	233

7.9.0 Comparison of heavy metal removal efficiency.....	239
7.10.0 Conclusion.....	242
<b>Chapter 8: Bioremediation of toxic metal ions from coal washery effluent by <i>Pleurotus florida</i>.....</b>	<b>244-275</b>
8.1 Introduction.....	245
8.2.0 Physiochemical characterization of CWE.....	247
8.3.0 Bioaccumulation of heavy metals in the <i>P. florida</i> fruit bodies.....	249
8.4.0 Removal of heavy metals from substrate (paddy straw) using <i>P. florida</i> .....	254
8.5.0 Growth modelling of <i>P. florida</i> in CWE.....	256
8.5.1 Growth kinetics of <i>P. florida</i> in control and at various concentrations of CWE.....	257
8.6.0 Bioaccumulation mechanism of heavy metals in the <i>P. florida</i> .....	259
8.6.1 Metallothionein concentration in the <i>P. florida</i> .....	260
8.6.2 Antioxidant enzymatic system of <i>P. florida</i> .....	261
8.6.3 FTIR analysis of <i>P. florida</i> .....	265
8.7.0 SEM and EDX Analysis.....	268
8.8.0 Effect of initial heavy metal concentration including other wastewater components on the bioremediation efficiency and growth of <i>P. florida</i> .....	270
8.9.0 Comparison of removal efficiency in terms of heavy metal ions by <i>Pleurotus florida</i> and other fungal species.....	271
8.10 Conclusion.....	274
<b>Chapter 9.....</b>	<b>276-291</b>
9.1 Disposal of used adsorbent.....	277

9.2 Comparative heavy metal removal.....	277
9.3 Column study.....	278
9.4 Recommendations for future studies.....	281
9.5 Life cycle assessment theoretical study for the removal of Cadmium, Lead and Hexavalent Chromium from wastewater.....	282
9.5.1 Life Cycle Assessment (LCA) framework of the study.....	282
9.5.2 Aim and possibility description.....	285
9.5.3 Inventory study.....	285
9.5.4 Improvement evaluation.....	289
<b>Chapter 10. References.....</b>	<b>292-376</b>
<b>List of Publication.....</b>	<b>377-380</b>
<b>Conference/workshop.....</b>	<b>381</b>
<b>Research work under media coverage.....</b>	<b>382-384</b>

## List of Figures

<b>Figures</b>	<b>Captions</b>	<b>Page No.</b>
<b>Figure 2.1.</b>	Mechanism of heavy metal biosorption	17
<b>Figure 2.2</b>	Schematic representation of biosorbent preparation	19
<b>Figure 3.1</b>	Continuous fix bed column	59
<b>Figure 4.1</b>	SEM image of (a) unloaded RH (b) metal loaded RH (c) unloaded FeRH (d) metal loaded FeRH	73
<b>Figure 4.2</b>	EDX spectra of (a) unloaded RH (b) metal loaded RH (c) unloaded FeRH (d) metal loaded FeRH	74
<b>Figure 4.3</b>	FTIR spectra of (a) RH and FeRH (b) metal unloaded and loaded RH (c) metal unloaded and loaded FeRH	75
<b>Figure 4.4</b>	pH <sub>pzc</sub> value of FeRH	78
<b>Figure 4.5</b>	Performance plot of (a) RH and (b) FeRH	81
<b>Figure 4.6</b>	Comparison of predictive and experimental values for (c) RH and (d) FeRH using ANN	81
<b>Figure 4.7</b>	XPS analysis of Cr (VI) loaded FeRH	82
<b>Figure 4.8</b>	Oxidation state of adsorbed Cr on to FeRH	83
<b>Figure 4.9</b>	Effect of various adsorption parameters such as adsorbent dosage (a), initial Cr (VI) concentration (b), pH (c), agitation rate (d), temperature (e) and contact time (f) for Cr (VI) adsorption onto RH and FeRH.	85

<b>Figure 4.10</b>	Langmuir (a), Freundlich (b), Temkin (c), D-R (d), Halsey (e), H-R (f), Jovanovic (g) and R-P isotherm of Cr (VI) adsorption onto RH.	88
<b>Figure 4.11</b>	Langmuir (a), Freundlich (b), Temkin (c), D-R (d), Halsey (e), H-R (f), Jovanovic (g) and R-P isotherm of Cr (VI) adsorption onto FeRH.	89
<b>Figure 4.12</b>	Thermodynamic study of Cr (VI) adsorption onto RH and FeRH	93
<b>Figure 4.13</b>	PFO (a), PSO (b) and Elovich kinetic (c) of Cr (VI) adsorption of RH and FeRH	94
<b>Figure 4.14</b>	Diagrammatic representation of Cr (VI) removal	99
<b>Figure 4.15</b>	Sequences of Cr (VI) adsorption and desorption	100
<b>Figure 5.1</b>	FTIR spectra of chitosan, MNPs, CMNPs (a) and heavy metal loaded CMNPs (b)	106
<b>Figure 5.2</b>	Size and shape of CMNPs (a-b), lattice fringes indicated by arrows (c) and SAED pattern of CMNPs (d)	107
<b>Figure 5.3</b>	HR-SEM micrographs of CMNPs (a, b)	108
<b>Figure 5.4</b>	EDX analysis of CMNPs before (a) and after Cr (VI) (b), Cd (II) (c), Pb (II) (d) and ternary (e) metal ion biosorption	109-110
<b>Figure 5.5</b>	Elemental mapping of CMNPs after heavy metal biosorption. Elemental mapping representing distribution of all elements (a), carbon (b), nitrogen (c), oxygen (d), Pb (II) (e), Cd (II) (f), Cr (g) and Mn (h).	111
<b>Figure 5.6</b>	DLS analysis of CMNPs	112
<b>Figure 5.7</b>	pH <sub>zpc</sub> value of CMNPs	113

<b>Figure 5.8</b>	XPS of Cr (VI) (a), Cd (II) (b), Pb (II) (c) and ternary metal ion (d) biosorption on CMNPs.	115
<b>Figure 5.9</b>	Incidence of Cr (III) and Cr (VI) after reduction	116
<b>Figure 5.10</b>	Effect of pH (a), initial Cr (VI) concentration (b), CMNPs dosage (c), temperature (d), contact time (e), and agitation rate (f) on Cr (VI) removal using CMNPs	117
<b>Figure 5.11</b>	Effect of pH (a), initial Pb (II) concentration (b), CMNPs dosage (c), temperature (d), contact time (e) and agitation rate (f) for Pb (II) adsorption onto CMNPs	118
<b>Figure 5.12</b>	Effect of pH (a), initial Cd (II) concentration (b), CMNPs dosage (c), temperature (d), contact time (e), and agitation rate (f) on Cd (II) removal using CMNPs.	118
<b>Figure 5.13</b>	Langmuir (a), Freundlich (b), Temkin (c), and Halsey (d) isotherms of Cr (VI) biosorption CMNPs.	123
<b>Figure 5.14</b>	Langmuir (a), Freundlich (b), Temkin (c), and Halsey (d) isotherms of Pb (II) biosorption CMNPs.	124
<b>Figure 5.15</b>	Langmuir (a), Freundlich (b), Temkin (c), and Halsey (d) isotherms of Cd (II) biosorption on the surface of CMNPs.	124
<b>Figure 5.16</b>	Langmuir (a), Freundlich (b), Temkin (c), and Halsey (d) isotherms study of Cr (VI), Cd (II) and Pb (II) biosorption in ternary metal ion system onto CMNPs	125
<b>Figure 5.17</b>	PFO (a), PSO (b) and Elovich (c) kinetic models of Cr (VI) biosorption onto CMNPs.	132

<b>Figure 5.18</b>	PFO (a), PSO (b) and Elovich (c) kinetic models of Pb (II) biosorption onto CMNPs.	133
<b>Figure 5.19</b>	PFO (a), PSO (b) and Elovich (c) kinetics of Cd (II) biosorption onto CMNPs.	133
<b>Figure 5.20</b>	PFO (a), PSO (b), and Elovich (c) kinetics of Pb (II), Cd (II) and Cr (VI) biosorption in ternary metal ion system.	134
<b>Figure 5.21</b>	Thermodynamics of Cr (VI) (a), Pb (II) (b), Cd (II) (c) and ternary (d) metal ion system on to CMNPs.	137
<b>Figure 5.22</b>	Performance between number of epochs and the MSE for Cr (VI) ions in single metal system.	144
<b>Figure 5.23</b>	Performance between number of epochs and the MSE for Cd (II) ions in single metal ion system.	144
<b>Figure 5.24</b>	Performance between number of epochs and the MSE for lead ions in single metal ion system	145
<b>Figure 5.25</b>	Performance between number of epochs and the MSE for ternary metal ion system	145
<b>Figure 5.26</b>	Regression plot for Cr (VI) ions in single metal ion system	146
<b>Figure 5.27</b>	Regression plot for Cd (II) in single metal ion system	147
<b>Figure 5.28</b>	Regression plot for Pb (II) in single metal ion system	147
<b>Figure 5.29</b>	Regression plot for ternary metal ion system	148
<b>Figure 5.30</b>	Correlation plot for the experimental and ANN predicted values for Cr (VI) ions in single metal ion system	149

## List of Tables

<b>Table</b>	<b>Title</b>	<b>Page No.</b>
<b>Table 1.1</b>	The advantage and limitations of the heavy metal removal method	5-6
<b>Table 2.1</b>	Maximum limit of Cr (VI), Cd (II) and Pb (II) in the industrial effluent.	13
<b>Table 2.2</b>	The maximum permissible limit of Cr (VI), Cd (II) and Pb (II)	14
<b>Table 2.3</b>	Cr (VI) biosorption capacity of different biosorbent derived from algal, fungal, plants, bacterial biomass.	20-22
<b>Table 2.4</b>	Cd (II) biosorption capacity of different biosorbent derived from algal, fungal, plants, bacterial biomass.	22-24
<b>Table 2.5</b>	Pb (II) biosorption capacity of different biosorbents	24-25
<b>Table 2.6</b>	Nanomaterials and their heavy metal adsorption capacity	26-28
<b>Table 2.7</b>	Bacterial species and their Cr (VI) efficiency.	29-30
<b>Table 2.8</b>	Pb (II) removal efficiency of bacterial strains.	30-32
<b>Table 2.9</b>	Cd (II) removal efficiency of bacterial strains.	32-33
<b>Table 2.10</b>	Fungi and their heavy metal removal capacities	35-37
<b>Table 4.1</b>	Proximate and ultimate analysis of FeRH	76-77
<b>Table 4.2</b>	Specific surface area of FeRH, RH and other adsorbents	79
<b>Table 4.3</b>	Dimensionless numbers for RH and FeRH	80
<b>Table 4.4</b>	Isotherms parameters and constants	90-91
<b>Table 4.5</b>	Thermodynamic parameters	93-94
<b>Table 4.6</b>	Kinetic model constants and error functions	94-95

<b>Table 4.7</b>	Mechanistic parameters	95-96
<b>Table 4.8</b>	Cr (VI) uptake capacities of RH and FeRH and other adsorbents.	97-98
<b>Table 5.1</b>	Specific surface area of CMNPs and other nanoparticles	114
<b>Table 5.2</b>	Isotherms parameters of Cr (VI) biosorption on CMNPs	125-126
<b>Table 5.3</b>	The isotherm parameters of Pb (II) biosorption at various temperature	126-127
<b>Table 5.4</b>	The isotherm parameters of Cd (II) biosorption	127
<b>Table 5.5</b>	Isotherm parameters of Cr (VI), Cd (II) and Pb (II) biosorption in ternary metal ion system	128-130
<b>Table 5.6</b>	Kinetics of Cr (VI) biosorption	134
<b>Table 5.7</b>	Kinetics of Pb (II) biosorption	134
<b>Table 5.8</b>	Kinetic of Cd (II) biosorption on to CMNPs	134-135
<b>Table 5.9</b>	Kinetic parameters of Pb (II), Cd (II) and Cr (VI) biosorption in ternary metal ion system	135
<b>Table 5.10</b>	Thermodynamic data for biosorption of Cr (VI) on to CMNPs	137-138
<b>Table 5.11</b>	Thermodynamic data for biosorption of Pb (II) on to CMNPs	138
<b>Table 5.12</b>	Thermodynamic data for biosorption of Cd (II) on to CMNPs	138
<b>Table 5.13</b>	Thermodynamic parameters of Pb (II), Cd (II) and Cr (VI) biosorption on to CMNPs in ternary metal ion system	138-139
<b>Table 5.14</b>	Comparative thermodynamics data present study and literature	139-141
<b>Table 5.15</b>	Dimensionless numbers and diffusivity coefficients for heavy metal ions in single and ternary metal ion system.	142
<b>Table 5.16</b>	Comparison of heavy metal removal capacity of CMNPs with other nanoparticles	152-153

<b>Table 6.1</b>	Isotherm parameters of Cr (VI), Cd (II) and Pb (II) adsorption in single metal ion system	180-182
<b>Table 6.2</b>	The isotherm parameters of Cr (VI), Cd (II) and Pb (II) in the ternary metal ion system.	182-184
<b>Table 6.3</b>	Thermodynamic parameters of Cr (VI), Cd (II) and Pb (II) on ChCLP in single metal ion system.	186-187
<b>Table 6.4</b>	Thermodynamic parameters for adsorption of ternary metal ion system	187
<b>Table 6.5</b>	Kinetic parameters of Cr (VI), Cd (II) and Pb (II) adsorption on ChCLP in single metal ion system	190-191
<b>Table 6.6</b>	Kinetic parameters of heavy metal adsorption in ternary metal ion system.	191
<b>Table 6.7</b>	Value of dimensionless numbers and diffusivity coefficients for metal ions in single and ternary metal ion system.	192
<b>Table 7.1</b>	Physico-chemical characterization of wastewater	211
<b>Table 7.2</b>	Value of dimensionless numbers for metal ions in single and ternary metal ion system	229
<b>Table 7.3</b>	Comparison of heavy metal removal efficiency	239-241
<b>Table 8.1</b>	Characterization of CWE	247-248
<b>Table 8.2</b>	Metals present in paddy straw ( $\mu\text{g/g}$ ) before and after bioremediation	255
<b>Table 8.3</b>	Growth of <i>P. florida</i> in various concentration of CWE	257
<b>Table 8.4</b>	Study of exponential and linear growth models of <i>P. florida</i> in varying environmental conditions.	258

<b>Table 8.5</b>	Functional groups present in the <i>P. florida</i> (before and after bioremediation)	265-266
<b>Table 8.6</b>	Heavy metal removal efficiency of <i>P. florida</i> and other fungal species	271-274
<b>Table 9.1</b>	Comparative heavy metal removal capacity	277-278
