## LIST OF TABLES

| Table No. | Table captions | Page <br> No. |
| :---: | :---: | :---: |
| 1. | Medicinal plants with reported nephroprotective activity | 20 |
| 2. | Types of Conjunctivitis (Ocular infection) with causing organism and treatment | 29 |
| 3. | Species of Exacum reported in India literature. | 34 |
| 4. | Compounds reported from different species of Exacum | 38 |
| 5. | Primers used for amplification of matK and rbcL gene segments | 53 |
| 6. | Extractive value and organoleptic properties of various Exacum lawii extracts | 95 |
| 7. | Quantitative microscopical parameters | 103 |
| 8. | Nutritional content analysis | 106 |
| 9. | Physicochemical parameters of Exacum lawii | 107 |
| 10. | Fluorescence analysis of plant powder | 108 |
| 11. | Preliminary phytochemical screening of different Exacum lawii extracts | 113 |
| 12. | Quantitative estimation of various classes of phytochemical compound | 114 |
| 13. | TLC analysis of ethanolic extract of Exacum lawii and its fraction | 115 |
| 14. | Major compounds identified by GCMS in ethanolic extract of Exacum lawii | 117 |
| 15. | Interactions obtained in molecular docking study | 126 |
| 16. | Effect of different doses of ELE on vital organ weight during subacute toxicity | 130 |
| 17. | Effect of different doses of ELE on Biochemical parameters during sub-acute toxicity | 130 |
| 18. | Effect of different doses of ELE on Haematological parameters | 131 |

|  | during sub-acute toxicity |  |
| :---: | :--- | :---: |
| $\mathbf{1 9 .}$ | Effect of different doses of Exacum lawii extract and swertiamerin on <br> serum biochemical parameters in rats treated with cisplatin ( $6 \mathrm{mg} / \mathrm{kg}$, <br> i.p.) | 135 |
| $\mathbf{2 0 .}$ | Effect of different doses of Exacum lawii extract and swertiamerin on <br> renal tissue antioxidant enzyme levels in rats treated with cisplatin (6 <br> mg/kg, i.p.) | 136 |
| $\mathbf{2 1 .}$ | MIC and MBC (mg/ml) values of Exacum lawii extracts and volatile <br> oil against bacterial strain causing ocular infection | 152 |
| $\mathbf{2 2 .}$ | MIC and MFC (mg/ml) values of Exacum lawii extracts and volatile <br> oil against fungal strain causing ocular infection | 153 |
