

List of Tables

Table No.	Description	Page No.
Table 1-1	Standard treatment regimen for new TB patients	5
Table 1-2	Dosing frequency	5
Table 1-3	Recommended dose according to body weight	5
Table 1-4	2011 Classification of TB drugs by WHO	6
Table 1-5	2016 Classification of TB Drugs by WHO	6
Table 2-1	Psychotropic Phenothiazine drugs and their MIC against <i>Mtb</i>	15
Table 5-1	Ramachandran quality parameter check for the developed homology model of <i>Mtb</i> NDH-2 using RAMPAGE and PROCHECK	64
Table 5-2	Superimposition of the developed homology model against the protein structure of <i>S. aureus</i> NDH-2	65
Table 5-3	Superimposition of the developed homology model against the protein structure of <i>C. thermarum</i> NDH-2	65
Table 5-4	Docking of purchasable subset of ZINC Database against ATP synthase	68
Table 5-5	Docking of designed phenothiazine molecules against NDH-2 of <i>Mtb</i>	70
Table 5-6	Molecular properties and predicted toxicity of phenothiazine molecules	72
Table 5-7	Antitubercular and antibacterial activities of phenothiazine derivatives	86
Table 5-8	BBB permeability of commercial drugs and phenothiazine derivatives	88
Table 5-9	Cytotoxicity of phenothiazine derivatives against VERO cells	89
Table 5-10	NDH-2 inhibitory study of phenothiazine derivatives	90
Table 5-11	Docking of designed carbazole molecules against NDH-2 of <i>Mtb</i>	92
Table 5-12	Molecular properties and predicted toxicity of carbazole molecules	94
Table 5-13	Antitubercular and antibacterial activities of carbazole derivatives	108
Table 5-14	BBB permeability of commercial drugs and carbazole derivatives	110
Table 5-15	Cytotoxicity study of carbazole derivatives against VERO cells	111
Table 5-16	NDH-2 inhibitory study of carbazole derivatives	112
Table 5-17	Docking of designed biphenyl molecules against NDH-2 of <i>Mtb</i>	114

Table 5-18	Molecular properties and predicted toxicity of biphenyl molecules	116
Table 5-19	Antitubercular and antibacterial activities of biphenyl derivatives	128
Table 5-20	BBB permeability of commercial drugs and biphenyl derivatives	130
Table 5-21	Cytotoxicity study of biphenyl derivatives against VERO cells	131
Table 5-22	NDH-2 inhibitory study of biphenyl derivatives	132
Table 5-23	Docking result of phenothiazine/ carbazole/ biphenyl molecules against ATP synthase	134
Table 5-24	<i>In-vitro</i> ATP synthase inhibition study	136
