List of Figures	xv
Preface	xvii
1 Introduction	1
1.1 Background	1
1.1.1 Nonlinear Waves and Hyperbolic Equations	2
1.1.2 Ideal and Non-Ideal Gas	4
1.1.3 Dusty Gas	6
1.1.4 Radiating Gas	8
1.1.5 Magnetogasdynamics	13
1.1.6 Riemann Problem	16
1.1.7 Shock wave and Rankine-Hugoniot condition	17
1.2 Motivation	19
1.3 Review	22
1.3.1 Literature Review of shock waves in Gasdynamics	22
1.3.2 Literature review of Riemann problem	28
1.4 Problem statement and Thesis Objectives	31
2 Riemann problem for non-ideal polytropic magnetogasdynamic flow	33
2.1 Introduction	33
2.2 Basic Equations	35
2.3 Riemann problem and Riemann invariants	39
2.4 Shock wave	41
2.5 Simple wave	47
2.6 Contact discontinuities	49
2.7 Result and discussion	50
2.8 Conclusion	53

3	The propagation of weak shock waves in non-ideal gas flow with radiation	55
3.1	Introduction	55
3.2	Problem Formulation and Characteristics	59
3.3	Progressive Wave Solutions	61
3.4	Acceleration Waves	64
3.5	Weak Shock	66
3.6	Behaviour of weak shock wave in the form of sawtooth wave	67
3.7	Results and discussion	69
3.8	Conclusion	75
4	Interaction of waves in one-dimensional dusty gas flow	77
4.1	Introduction	77
4.2	Problem formulation and characteristics	81
4.3	Weakly non-linear resonant waves	83
4.4	Non-linear geometrical acoustics solution	89
4.5	Shock waves	91
4.6	Results and Conclusion	93
5	Solution of Riemann Problem of Conservation laws in van der Waals Gas	97
5.1	Introduction	97
5.2	Basic Equations	100
5.3	Riemann problem(RP) and Generalized Riemann Invariants(GRI)	102
5.4	Piecewise discontinuous solution (Shock wave)	104
5.5	Smooth solutions (Simple wave)	110
5.6	Contact discontinuities	112
5.7	The properties of elementary wave curves(shock waves and rarefaction waves)	113
5.8	Results and discussion	119
5.9	Conclusion	121
6	On the evolution of magnetic shock wave in the mixture of gas and small solid dust particles	123
6.1	Introduction	123
6.2	Governing equation	128
6.3	Progressive Wave Solutions	132
6.4	Acceleration Waves	135
6.5	Weak shock	136
6.6	Decay of progressive wave in the form of half N-wave (sawtooth profile)	137
6.7	Results and discussion	140

6.8 Conclusion	144
7 Summary and Future scope	155
7.1 Overall Summary	155
7.2 Future Scope	157
Bibliography	159
List of Publications	181

List of Figures

2.1	Solution of the Riemann problem for the one dimensional Euler equations of gasdynamics in the x-t plane.	40
2.2	Density profiles for compressive waves: 1-shock.	50
2.3	Density profiles for compressive waves: 3-shock.	50
2.4	Velocity profiles for compressive waves: 1-shock.	50
2.5	Velocity profiles for compressive waves: 3-shock.	51
2.6	Velocity profiles for rarefaction waves: 1-shock.	51
2.7	Velocity profiles for rarefaction waves: 3-shock.	51
3.1	Formation and decay of Sawtooth wave (Half N-wave)	70
3.2	Length L/L_0 of sawtooth wave (Half N-wave) with respect to time t for planar flow.	72
3.3	Length L/L_0 of sawtooth wave (Half N-wave) with respect to time t for cylindrically symmetric flow.	72
3.4	Variation of velocity v/v_0 of sawtooth wave (Half N-wave) with respect to time t for planar flow.	73
3.5	Variation of velocity v/v_0 of sawtooth wave (Half N-wave) with respect to time t for cylindrically symmetric flow.	73
3.6	Length L/L_0 of sawtooth wave (Half N-wave) with respect to time t in the presence of non-idealness parameter $\bar{b} = 0.4$	74
3.7	Velocity v/v_0 of sawtooth wave (Half N-wave) with respect to time t in the presence of non-idealness parameter $\bar{b} = 0.4$	74
5.1	Solution of Riemann problem (RP) for 1-D Euler equations	104
5.2	Density diagram for compressive waves (1-shock).	116
5.3	Velocity diagram for compressive waves (1-shock).	117
5.4	Density diagram for compressive waves (3-shock).	117
5.5	Velocity diagram for compressive waves (3-shock).	118
5.6	Density diagram for rarefaction waves (1-shock).	118
5.7	Density diagram for rarefaction waves (1-shock).	119
6.1	Formation and decay of Sawtooth wave (Half N-wave)	141

6.2	Variation of Length of sawtooth profile (l/l_0) for different value of mass fraction of solid particles (k_p) and time(t) with $\gamma = 1.67$, $\beta = 1.0$, $Z_0 = 0.01$ and $\mu = 1.0$ for planar flow.	143
6.3	Variation of Length of sawtooth profile (l/l_0) for different value of β and time(t) with $\gamma = 1.67$, $k_p = 0.4$, $Z_0 = 0.01$ and $\mu = 1.0$ for planar flow.	144
6.4	Variation of Length of sawtooth profile (l/l_0) for different value of k_p and μ with respect to time(t) with $\gamma = 1.67$, $Z_0 = 0.01$, and $\beta = 1.0$ for planar flow.	145
6.5	Variation of Length of sawtooth profile (l/l_0) for different value of mass fraction of solid particles (k_p) and time(t) with $\gamma = 1.67$, $\beta = 1.0$, $Z_0 = 0.01$ and $\mu = 1.0$ for cylindrically symmetric flow.	146
6.6	Variation of Length of sawtooth profile (l/l_0) for different value of β and time(t) with $\gamma = 1.67$, $k_p = 0.4$, $Z_0 = 0.01$ and $\mu = 1.0$ for cylindrically symmetric flow.	147
6.7	Variation of Length of sawtooth profile (l/l_0) for different value of k_p and μ with respect to time(t) with $\gamma = 1.67$, $Z_0 = 0.01$, and $\beta = 1.0$ for cylindrically symmetric flow.	148
6.8	Variation of Velocity of sawtooth profile (v/v_0) for different value of mass fraction of solid particles (k_p) and time(t) with $\gamma = 1.67$, $\beta = 1.0$, $Z_0 = 0.01$ and $\mu = 1.0$ for planar flow.	149
6.9	Variation of Velocity of sawtooth profile (v/v_0) for different value of β and time(t) with $\gamma = 1.67$, $k_p = 0.4$, $Z_0 = 0.01$ and $\mu = 1.0$ for planar flow.	150
6.10	Variation of Velocity of sawtooth profile (v/v_0) for different value of k_p and μ with respect to time(t) with $\gamma = 1.67$, $Z_0 = 0.01$, and $\beta = 1.0$ for planar flow.	151
6.11	Variation of Velocity of sawtooth profile (v/v_0) for different value of mass fraction of solid particles (k_p) and time(t) with $\gamma = 1.67$, $\beta = 1.0$, $Z_0 = 0.01$ and $\mu = 1.0$ for cylindrically symmetric flow.	152
6.12	Variation of Velocity of sawtooth profile (v/v_0) for different value of β and time(t) with $\gamma = 1.67$, $k_p = 0.4$, $Z_0 = 0.01$ and $\mu = 1.0$ for cylindrically symmetric flow.	153
6.13	Variation of Velocity of sawtooth profile (v/v_0) for different value of k_p and μ with respect to time(t) with $\gamma = 1.67$, $Z_0 = 0.01$, and $\beta = 1.0$ for cylindrically symmetric flow.	154
