List of Figures	xii
List of Tables	xiv
List of Symbols	xv
List of Abbreviations	xvi
Preface	xix
<b>1 Introduction</b>	<b>1</b>
1.1 Variants of SVM . . . . .	3
1.2 Hinge Loss Function . . . . .	12
1.3 Robust Statistics . . . . .	14
1.4 Motivation . . . . .	16
1.5 Research Contributions . . . . .	16
1.6 Organization of the Thesis . . . . .	18
<b>2 Related work</b>	<b>19</b>
2.1 Robust Statistics based SVM . . . . .	19
2.2 Robust Statistics based Variants of SVM . . . . .	20
2.3 Robust Loss Functions in SVM and its variants . . . . .	23
2.4 Applications of Robust SVM . . . . .	28
<b>3 RSVM-PDProx: Adding Robustness to SVM Using Rescaled <math>\alpha</math>-hinge Loss Function</b>	<b>31</b>
3.1 Introduction . . . . .	31
3.1.1 Motivation and Contribution . . . . .	33
3.1.2 Outline . . . . .	34
3.2 Related Concepts . . . . .	34

3.3	RSVM-PDProx . . . . .	37
3.3.1	Rescaled $\alpha$ -hinge Loss Function . . . . .	37
3.3.2	Non-smooth Regularizer, $\ \cdot\ _2$ . . . . .	38
3.4	Analysis of RSVM-PDProx . . . . .	41
3.4.1	Rate of Convergence of RSVM-PDProx . . . . .	42
3.4.2	Time Complexity of RSVM-PDProx . . . . .	45
3.5	Numerical Experiments and Results . . . . .	46
3.5.1	Experiments on Synthetic Data Sets . . . . .	46
3.5.2	Experiments on Real-world Data Sets . . . . .	48
3.6	Discussion about dual variable and regularization parameter . . . . .	55
3.7	Summary of the Work . . . . .	57
<b>4</b>	<b>Res-TSVR: Robust Twin Support Vector Regression based on Rescaled Hinge Loss Function</b> . . . . .	<b>59</b>
4.1	Introduction . . . . .	59
4.1.1	Motivation Behind This Work . . . . .	61
4.1.2	Contribution of This Work . . . . .	62
4.1.3	Outline . . . . .	62
4.2	Brief Introduction to $\varepsilon$ -SVR and TSVR . . . . .	63
4.2.1	Support Vector Regression . . . . .	63
4.2.2	Twin Support Vector Regression . . . . .	64
4.3	Res-TSVR . . . . .	66
4.3.1	Problem Formulation . . . . .	67
4.3.2	Linear Res-TSVR . . . . .	70
4.3.3	Non-Linear Res-TSVR . . . . .	73
4.3.4	Algorithm Res-TSVR . . . . .	74
4.4	Analysis of Res-TSVR . . . . .	76
4.4.1	Convergence Proof of Algorithm 2 . . . . .	77
4.4.2	An Estimate of $k_{\max}$ in Algorithm 2 for an $\varepsilon$ -Precision Solution . . . . .	78
4.5	Numerical Experiments and Results . . . . .	79
4.5.1	Performance Criteria . . . . .	80
4.5.2	Performance on Synthetic Data Sets . . . . .	81
4.5.3	Performance on Real-world Data Sets . . . . .	85
4.6	Discussion About the Rescaling Parameter, $\hat{\eta}$ . . . . .	90
4.7	Summary . . . . .	92

---

<b>5</b>	<b>Robust Diabetic Retinopathy Detection Using Twin Support Vector Machines</b>	<b>95</b>
5.1	Introduction . . . . .	96
5.1.1	Motivation and Contributions . . . . .	97
5.2	Related work . . . . .	99
5.3	Dataset Used . . . . .	101
5.3.1	Feature Extraction . . . . .	101
5.3.2	Number and Area of Microaneurysms With a Density of Hard Exudates . . . . .	102
5.3.3	Blood Vessels Extraction . . . . .	103
5.3.4	Entropy . . . . .	103
5.3.5	Standard Deviation . . . . .	105
5.3.6	Morphological Transformations . . . . .	105
5.4	Classifiers Used . . . . .	105
5.5	Numerical Experiments and Results . . . . .	109
5.5.1	Results On DIARETDB1 Data Set (Without Noise) . . . . .	109
5.5.2	Results On DIARETDB1 Data Set (With Gaussian Noise) . . . . .	110
5.6	Summary . . . . .	114
<b>6</b>	<b><math>\overline{\text{pin}}</math>-TSVM: A robust transductive support vector machine and its application to the detection of COVID-19 infected patients</b>	<b>115</b>
6.1	Introduction . . . . .	115
6.1.1	A Brief Introduction of TSVM . . . . .	116
6.1.2	Motivation and Contribution . . . . .	119
6.1.3	Outline . . . . .	120
6.2	$\overline{\text{pin}}$ -TSVM: A Robust Transductive Support Vector Machine with Truncated Pinball Loss Function . . . . .	120
6.3	Numerical Experiments . . . . .	129
6.3.1	Experiments on Real-world Data Sets . . . . .	131
6.4	Application to the Detection of Novel Coronavirus (COVID-19) Infected Patients using Chest X-ray Images . . . . .	140
6.5	Summary . . . . .	142
<b>7</b>	<b>Conclusion and Future Directions</b>	<b>145</b>
7.1	Conclusion . . . . .	145
7.2	Future Directions . . . . .	147
