

## List of Tables

	Page No
Table 1.1. Aluminium alloy designation system.	15
Table 1.2. Summary of temper designations for aluminium alloys.	17
Table 1.3. AA-7017 plate properties at room temperature.	22
Table 2.1. Initial plate dimension and as received condition of studied aluminium alloy plates	26
Table 2.2. Chemical composition of the different aluminium alloys	27
Table 2.3. Aging schedule for differently heat treated AA-7017 alloy	27
Table 2.4. Experimental parameters used for X-Ray diffraction measurements.	29
Table 2.5. Experimental parameters used for Texture measurements.	30
Table 2.6. Some properties of the projectiles.	38
<u>Table 3.1.</u> Analyzed compositions of the precipitates by EPMA.	43
<u>Table 3.2.</u> Mechanical properties of the plate at surface and centre	44
<u>Table 5.1.</u> Mechanical properties <u>of</u> AA-7017 alloy in different heat-treated conditions.	84
Table 7.1. Mechanical properties of studied aluminium alloy plates.	104
Table 8.1. Mechanical properties of the three studied aluminium alloys.	119
