DECLARATION BY THE CANDIDATE.....	iii
CERTIFICATE BY SUPERVISOR	iii
COPYRIGHT TRANSFER CERTIFICATE.....	iv
AKNOWLEDGMENT.....	vi
TABLE OF CONTENTS.....	viii
LIST OF FUGURES.....	xv
LIST OF TABLES.....	xix
PREFACE.....	xxii
CHAPTER 1: INTRODUCTION.....	1
1.1 Introduction to Parachute Deceleration System	2
1.1.1 Challenges in Design for Operational Reliability.....	3
1.1.2 Problem Related to Design and Development of a PDS.....	4
1.2 Introduction to Tether.....	7
1.3 Relevance of the Present Work.....	8
1.3.1 Related to Designing of Parachute Deceleration System.....	8
1.3.2 Related to Designing of Hybrid Tether.....	9
1.4 Research Objectives and Goals.....	9
1.4.1 Related to PDS.....	10
1.4.2 Related to Tether.....	11
1.5 Organization of Thesis.....	11
1.6 Summary.....	16

CHAPTER 2: REVIEW OF LITERATURE ON PARACHUTE DECELERATION SYSTEM.....	18
2.1 Introduction.....	18
2.2 Apollo’s Crew Module Earth Landing System.....	20
2.2.1 Design Feature.....	21
2.2.2 Parachute Specification.....	23
2.3 Soyuz Parachute Landing System.....	24
2.3.1 Sequence of Operation.....	25
2.3.2 Parachute Specification	26
2.4 Orion’s Crew Module Recovery Parachute System	27
2.5 Space Module Recover Experiment (SRE)	28
2.6 Other Types of Parachute used in Space Missions.....	30
2.7 Summary.....	31
CHAPTER 3: SUSPENSION-LINES AND RISER LENGTH DETERMINATION FOR AVOIDING WAKE EFFECT	32
3.1 Introduction	33
3.2 Model Design and Fabrication	37
3.2.1 Forebody	37
3.2.2 Parachute Model.....	39
3.3 Instrumentation and Data Acquisition System.....	40
3.3.1 Load Cell Calibration	40
3.3.2 Six-Component Strain-Gauge Balance Calibration	40
3.4 Wind Tunnel Test Setup	41
3.4.1 Experimental Setup.....	41
3.5 Test Result and Discussions.....	43
3.5.1 Effect of Forebody	43

3.5.2	Effect of Parachute	43
3.5.3	Test Results for a Single Parachute Behind the FB.....	45
3.5.4	Test Results for a Cluster of Two Parachutes Behind the FB.....	46
3.5.5	Dynamic Stability Analysis for a Single and Cluster of Two Parachutes.	48
3.6	Summary.....	50
CHAPTER 4: DETERMINATION OF SHAPE AND SIZE OF CANOPY OF MAIN PARACHUTE.....		52
4.1	Introduction.....	53
4.2	Mathematical Modeling.....	56
4.2.1	Basic Equilibrium Equations.....	56
4.2.2	Point Mass Trajectory Model.....	57
4.2.3	Drag Area Variation of Parachute.....	58
4.3	Parameters Influencing the Selection of Parachute.....	59
4.3.1	Canopy Filling Time.....	59
4.3.2	Parachute Sizing.....	62
4.3.3	Angle of Oscillation.....	63
4.3.4	Parachute Opening Shock Load.....	64
4.3.5	Peak Deceleration.....	66
4.4	Summary.....	69
CHAPTER 5: PARACHUTE DECELERATION SYSTEM DESIGN AND TESTING.....		71
5.1	Introduction.....	73
5.2	Sequence of Operation.....	74
5.3	General Design Philosophy of Parachute Deceleration System.....	77
5.3.1	Estimation of Parachute Opening Force.....	78
5.3.2	Parachute Inflation Time.....	81

5.3.3	Design Factor.....	82
5.3.4	Estimation of Load on Parachute Components for Material Selection....	84
5.3.5	Material Selection Criteria.....	86
5.3.6	Parachute Testing and Evaluation	86
5.4	Design of Parachute Deceleration System	87
5.4.1	TCS Chute	87
5.4.2	Pilot Chute	98
5.4.3	Drogue Parachute: First Stage Decelerator	101
5.4.4	Main Parachute: Second Stage Decelerator	117
5.5	Summary.....	137
CHAPTER 6: RISKS AND HAZARD ASSOCIATED WITH PARACHUTE DECCELERATION SYSTEM.....		139
6.1	Introduction.....	139
6.2	Risk and Hazard Analysis	140
6.3	Risk Analysis of Parachute Deceleration System	143
6.3.1	Hazard-Risk Assessment Matrix for TCS/Pilot Chute	144
6.3.2	Hazard-Risk Assessment Matrix for Drogue Parachute.....	145
6.3.3	Hazard-Risk Assessment Matrix for Main Parachute	145
6.4	Accident Scenario of Parachutes.....	147
6.4.1	TCS Chute	147
6.4.2	Pilot Chute	150
6.4.3	Drogue Parachute	151
6.4.4	Main Parachute	152
6.5	Mitigation of Risk-Hazard Events.....	153
6.6	Summary.....	154

CHAPTER 7: FAILURE MODE AND EFFECTS ANALYSIS AND FAULT TREE ANALYSIS OF PARACHUTE DECELERATION SYSTEM	156
7.1 Introduction.....	156
7.2 FMEA Approach.....	158
7.2.1 FMEA Rating Scale.....	158
7.2.2 Risk Priority Number.....	158
7.3 FMEA of Parachute Deceleration System ..	162
7.3.1 TCS Chute	163
7.3.2 Pilot Chute ..	165
7.3.3 Drogue Parachute	166
7.3.4 Main Parachute	168
7.4 Overall Analysis of Failure Modes ...	169
7.4.1 Distribution of Failure Modes Based on Severity Rating.....	170
7.4.2 Distribution of Failure Modes Based on Occurrence Rating	170
7.4.3 Distribution of Failure Modes Based on Detection rating ..	171
7.4.4 Ranking of Failure Modes with “Corrective Action Required”	172
7.5 Limitation of FMEA	173
7.6 Fault Tree Analysis ...	174
7.6.1 TCS/Pilot Chute.....	175
7.6.2 FTA of Drogue Parachute.....	176
7.6.3 Main Parachute	177
7.7 Proposed Integrated FTA-FMEA Model.	178
7.7.1 FTA-FMEA Framework.....	179
7.7.2 FTA-FMEA Working Steps.....	180
7.7.3 Integrated FTA-FMEA Approach for Failure Analysis of PDS.	183

7.8	Summary.....	185
CHAPTER 8: RELIABILITY ANALYSIS OF PARACHUTE DECELERATION SYSTEM.....		186
8.1	Introduction	188
8.1.1	Uncertainty Related to Parachute	189
8.1.2	Factors for Poor Reliability of Parachute	189
8.2	Development of the Reliability Model	190
8.2.1	Stress-Strength Method	192
8.2.2	Operational Reliability	195
8.2.3	Components Reliability and Confidence Level	196
8.3	Computation of Reliability of Parachute Deceleration System.....	197
8.3.1	Reliability Block Diagram.....	197
8.3.2	Allocation (Target) of Reliability	201
8.3.3	Reliability Estimation of TCS/Pilot Chute	202
8.3.4	Reliability Estimation of Drogue Parachute	205
8.3.5	Reliability Estimation of Main Parachute	207
8.3.6	Overall Reliability of Parachute Deceleration System	212
8.4	Summary	212
CHAPTER 9: RELIABILITY BASED OPTIMIZED DESIGN OF HYBRID TETHER.....		215
9.1	Introduction	216
9.2	Probabilistic Design Model.....	216
9.3	Classical Design Approach	218
9.4	Probabilistic Design Approach.....	221
9.5	Summary	226

CHAPTER 10: CONCLUSIONS AND SCOPE FOR FURTHER WORK..	227
10.1 Introduction .	227
10.2 Summary of Finding and Suggestions...	229
10.3 Limitations of the Present Work	230
10.4 Scope for Further Work.	231
REFERENCES.....	232
APPENDIX ‘A’.....	242
LIST OF PUBLICATIONS.....	244
