

List of Figures

Figure 1.1 Schematic of the distribution of Earth's Water.....	1
Figure 2.1 Effect of pumping schedule on the groundwater level.....	20
Figure 2.2 Schematic sketch showing the groundwater and surface water interaction	22
Figure 2.3 Process of the groundwater and surface water interactions.....	23
Figure 3.1 Location map of the Study Area.....	29
Figure 3.2 Administrative division and Major River network in the study area	30
Figure 3.3 Elevation Model of two tiles used in the study area.....	35
Figure 3.4 Digital Elevation Model of the Study area.....	36
Figure 3.5 Fence diagram showing the lateral extent of the study area.....	41
Figure 3.6 Two Cross-sections AA' and BB' marked on the study area.....	41
Figure 3.7 Lateral disposition of the cross sections AA' and BB' with their legend	42
Figure 4.1 Flowchart of methodology for preparation of the Groundwater flow model.....	49
Figure 4.2 Numerical and Analytical solutions for one dimensional groundwater flow.....	59
Figure 4.3 Scales of the groundwater system	60
Figure 5.1 Adopted methodology for Groundwater flow Model using GMS	66
Figure 5.2 Computational Mesh with the River boundary conditions.....	68
Figure 5.3 Groundwater model with five layers	68
Figure 5.4 Values of River Head stage (m) in transient condition	69
Figure 5.5 Values of River Bottom Elevation (m) in transient condition.....	70
Figure 5.6 Recharge rate value (m/d) in transient condition	70
Figure 5.7 Model discretization with five layers of the model.....	71
Figure 5.8 Borehole data entry into the Borehole editor of GMS	72
Figure 5.9 Network of borehole data in the study area.....	73
Figure 5.10 Borehole data representation in the GMS	73

Figure 5.11 Interpolation of Solid data into the Model	74
Figure 5.12 Model Boundary conditions in the study area.....	75
Figure 5.13 Elevation values for the top surface of model.....	77
Figure 5.14 Elevation values for the bottom surface of the model.....	78
Figure 5.15 Location of observation wells in the study area.	88
Figure 5.16 Comparison of computed and observed head for fourteen observation wells.....	94
Figure 5.17 Relationship between the SEE and Recharge Rate	95
Figure 5.18 Soil Moisture Index Map of the study area.	98
Figure 5.19 Observed head Vs Computed head (in m).....	101
Figure 6.1 Groundwater flow lines along with colour bar, and calibration target.....	103
Figure 6.2 Time series graph for three observation wells (a) Varanasi (b) Barwaon (c) Aurai	104
Figure 6.3 Calibration targets with the observed head values	105
Figure 6.4 Scatter plot between computed head and observed head	106
Figure 6.5 Observed head vs modelled head	107
Figure 6.6 Observed head Vs Residual (in m).....	108
Figure 6.7 Soil Moisture Index map of the study area showing two cross-sections AB and CD	109
Figure 6.8 Soil Moisture profile at two cross-sections a) A-B, and b) C-D	109
Figure 6.9 Groundwater flow direction map.....	114

Acronyms and Abbreviations

AEM	:	Analytic Element Method
AnAqSim	:	Analytic Aquifer simulator
ANN	:	Artificial Neural Network
ASCII	:	American Standard Code for Information Interchange
ASTER	:	Advanced Spaceborne Thermal Emission and Reflection Radiometer
BCM	:	Billion Cubic Meter
BEM	:	Boundary Element Method
BGL	:	Below Ground Level
BHU	:	Banaras Hindu University
CGWB	:	Central Ground Water Board
CWC	:	Central Water Commission
DEM	:	Digital Elevation Model
DGPS	:	Differential Global Positioning System
DSS	:	Decision Support System
FDM	:	Finite Difference Method
FEFLOW	:	Finite Element Flow
FEM	:	Finite Element Method
FEMWATER	:	Finite Element Model of Water Flow
FVM	:	Finite Volume Method
GA	:	Genetic Algorithm
GDEM	:	Global Digital Elevation Model
GIS	:	Geographic Information System
GLCF	:	Global Land Cover Facility
GMS	:	Groundwater Modeling System

GPS	:	Global Positioning System
IFDM	:	Integrated Finite Difference Method
IMD	:	Indian Meteorological Department
KVP	:	Kashi Vidya Peeth
L/MIN	:	Liter per Minute
LPS	:	Liter per Second
LULC	:	Land Use Land Cover
MCM	:	Million Cubic Meters
MO	:	Monsoon
MSL	:	Mean Sea Level
NASA	:	National Aeronautics and Space Administration
NRMSE	:	Normalized Root Mean Square Error
NRSC	:	National Remote Sensing Centre
PDE	:	Partial Differential Equation
POMK	:	Post Monsoon Kharif
POMR	:	Pre-monsoon Ravi
PRM	:	Pre Monsoon
RMSE	:	Root Mean Square Error
SD	:	Standard Deviation
SEE	:	Standard Error of Estimate
SMI	:	Soil Moisture Index
SOI	:	Survey of India
SRTM	:	Shuttle Radar Topography Mission
USGS	:	United States Geological Survey
WRIS	:	Water Resource Information System

CERTIFICATE	i
DECLARATION BY THE CANDIDATE	ii
CERTIFICATE BY THE SUPERVISOR(S)	ii
COPYRIGHT TRANSFER CERTIFICATE.....	iii
ACKNOWLEDGEMENT	v
LIST OF FIGURES	vii
LIST OF TABLES	ix
ACRONYMS AND ABBREVIATIONS	x
TABLE OF CONTENTS.....	xii
PREFACE.....	xvi
CHAPTER 1	1-8
Introduction.....	1
1.1 Background	1
1.2 Groundwater Modeling	2
1.3 Motivation: Groundwater Scenario in India.....	4
1.4 Aim and Research Objectives (Groundwater Management).....	6
1.5 Organization of the Thesis	7
CHAPTER 2	9-27
Literature review	9
2.1 General	9
2.2 Groundwater Models.....	10
2.3 Groundwater codes/programs	13
2.4 Numerical models	14
2.5 Groundwater and surface water Interaction	20
2.5.1 Process Driven by Groundwater.....	22

2.5.2	Processes Driven by Surface water	24
2.5.2.1	Overland Flow and Through-Flow.....	24
2.5.2.2	River Flow Attenuation.....	25
2.5.2.3	In-Stream Storages	25
2.5.2.4	Off-Stream Storages.....	26
2.6	Summary	27
CHAPTER 3		28-46
Study Area		28
3.1	General	28
3.2	Physiography and topography.....	29
3.3	Climate and rainfall.....	30
3.4	Field Data.....	32
3.4.1	Digital Elevation Model.....	33
3.4.2	Geological properties	36
3.4.3	Stratigraphic features.....	37
3.5	Aquifer Geometry	38
3.6	Hydraulic Conductivity.....	42
3.7	River Network.....	43
3.8	Meteorological data.....	45
3.9	Summary	46
CHAPTER 4		47-62
Methodology		47
4.1	General	47
4.2	An approach to the Modeling.....	47
4.2.1	Conceptual Model	48

4.3	Groundwater Flow simulation.....	51
4.4	Boundary and initial conditions	51
4.4.1	Examples of Different Boundaries.....	53
4.5	Recharge.....	54
4.6	Hydraulic conductivity.....	56
4.7	Well discharge (Pumping).....	57
4.8	Calibration.....	57
4.9	Validation.....	58
4.10	Model Development using Analytical Approach.....	58
4.11	Groundwater-surface water (river) interaction.....	59
4.12	Summary	61
CHAPTER 5	63-101
Model setup	63
5.1	General	63
5.2	Groundwater Model Conceptualization of the study area.....	65
5.3	Borehole Module.....	71
5.4	Boundary Conditions.....	74
5.4.1	River Boundary	74
5.4.2	Specified flux Boundary.....	76
5.5	Top and bottom layers.....	76
5.6	Depth of Groundwater Level.....	78
5.7	Well Discharge.....	79
5.8	Observation wells.....	87
5.9	Model Calibration	91
5.10	Model sensitivity	94
5.11	Model validation	96

5.12	Soil Moisture Study.....	97
5.13	Groundwater Model Development using AEM	98
5.13.1	Boundary conditions	99
5.13.2	Recharge and discharge well.....	99
5.14	AEM model calibration.....	99
5.15	Summary	101
CHAPTER 6	102-115
Result and Discussion	102
6.1	General	102
6.2	Current state of study area and Model output	102
6.3	Scenario Generation	110
6.4	Comparison of outputs produced by FDM and AEM approach.	111
6.5	Result of River-Aquifer (R-A) Exchange	112
6.6	Sustainable Management of the Water Resources System	114
6.7	Summary	115
CHAPTER 7	116-122
Conclusion	116
7.1	General	116
7.2	Limitations of the study.....	121
7.3	Recommendations	122
