

List of Tables

Table	Heading	Page no.
Table 1.1	Potential applications of surfactants	4
Table 2.1	Type and microbial origin of biosurfactants	24
Table 2.2	Biosurfactant application in medical field	29
Table 2.3	Biosurfactant recovery methods and their relative advantages	38
Table 3.1	Effect of different nitrogen source on emulsification index	57
Table 3.2	Effect of Microelements on biomass and emulsification index	58
Table 3.3	Six Medium Factors and Their Levels used in Plackett-Burman Design	63
Table 3.4	Matrix of Plackett-Burman Design and results of evolution of factors affecting Biosurfactant production by <i>Candida tropicalis</i> MTCC 230	64
Table 3.5	Selected parameter range for biosurfactant production	66
Table 3.6	Analysis of Plackett-Burman Design on optimization of culture medium in shake flask culture	67
Table 3.7	CCD matrix employed for Hydrocarbon, ammonium Chloride, Microelements, and Temperature independent variables	69
Table 3.8	Regression coefficients and their significance for response surface quadratic	71
Table 3.9	ANOVA of regression model	73
Table 4.1	Parameters for oil recovery in sand pack column (SPC) using water flood and biosurfactant produced from an adaptive strain <i>C. tropicalis</i> MTCC230	100
