Abstract	
List of Figures	i-v
List of Tables	vi
Symbols Used	vii
Abbreviations Used	viii-ix
Preface	x-xi
Chapter 1 Introduction	1-11
1.1 Immunosuppressants	1
1.2 Market value of Immunosuppressant	2
1.3 Approval of Mycophenolic Acid as Immunosuppressant	3
1.4 Mycophenolic Acid as Compared with others	4
Immunosuppressants	
1.5 Other Roles of Mycophenolic Acid	4
1.5.1 Treatment of Psoriasis Using Mycophenolic Acid	5
1.5.2 Treatment in Tuberous Sclerosis	6
1.5.3 Reduction in Occurrence of Skin Cancer	6
1.5.4 Anti Tumour Effect of Mycophenolic Acid	7
1.5.5 Role of Mycophenolic Acid against Human	7
Immunodeficiency Virus (HIV)	
1.6 Side Effects of Mycophenolic Acid	8

1.7	Objectives of the study	9
Chapter 2	Review of Literature	12-38
2.1	Mycophenolic Acid	12
2.2	Discovery of Mycophenolic Acid	13
2.3	Chemical Structure of Mycophenolic Acid	14
2.4	Biological Properties of Mycophenolic Acid	16
2.5	Mycophenolic Acid: Mechanism of Interaction	17
2.6	Mycophenolic Acid Producing Microorganism	18
2.7	Biosynthetic Pathway of Mycophenolic Acid	19
2.8	Microbial Production of Mycophenolic Acid	25
2.9	Strain improvement	32
2.10	Optimization of production parameters	34
2.11	Influence of pH and Temperature	35
2.12	Use of Different Bioreactor for Production of MPA	35
2.13	Fed Batch Strategy	36
2.14	Extraction and Purification of Mycophenolic acid	37
Chapter 3	Materials and Methods	39-56
3.1	Materials	39
3.1.1	Microorganism	39
3.1.2	Equipments	39
3.1.3	Chemicals and Reagents	41
3.2	Media	41

3.2.1	Seed Culture Medium Composition for <i>Penicillium brevicompactum</i>	41
3.2.2	Media for Mycophenolic Acid Production	42
3.2.3	Method of Sterilization	43
3.3	Experimental Set-up for Mycophenolic Acid Production	44
3.4	Volumetric oxygen transfer coefficient (k_{La}) determination	46
3.5	Microscopic Image Analysis for Morphological Changes	48
3.6	Estimation of Broth Viscosity	49
3.7	Analytical Methods	49
3.7.1	Estimation of Biomass	49
3.7.2	Determining of Reducing Sugar by DNS Method	50
3.7.3	Estimation of Mycophenolic Acid Concentration	51
3.8	Extraction of Mycophenolic Acid	52
3.9	Column Chromatography	53
3.10	HPLC Study for Mycophenolic Acid Quantification	53
3.11	FTIR Study for Qualitative Analysis of Mycophenolic Acid	54
3.12	Response surface methodology	54
3.13	Central Composite Designs	55
3.14	Software	56
Chapter 4	Results and Discussion	57-110
4.1	Media Optimization Studies for Mycophenolic Acid	58

	Production	
4.1.1	Studies on Carbon Sources	58
4.1.2	Studies on Nitrogen Sources	59
4.1.3	Studies on Methionine Addition	60
4.1.4	Studies on Glycine Addition	62
4.2	Optimization Studies of Process Parameters for Mycophenolic Acid	63
4.2.1	Effect of Agitation Rate on Mycophenolic Acid Production	64
4.2.2	Effect of Aeration Rate on Mycophenolic Acid Production	67
4.3	Production Kinetics Studies of Mycophenolic Acid using the Batch Fermentation Process	70
4.4	Study of Morphological Variations during Mycophenolic Acid Production	74
4.4.1	Morphological Characterization	74
4.5	Rheological Properties of Fermented Broth during Mycophenolic Acid Production	77
4.5.1	Consistency index (k) and Flow behaviour index (n) of the fermented broth	78
4.6	Oxygen utilization study	80
4.6.1	Variation of Dissolved Oxygen during Mycophenolic Acid Production	80
4.6.2	Effect of Dissolved Oxygen Concentration on Mycophenolic Acid Production	81

4.6.3	Variation in Volumetric Oxygen Mass Transfer Coefficient ($k_L a$) in Fermented Broth with Increasing Aeration rate	84
4.7	Production Kinetics Studies of Mycophenolic Acid Production using Fed-batch Fermentation Process	86
4.8	Study of Mycophenolic Acid Production using Continuous Mode of Cultivation	88
4.9	Comparison of the Batch, Fed-batch, and Continuous Fermentation Process for Mycophenolic Acid Production	90
4.10	Extraction and Purification of Mycophenolic Acid	92
4.10.1	Solvent extraction of Mycophenolic Acid from the Fermented Broth	92
4.10.2	Purification of Mycophenolic Acid by Column Chromatography	93
4.10.3	Factors Affecting Mycophenolic Acid Purification in Column chromatography	95
4.10.3.1	Effect of pH during Purification of Mycophenolic Acid	95
4.10.3.2	Effect of Flow Rate during Purification of Mycophenolic Acid	96
4.10.3.3	Effect of Volume of the Eluent during Purification of Mycophenolic Acid	97
4.11	Optimization of Mycophenolic Acid Purification by Response Surface Methodology	98
4.11.1	ANOVA of Response Surface Plots	101

4.12	Quantitative analysis of purified sample using HPLC	107
4.13	Qualitative analysis of purified sample using FTIR	108
Chapter 5	Conclusion	111-115
	Summary and Conclusions	
	References	116-147
	List of Publications	148
