

Table of Contents

Contents/Chapters	Page No.
List of Figures	xii
List of Tables	xv
Abbreviations	xvii
Preface	xxi
1.0. Introduction	1
2.0. Literature Review	9
2.1. Mechanism of pollutant removal by Microalgae	10
2.1.1. Carbon Assimilation	10
2.1.2. Assimilation of nitrogen	12
2.1.3. Assimilation of phosphorus	13
2.2. Assimilation of heavy metals	14
2.2.1. Interaction of HMs with the cell wall of microalgae	18
2.2.2. Interaction with the plasma membrane	18
2.2.3. Physical Adsorption	19
2.2.4. Role of microalgal organic acids	19
2.2.5. Precipitation	19
2.2.6. Metallothioneins	20
2.2.7. Role of the vacuole in metal sequestration	20
2.2.8. Role of the chloroplast and mitochondria	21
2.3. Predictor variables affecting microalgal growth in wastewater	22
2.3.1. Microalgae Class	22
2.3.2. Wastewater Source	23

2.3.2.1. Domestic Wastewater	27
2.3.2.2. Municipal Wastewater	28
2.3.2.3. Agriculture Wastewater	29
2.3.2.4. Industrial Wastewater	29
2.3.2.5. Livestock Wastewater	31
2.3.3. Cultivation Type	32
2.3.4. Culture Type	33
2.3.5. Pretreatment of wastewater	34
2.3.6. Reactor Type	35
2.3.7. CO ₂ content	35
2.3.8. Temperature	36
2.3.9. pH	36
2.3.10. Initial Inoculum Level	37
2.3.11. Light Intensity & Photoperiod	37
2.3.12. Initial Nutrient Concentration	38
2.4. Machine Learning	38
2.4.1. Decision Tree	39
2.4.1.1. Attribute selection measures	40
2.4.2. Association Rule Mining	41
3.0. Decision tree analysis for predicting the best combination of predictor variables for increasing wastewater treatment capability and biomass production (generalized class)	43
3.1. Introduction	44
3.2. Methodology	44
3.2.1. Dataset Preparation	44
3.2.2. Correlation Analysis	46

3.2.3. Decision tree classification and validation	46
3.3. Results and Discussion	47
3.3.1. Correlation Analysis	47
3.3.2. Decision Tree Analysis	50
3.3.2.1. Nitrogen Removal Efficiency	50
3.3.2.2. Phosphorus Removal Efficiency	54
3.3.2.3. Biomass Production	56
3.4. Conclusions	59
4.0. Decision tree analysis for predicting the best combination of predictor variables for increasing wastewater treatment capability and biomass production (for specific class)	61
4.1. Introduction	62
4.2. Methodology	63
4.2.1. Dataset construction and pre-processing	63
4.2.2. Decision Tree Analysis	64
4.3. Result and Discussion	66
4.3.1. Decision Tree Analysis for class <i>Trebouxiophyceae</i>	66
4.3.1.1. Nitrogen Removal Efficiency	66
4.3.1.2. Phosphorus Removal Efficiency	69
4.3.1.3. Biomass Production	72
4.3.2. Decision Tree Analysis for class <i>Chlorophyceae</i>	75
4.3.2.1. Nitrogen Removal Efficiency	75
4.3.2.2. Phosphorus Removal Efficiency	78
4.3.2.3. Biomass Production	80
4.4. Conclusions	83
5.0. Application of association rule mining for finding the specific condition of predictor variables for increasing wastewater treatment capability and biomass production	85

5.1. Introduction	86
5.2. Materials and Methods	86
5.2.1. Data collection and pre-processing	86
5.2.2. Computational details	89
5.3. Results and Discussion	90
5.3.1. Microalgae Class	90
5.3.2. Wastewater Source	92
5.3.3. Pre-treatment Method	95
5.3.4. Reactor Type	97
5.3.5. CO ₂ Content	98
5.3.6. Temperature	100
5.3.7. Initial Inoculum Level	102
5.3.8. pH	104
5.3.9. Light Intensity and Photoperiod	106
5.3.10. Nitrogen/Phosphorus (N/P) Ratio	110
5.4. Conclusions	112
6.0. Computational and Experimental Validation of generate ML models	115
6.1. Computational Validation	116
6.2. Experimental validation	117
6.2.1. Materials and Methods	117
6.2.1.1. Strain Isolation	117
6.2.1.2. Strain Identification	118
6.2.1.3. Wastewater Preparation	119
6.2.1.4. Experimental design and conduction	120
6.2.1.5. Biomass Measurement	121

6.2.2. Results and Discussion	122
6.2.2.1. Strain Identification	122
6.2.2.2. Experimental Verification	123
6.3. Conclusions	127
7.0. Cost Benefit Analysis of LED's application for the microalgae cultivation process	129
7.1. Introduction	130
7.2. Cost Benefit Analysis	130
7.2.1. Input parameters for electricity and investment cost	130
7.2.2. Calculation of electricity and investment cost	131
7.3. Energy balance analysis	134
7.4. Approaches for reduction in the cost of AL	135
7.4.1. Arduino based automated control system	135
7.4.1.1. Working of the proposed Arduino based automated control system	136
7.4.2. Photovoltaic powered photobioreactors	137
7.4.3. Application of additional light	139
7.5. Future Perspective	139
7.6. Conclusions	141
8.0. Overall Conclusion and Future Perspective	143
8.1. Overall Conclusions	144
8.2. Future Perspectives	144
9.0. References	147
List of Publications	201
Media Coverage	204
