Chapter 1: Introduction	1-16
1.1 Introduction	1
1.1.1 Dyes: Sources and pollution	1
1.1.2 Environmental issues related with textile dye	2
1.2 Classification of dyes	2
1.3 The Current treatment methods for dye degradation	6
1.4 Biological methods for dye removal in wastewater	7
1.5 Biodegradation of azo dyes	8

1.6	Biological processes of dye degradation	8
1.6.1	Anaerobic condition of azo dye degradation	9
1.6.2	Aerobic condition of azo dye degradation	11
1.6.3	Suspended growth bioreactors	12
1.6.4	Attached growth bio-reactors	12
1.7	Main factors that influence the biological process of bacterial degradation	14
Chapter 2: Literature review		17-28
2.1	Literature Review	17
2.1.1	Biodegradation of azo dye	17
2.1.2	Biodegradation of dye by pure culture and mixed culture bacteria	18
2.1.3	Biodegradation by fungi	19
2.1.4	Biodegradation of dye by algae	20
2.1.5	Biodegradation of dye by yeast	20
2.1.6	Biodegradation of dye by enzymes	21
2.2	Summary of literature review and research gap	26
2.3	The objective of the research work	28
Chapter 3: Bioremediation of Congo Red in an anaerobic moving bed bioreactor: Process optimization and kinetic modeling		29-51
3.1	Introduction	29
3.2	Materials and methods	31
3.2.1	Minimal salt medium and bacterial culture	31

3.2.2	Detail description of bio carrier and bioreactor set-up	32
3.2.3	Optimization of process parameters	33
3.2.4	Continuous study for removal of CR in the AnMBBR	34
3.2.5	Analytical techniques	35
3.2.6	Kinetic of CR dye removal	35
3.3	Results and discussion	36
3.3.1	CR dye degrading bacterial species	36
3.3.2	Morphological study of PUF-PP bio-carrier	38
3.3.3	Optimization of process variables	39
3.3.4	Effect of process variables	42
	3.3.4.1 Effect of initial CR dye concentration and BFR.	42
	3.3.4.2 Effect of initial CR concentration and agitation speed.	43
	3.3.4.3 Effect of BFR and agitation speed	43
3.3.5	Verification of the model	45
3.3.6	Kinetic study	46
3.3.7	The continuous study in An MBBR for biodegradation of CR dye	47
3.3.8	FTIR analysis of CR dye before and after biodegradation	50
3.4	Conclusions	51
	Chapter 4: Biodegradation of Congo red dye using <i>Lysinibacillus</i> species in a moving bed biofilm reactor: Continuous study and kinetic evaluation	52-69
4.1	Introduction	52

4.2	Materials and methods	55
4.2.1	Chemicals and composition of mineral salt media	55
4.2.2	Enrichment of dye degrading bacterial species and isolation process	55
4.2.3	Bioreactor set-up and bio carrier configuration	56
4.2.4	Analytical methods	59
4.2.5	Kinetics study	59
4.2.6	Statistical analysis	60
4.3	Results and discussion	61
4.3.1	Identification of dye degrading bacterial species and characterization of biocarrier	61
4.3.2	Effect of initial dye concentration on removal efficiency and elimination capacity	63
4.3.3	Kinetic analysis during biodegradation of CR dye	66
4.3.3.1	First-order kinetic model	66
4.3.3.2	Second-order kinetic model (Grau model)	67
4.4	Conclusions	69
	Chapter 5: Biodegradation of Congo red dye using polyurethane foam-based biocarrier combined with activated carbon and sodium alginate:	70-92
	Batch and continuous study	
5.1	Introduction	70
5.2	Materials and Methods	73
5.2.1	Minimal salt medium and bacterial culture	73

5.2.2	Description of the modified bio-carrier	74
5.2.3	Packed bed bioreactor setup and operation	74
5.2.4	Continuous study for dye biodegradation in packed bed bioreactor	76
5.2.5	Microbial growth kinetics	76
5.2.5.1.	Monod model	77
5.2.5.2.	Andrew-Haldane model	77
5.2.6.	Analytical techniques	77
5.2.7.	Statistical analysis	78
5.3	Results and discussion	78
5.3.1	Identification and characterization of bacterial species	78
5.3.2	Process parameters optimization	80
5.3.2.1	The effect of process time	80
5.3.2.2	Effect of glucose concentration	82
5.3.2.3	Effect of dye concentration	83
5.3.3	Performance evaluation of the continuous packed bed bioreactors	85
5.3.4	Growth kinetic study	88
5.3.5.	FTIR analysis	90
5.3.6.	Phytotoxicity analysis	91
5.4	Conclusions	92
Chapter 6: Summary of the thesis and scope for future work		93-94
6.1.	Summary of the work	93

6.2. Future scope	95
References	96-121
Appendix	122-124
A: List of conferences	122
B: List of Workshop	123
C: List of research publications	123
