

## LIST OF TABLES

S. No.	Table	Page No.
1.1	A comparative study of Daptomycin with other popular anti-MRSA drugs	5
2.1	Microbial strains producing Daptomycin	31
2.2	Precursor directed production of Daptomycin	38
3.1	List of microbial cultures procured from different culture conditions	48
3.2	Orthogonal project design for Daptomycin production	56
3.3	Characterization of topical gel with antibiotics and noble metal nanoparticles	76
4.1	Results of optimization by OFAT method	88
4.2	Results of optimization by Taguchi L16 Orthogonal Method	90
4.3	Response table for SN ratios and for means	90
4.4	Table showing various kinetic parameters evaluated for Daptomycin production	94
4.5	Rheological parameters evaluated for various models	98
4.6	Optimization of various conditions for pellet formation	114
4.7	Comparison between Daptomycin production in an internal loop airlift bioreactor and stirred tank bioreactor.	116
4.8	Comparison of Daptomycin production profiles for different modes of cell immobilization	123
4.9	Bubble characterization under different superficial gas velocities for	125

	different spargers	
<b>4.10</b>	Parameters of correlations between the gas hold up and the superficial gas velocity for different spargers.	127
<b>4.11</b>	Parameters of correlations between the volumetric oxygen mass transfer coefficient and the superficial gas velocity for different spargers	130
<b>4.12</b>	Zone of inhibition (mm) for free Daptomycin and Daptomycin combined with bimetallic nanoparticles	138
