

ENHANCEMENT OF ONE-DIMENSIONAL CONSOLIDATION PROCESS IN GEOMATERIALS USING ELECTROKINETIC APPROACH

Thesis submitted in partial fulfillment for the
Award of Degree

Doctor of Philosophy

By

Deep Jyoti Singh

DEPARTMENT OF CIVIL ENGINEERING

(BANARAS HINDU UNIVERSITY)
VARANASI - 221 005
INDIA

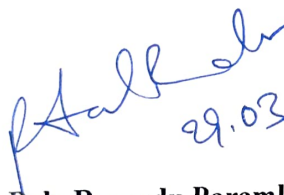

Roll No. 15061007

Year 2023

CERTIFICATE

It is certified that the work contained in the thesis titled "**Enhancement of One-Dimensional Consolidation Process in Geomaterials using Electrokinetic Approach**" by "**Deep Jyoti Singh**" has been carried out under our supervision and that this work has not been submitted elsewhere for a degree.

It is further certified that the student has fulfilled all the requirements of Comprehensive Examination, Candidacy and State of the Art (SOTA) for the award of Ph.D. Degree.

29.03.2023

DECLARATION BY THE CANDIDATE

I, **Deep Jyoti Singh**, certify that the work embodied in this thesis is my own bonafide work and carried out by me under the supervision of **Dr. Bala Ramudu Paramkusam** and co-supervision of **Prof. Arun Prasad** from 21/07/2015 to 31/03/2023, at the **Department of Civil Engineering, Indian Institute of Technology (BHU), Varanasi**. The matter embodied in this thesis has not been submitted for the award of any other degree/diploma. I declare that I have faithfully acknowledged and given credits to the research workers wherever their works have been cited in my work in this thesis. I further declare that I have not willfully copied any other's work, paragraphs, text, data, results, etc., reported in journals, books, magazines, reports, dissertations, theses, etc., or available at websites and have not included them in this thesis and have not cited as my own work.

ACKNOWLEDGEMENT

I reach the final frontier of my academic training in what I hope will be a continuation of an interesting and rewarding career in future I would like to acknowledge the support of many without whom this work would not have been possible.

First and foremost, I take this opportunity to thank my supervisor Dr. Bala Ramudu Paramkusam and co-supervisor Prof. Arun Prasad for their constant support, technical guidance and encouragement throughout this research. This work would not have taken the present shape without their guidance and motivation throughout this work. I thank them profusely from bottom of my heart for their vital role in developing my knowledge and confidence. I wish to extend my sincere gratitude towards my RPEC members, Dr. Medha Jha, Department of Civil Engineering, IIT (BHU), as an internal expert and Prof. R.S. Singh, Department of Chemical Engineering, IIT(BHU), as an external expert for their help, valuable suggestions and encouragement during entire research work.

I would also like to thank Prof. Sasankasekhar Mandal, Head, Department of Civil Engineering, Indian Institute of Technology (BHU), Varanasi for providing all facilities related to my research work. I wish to express my deep regards to, Dr. Suresh Kumar, Dr. Supriya Mohanty and Dr. Manash Chakraborty for their unconditional supports at every moment during the progress of my research. I also extend my heartfelt regards to all the faculty members of the Civil Engineering Department.

I am also grateful to our laboratory staff Shri. Basanta Prasad, Shri. Netra Pal, Shri. Deepak Kumar and Shri. Nand Lal for the assistance extended by them time to time during this research

work. I would also like to thank Mr. Sudhanshu Pal for his constant help throughout my experimental work. I am grateful to all the office staff and authorities of Department of Civil Engineering, for their kind help during the period of my stay to complete the thesis work. I am also obliged to Prof. D. N. Singh, Department of Civil Engineering, Indian Institute of Technology, Powai for providing me the Marine soil to carry out my research. I would also like to extend my sincere thanks to Dr. Dharendra Pal (Precision Instruments) for his innovative ideas and guidance throughout the work.

I would also like to express my sincere thanks to the Central Instrument Facility Centre, IIT (BHU) and the Department of Chemical Engineering, IIT (BHU), Varanasi for facilitating my research work. I am indeed thankful to M/s AIMIL Ltd., New Delhi, India for providing fabrication facility for my research work.

I am thankful to my fellow friends Ms. Ankita Singh, Ms. Sonam Tiwari, Ms. Pragya Singh, Mr. Manish Kumar Mandal, Ms. Rashmi Shrivastava, Ms. Parul Rawat, Mr. Amit Kumar Ram, Mr. Nitesh Singh Bonal and Mr. Abhay Kumar, for the thought-provoking discussions, their support, cooperation and sincere help in many ways.

I would like to express my heartfelt gratitude to my parents, Mr. G.D. Singh and Ms. Urmila Singh, and my in-laws, Mr. Sukhram Nandpuri and Ms. Phoolwati Devi, for their constant and unwavering encouragement and support throughout my academic pursuit. Their love and unwavering support have been a cornerstone of my success. Moreover, I am grateful to my siblings, Ms. Kriti Singh and Mr. Sumit Singh, for their constant affection and encouragement.

I am also thankful to my brothers-in-law, Mr. Avdhesh Nandpuri, Mr. Brajesh Nandpuri, and Mr. Om Pratap, and my sister-in-law, Dr. Vandana Radhaswami, for their encouragement and

support. Last but not least, I owe a deep sense of gratitude to my husband and daughter, Mr. Parmesh Nandpuri and Gargi Nandpuri for his immense patience, attention, understanding, and unwavering support in helping me achieve my aspirations.

Lastly, I humbly express my gratitude and reverence to the Almighty for providing me with this exceptional opportunity and empowering my mind to accomplish the tasks entrusted to me.

Deep Jyoti Singh

*Dedicated to my
little princess*
GARGI NANDPURI

CHAPTER 1- INTRODUCTION	1
1.1. Background	1
1.2. Consolidation techniques	2
1.2.1. Incremental Loading (IL) technique	3
1.2.2. Constant Rates of Strain (CRS) Consolidation	4
1.2.3 Electroosmotic dewatering and consolidation	5
1.3. Motivation of the study	6
1.4. Research Objectives.....	8
1.5. Organization of the Thesis	8
CHAPTER 2 - LITERATURE REVIEW	11
2.1. General.....	11
2.2 Consolidation theory.....	11

2.3. Laboratory-based consolidation tests.....	13
2.3.1 Incremental loading (IL) consolidation Test.....	14
2.3.1.1 Apparatus for IL Test.....	15
2.3.1.2 Consolidation cell	15
2.3.1.3 Loading unit	16
2.3.1.4 Determination of Coefficient of Consolidation (c_v).....	17
2.3.2 Constant rate of strain consolidation.....	18
2.3.2.1 Apparatus for CRS Test.....	18
2.3.2.2 Maximum allowable ratio of excess pore pressure and applied pressure (u_a/σ_v).....	20
2.4 Electrokinetic Phenomenon	20
2.4.1 Principle of Electrokinetics.....	21
2.4.2 Diffuse Double Layer (DDL).....	22
2.4.3 Electrokinetic Consolidation.....	23
2.4.4 Soft soils.....	23
2.4.5 Theory of electrokinetics	24
2.4.6 Factors affecting the electrokinetic treatment process.....	28
2.4.6.1 Soil Type.....	28
2.4.6.2 Zeta Potential	29
2.4.6.3 pH.....	29
2.4.6.4 Temperature	30
2.4.6.5 Water Content	30

2.4.6.6 Level of Soil Salinity	31
2.4.6.7 Electrical Resistivity and Conductivity	31
2.4.6.8 Type and Configuration of Electrodes	32
2.4.7 Methods to enhance the efficiency of electro-osmotic consolidation.....	34
2.4.7.1 Polarity reversal	34
2.4.7.2 Alternating current application	34
2.4.7.3 Injection of chemical solution.....	35
2.4.7.4 Use of Electrokinetic geosynthetics (EKG).....	35
2.4.8 Experimental and field studies.....	38
2.5 Summary	45
CHAPTER 3 – MATERIALS AND METHODOLOGY.....	47
3.1. General.....	47
3.2. Material and Methodology.....	47
3.2.1. Geomaterial.....	47
3.2.2. Geotechnical properties	48
3.2.2.1. Specific gravity test.....	48
3.2.2.2. Grain size distribution.....	49
3.2.2.3. Atterberg limit test	50
3.2.2.4. Compaction test	51
3.2.2.5. pH test	53
3.3. Experimental programme.....	54

3.3.1. Test Plan.....	55
3.3.2. Sample preparation	59
3.3.3 Sensors and their Calibration	61
3.4 Mechanical consolidation methodology	62
3.4.1 IL and CL consolidation technique.....	62
3.4.2. CRS consolidation technique.....	64
3.5. Voltage Coupled loading consolidation techniques (EKCL and EKCRS consolidation).....	66
3.5.1. Electrokinetic Constant Surcharge Loading (EKCL) consolidation procedure	67
3.5.2. Electrokinetic constant-rate-strain loading (EKCRS) consolidation technique	69
3.6. Summary	72
CHAPTER 4- DESIGN, FABRICATION AND ASSEMBLY OF A MODIFIED CONSOLIDATION APPARATUS.....	73
4.1. Introduction.....	73
4.2. Consolidation Loading Assembly.....	73
4.2.1. Loading device.....	76
4.2.2. Consolidometer ring.....	78
4.2.3. Base plate	81
4.2.4. Acrylic Block.....	83
4.2.5. Collar.....	84
4.2.6. Water jacket	86

4.2.7. Loading pad	88
4.2.8. Porous stones	89
4.2.9. Electrodes.....	90
4.2.10. Threaded ring	92
4.3. Schematic Diagrams of Indigenously Developed Consolidation Systems	93
4.4. Data Acquisition System (DAQ)	94
4.5. DC Power supply	95
4.6. Sensors and its Calibration.....	96
4.7. Summary	96
CHAPTER 5 - MECHANICAL CONSOLIDATION TECHNIQUES	99
5.1. General	99
5.2. Experimental Programme	99
5.3. Pore pressure ratio.....	102
5.4. Interpretation of Consolidation Test Data.....	103
5.4.1. Pore pressure (u_b)/Total stress (σ_v) versus Axial Strain (ϵ)	104
5.4.2. Pore Pressure Ratio (PPR) (u_b/σ_v) vs Effective Stress (σ'_v)	107
5.4.3. Void ratio (e) versus Effective stress (σ'_v)	109
5.4.4. Coefficient of consolidation (c_v) vs Effective stress (σ'_v)	110
5.4.5. Permeability (k) versus effective stress (σ'_v)	112
5.4.6. Pre and Post- experimental test data	113
5.4.7. Compression index (c_c)/ Recompression index (c_r)/ Coefficient of consolidation (c_v) versus Consistency limits	115

5.5. Summary	119

LIST OF SYMBOLS

C_c	Compression index
a_v	Coefficient of compressibility
m_v	Coefficient of volume change
p_c	Preconsolidation pressure
C_r	Recompression index
C_v	Coefficient of consolidation
C_α	Coefficient of secondary consolidation
ASTM	American Society of Testing and Material
MS	Marine soil
BCS	Black cotton soil
RM	Red mud
LS	Varanasi local soil
PP	Pore pressure
PPR	Pore pressure ratio
DC	Direct current
D/H	Diameter to height
DAQ	Data Acquisition System
σ'	Effective stress
σ	Total stress
u	Pore pressure
LIR	load increment ratios

k	Permeability
t	Time
z	vertical height of that location
H	maximum drainage path length.
H_o	Initial thickness of specimen
T_v	Time factor
U_z, \bar{U}	Degree of consolidation
γ_w	Unit weight of water
ΔH	Dial gauge readings
Δe	Change in void ratio
$\Delta \sigma$	Stress increment
e_0	Initial void ratio
LL	Liquid limit
PI	Plasticity index
G_s	Specific gravity
r_e	Rate of change of average void ratio
ε	Vertical strain
ε_{av}	Average strain
ζ	Consolidation ratio,
z_o	Original coordinate
β	Dimensionless normalized strain rate parameter
A	Cross-sectional area
k_e	Electro-osmotic permeability

i_e	Constant voltage gradient
q_h	Flow induced by hydraulic gradient
k_h	Hydraulic permeability
i_h	Hydraulic gradient
E	Electric gradient difference
$E(x)$	Voltage at the location x
E_m	Maximum voltage
H_2O	Water molecule
e^-	Electron
H^+	Hydrogen ion
OH^-	Hydroxide ion
O_2	Oxygen gas
H_2	Hydrogen gas
AC	Alternating current
NaCl	Sodium chloride
CaCl ₂	Calcium chloride
EKG	Electrokinetic geosynthetics
EVD	electrical vertical drain
V/m	Voltage gradient
k_i	Electroosmotic coefficient of water transport
Cu _e	Copper electrode
Cu _s	Copper precipitate in solution
LC	Least count

LVDT	Linear variable differential transducer
BP	Back pressure
OMC	Optimum moisture content
MDD	Maximum dry density
V	Voltage in volts
H_o	Initial specimen height
H_s	Height of solids
H_f	Final specimen height
EKCL	Electrokinetic coupled constant loading
EKCRS	Electrokinetic constant rate of strain
ILMS-C	Marine soil with incremental loading on conventional oedometer
ILMS-M	Marine soil with incremental loading on Modified oedometer
CLMS-M	Marine soil with constant loading on Modified oedometer
EKCLMS	Marine soil with electrokinetic coupled constant loading on Modified oedometer
CRSMS	Marine soil with constant rate strain loading on modified oedometer
EKCRSMS	Marine soil with electrokinetic coupled constant rate strain loading on Modified oedometer
ILBCS-C	Black cotton soil with incremental loading on conventional oedometer
ILBCS-M	Black cotton soil with incremental loading on Modified oedometer
CLBCS-M	Black cotton soil with constant loading on Modified oedometer
EKCLBCS	Black cotton soil with electrokinetic coupled constant loading on Modified oedometer
CRSBCS	Black cotton soil with constant rate strain loading on modified oedometer
EKCRSBCS	Black cotton soil with electrokinetic coupled constant rate strain loading on Modified oedometer
ILRM-C	Red mud with incremental loading on conventional oedometer

ILRM-M	Red mud with incremental loading on Modified oedometer
CLRM-M	Red mud with constant loading on Modified oedometer
EKCLRM	Red mud with electrokinetic coupled constant loading on Modified oedometer
CRSRM	Red mud with constant rate strain loading on modified oedometer
EKCRSRM	Red mud with electrokinetic coupled constant rate strain loading on Modified oedometer
ILLS-C	Varanasi local soil with incremental loading on conventional oedometer
ILLS-M	Varanasi local soil with incremental loading on Modified oedometer
CLLS-M	Varanasi local soil with constant loading on Modified oedometer
EKCLLS	Varanasi local soil with electrokinetic coupled constant loading on Modified oedometer
CRSLS	Varanasi local soil with constant rate strain loading on modified oedometer
EKCRSLS	Varanasi local soil with electrokinetic coupled constant rate strain loading on Modified oedometer
CBR	California bearing ratio
